

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION 9–12

PART I. COST OF LIVING.

PLAN OF THE INVESTIGATION 15–17
ANALYSIS OF TABLES 17–107
GENERAL TABLES 109–631
Table I.—Membership of family.
A.—Condition of families as to husband and wife, for each State, by nativity of head of family 110–131
B.—Condition of families as to children, for each State, by nativity of head of family 132–155
C.—Condition of children according to age groups, for each State, by nativity of head of family 156–223
D.—Condition of families as to dependents, boarders, etc., for each State, by nativity of head of family 224–235
E.—Summary of condition of families as to husband and wife, by States 236, 237
F.—Summary of condition of families as to husband and wife, by nativity of head of family 238, 239
G.—Summary of condition of families as to children, by States 240, 241
H.—Summary of condition of families as to children, by nativity of head of family 242, 243
I.—Summary of condition of children according to age groups, by States 244–249
J.—Per cent of children 5 or under 16 years of age at work, at school, and at home, by States 250–253
K.—Summary of condition of children according to age groups, by nativity of head of family 254–257
L.—Per cent of children 5 or under 16 years of age at work, at school, and at home, by nativity of head of family 258, 259
M.—Summary of condition of families as to dependents, boarders, etc., by States 260
N.—Summary of condition of families as to dependents, boarders, etc., by nativity of head of family 261
Table II.—Occupation, earnings, and nonemployment of head of family.
A.—Heads of families in each specified industry, by States 262, 263
B.—Heads of families in each group of classified earnings, by industries and occupations 264–282
C.—Per cent of heads of families in each group of classified earnings, in occupations embracing 100 or more persons 283
D.—Summary of heads of families in each group of classified earnings, by industries 284
E.—Per cent of heads of families in each group of classified earnings, by industries 285

13965

GENERAL TABLES—Continued. Page.
Table II.—Occupation, earnings, etc.—Concluded.
F.—Heads of families idle each specified number of weeks, by States. 286, 287
G.—Heads of families idle each specified number of weeks, by nativity 288, 289
H.—Heads of families idle each specified number of weeks, by causes. 290, 291
I.—Per cent of heads of families idle from each specified cause, in occupations embracing 100 or more persons..... 292, 293
J.—Heads of families idle from each specified cause, by industries.. 294, 295
K.—Per cent of heads of families idle from each specified cause, by industries..... 296, 297
Table III.—Income and expenditure of family.
A.—Families having an income from various sources, for each State, by nativity of head of family 298–308
B.—Families having an expenditure for various purposes, for each State, by nativity of head of family..... 309–319
C.—Income and expenditure per family, for each State, by nativity of head of family 320–341
D.—Families renting and owning homes, size of home, and cost of rent, for each State, by nativity of head of family 342–361
E.—Summary of families having an income from various sources, by States 362
F.—Summary of families having an income from various sources, by nativity of head of family..... 363
G.—Summary of families having an expenditure for various purposes, by States 364
H.—Summary of families having an expenditure for various purposes, by nativity of head of family..... 365
I.—Summary of income and expenditure, by States..... 366, 367
J.—Summary of income and expenditure, by nativity of head of family..... 368, 369
K.—Summary of families renting and owning homes, size of home, and cost of rent, by States..... 370
L.—Summary of families renting and owning homes, size of home, and cost of rent, by nativity of head of family 371
Table IV.—Detailed expenditures in 2,567 families.
A.—Families having an expenditure for various items of food, for each State, by nativity of head of family..... 372–387
B.—Per cent of families having an expenditure for various items of food, for each State, by nativity of head of family 388–403
C.—Expenditure per family for various items of food, for each State, by nativity of head of family..... 404–419
D.—Families having an expenditure for various items other than food, for each State, by nativity of head of family..... 420–435
E.—Per cent of families having an expenditure for various items other than food, for each State, by nativity of head of family..... 436–451
F.—Expenditure per family for various items other than food, for each State, by nativity of head of family..... 452–469
G.—Disposition of surplus and manner of meeting deficit, for each State, by nativity of head of family..... 470–487
H.—Summary of families having an expenditure for various items of food, by States..... 488, 489
I.—Summary of families having an expenditure for various items of food, by nativity of head of family..... 490, 491

PART II. RETAIL PRICES OF FOOD.

INTRODUCTION 635, 636
ANALYSIS OF TABLES 636–640
Relative retail prices of food, simple averages, 1890 to 1903..... 640, 641
Relative retail prices of food, 1903 compared with average price for 1890–1899. 641–643
Per cent of increase or decrease in prices of food in 1903 compared with previous years 643, 644
Relative retail prices of certain groups of related articles of food, 1890 to 1903. 644, 645
Relative wholesale and retail prices of food, 1890 to 1903..... 645–647
Average income and expenditure of 2,567 families in 1901..... 647, 648
Average quantity, average cost, and relative importance of food consumed in 1901..... 648–652
Relative prices of food weighted according to average consumption in 2,567 families 652–658
Amount of certain articles of food which could have been bought for $1 in each year, 1890 to 1903 658, 659
Average food cost for each year, 1890 to 1903..... 659, 660
Trend of cost of living 660, 661
GENERAL TABLES 663–853
Table I.—Retail prices of food, 1890 to 1903..... 664–845
Table II.—Relative retail prices of food, 1890 to 1903 846–853

LETTERS OF TRANSMITTAL.

DEPARTMENT OF COMMERCE AND LABOR,
OFFICE OF THE SECRETARY,
Washington, D. C., October 27, 1904.

Pursuant to the provisions of section 8 of the act of June 13, 1888, and the provisions of the act of February 14, 1903, creating the Department of Commerce and Labor, and placing under its jurisdiction, among other branches of the public service, the former Department of Labor, now the Bureau of Labor, I have the honor to transmit herewith the Eighteenth Annual Report of the Commissioner of Labor, which relates to the Cost of Living and Retail Prices of Food.

Respectfully,

V. H. METCALF,
Secretary.

The SENATE AND HOUSE OF REPRESENTATIVES.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF LABOR,
Washington, D. C., November 6, 1903.

SIR: I have the honor to hand you herewith my Eighteenth Annual Report, which relates to the Cost of Living and Retail Prices of Food. I do not know of any publication comprehending so large an amount of data on either of these important topics as is contained in this report. The investigation necessary to secure this body of data has been an exceedingly difficult one.

In submitting my report I wish to express my gratitude to Mr. G. W. W. Hanger, chief clerk of the Bureau, who has had practical charge of the details of investigation and preparation, and I wish also to thank the field force, the statistical experts, and the general clerical force for their industry and fidelity in collecting and compiling the material.

I am, very respectfully,

CARROLL D. WRIGHT,
Commissioner.

The Honorable SECRETARY OF COMMERCE AND LABOR.

INTRODUCTION.

INTRODUCTION.

The Sixth and Seventh Annual Reports, published in the years 1890 and 1891, respectively, in connection with statistics of cost of production of iron, steel, bituminous coal, coke, iron ore, limestone, cotton goods, woolen goods, and glass, furnished extensive tabulations of data relative to the cost of living of employees engaged in those industries. In the Sixth Annual Report the information relating to cost of living was collected from 3,260 families (representing 16,581 persons), the heads of which were employed in the iron, steel, and cognate industries. In the Seventh Annual Report information was gathered from 5,284 families (representing 27,577 persons), the heads of which were employed in the cotton, woolen, and glass industries. It is thus seen that the whole number of families investigated for the two reports was 8,544, while the number of persons represented was 44,158.

The necessity for later and more comprehensive data relative to this subject and the desirability of supplementing the same by information as to the retail prices charged for the principal staple articles of food during a series of years, in the localities in which working people reside and in the stores patronized by them, has resulted in the present report, which is based on the items of expenditure for one year of 25,440 workingmen's families (including 124,108 persons) located in the principal industrial centers of the United States. Inasmuch as the families canvassed were distributed over 33 States and the proportion in each geographical division corresponds very closely to its importance in an industrial sense, and owing to the large number of families investigated, selected without reference to industry, it is believed that the data here given relative to cost of living are fairly representative of the conditions existing among wage workers in the whole country.

In addition to this very comprehensive body of data as to cost of living of workingmen's families for one year, a thorough canvass of the same localities was made for information as to retail prices of the principal staple articles of food for a series of years. Monthly quotations were secured for each article involved in the report for each of the years from 1890 to 1903, inclusive. So far as is known no collection of retail prices covering a period of years had been made in this

country prior to the present investigation, the only price statistics available having been those for wholesale prices. The latter have been covered annually in quite a complete way by this Bureau in the March number of its Bulletin, but while properly available for many purposes, do not furnish the data for determining with fair exactness the changes in the cost of living to the small consumer from year to year. From a comparison of the tables relative to retail prices in the present report with the data for wholesale prices published in the Bulletin of the Bureau of Labor for March, 1904, it is seen that the former are more stable and do not show the sharp and extensive fluctuations of the latter. As a rule, of course, retail prices must follow the wholesale, rising and falling with the latter, but the extent of the fluctuation differs materially. For example, a comparison of the relative wholesale and retail prices of 25 similar articles or groups of articles of food, covering the period 1890 to 1903, inclusive, shows a range of 37.2 per cent in wholesale prices, but only 15.4 per cent in retail prices.

For convenience, the present report has been divided into two parts, Part I being devoted to the general subject of cost of living, and Part II to the retail prices of food. In each part will be found extensive tabulations of the data gathered, together with a description of the methods employed in the investigation and an analysis and explanation of the statistical tables involved. In connection with the analysis of the tables of Part II, relating to the retail prices of food from 1890 to 1903, the statistics in regard to the consumption of the various articles of food and in regard to prices are brought together and the changes in the cost of living as regards food from year to year from 1890 to 1903 are shown.

PART I.

COST OF LIVING.

HD
8051
.A3

PART I.

COST OF LIVING.

PLAN OF THE INVESTIGATION.

Part I of the present report presents the results of an investigation as to cost of living for one year of 25,440 families (representing 124,108 persons) in the United States. In connection therewith is also included a presentation of family conditions, the income of the family, the occupation, earnings, and nonemployment of the head of the family, the quantity of food consumed, etc. The data upon which the tables of cost of living are based were gathered in the principal industrial centers of 33 States, including the District of Columbia. An absolutely exhaustive investigation for the United States, or even for a single State, would have been a task so great as to be practically impossible. Nor was such an investigation deemed necessary, inasmuch as the data collected for each State are believed to be representative of the conditions as to cost of living of persons employed as wage workers and at small salaries.

At the beginning of the investigation the number of family schedules to be secured in each of the several States selected was roughly apportioned, according to the number of persons employed in the manufacturing industries of the State, and for this reason a large number of schedules were collected in some States and a comparatively small number in others. In several instances a larger number of family schedules than its due proportion was allowed to a State, and adjoining States, in which practically identical conditions prevailed, were omitted. But within the geographical divisions the 25,440 families are distributed in almost exact proportion to the number of industrial employees.

The investigation was limited to the families of wage workers and of persons on salaries not exceeding $1,200 per year, no attempt being made to cover families of persons engaged in business on their own account. Both the native and the foreign born elements of the population were covered, the nativity of the husband of the family, for the purposes of this investigation, being accepted as determining the nativity of the family. Schedules were secured from quite a number of colored families, but the facts for those families are not shown separately. All schedules cover a period of one year, and

nearly all schedules cover a year ending some time during the calendar year 1901, although in a few instances the schedule year ended in the latter part of 1900 or the early part of 1902.

The following table shows for each of the 33 States covered the total number of families investigated and the number of families whose heads were of native and of foreign birth:

GENERAL NATIVITY OF HEADS OF FAMILIES INVESTIGATED, BY STATES.

State.	Number of families investigated.	Nativity of head of family—	
		United States.	Foreign.
Alabama	297	269	28
California	507	318	189
Colorado	197	123	74
Connecticut	810	381	429
Delaware	196	162	34
District of Columbia	100	93	7
Georgia	298	291	7
Illinois	1,633	707	926
Indiana	601	408	193
Iowa	332	244	88
Kansas	196	164	32
Kentucky	335	241	94
Louisiana	193	160	33
Maine	366	165	201
Maryland	616	512	104
Massachusetts	2,577	1,113	1,464
Michigan	887	348	539
Minnesota	398	155	243
Missouri	794	642	152
New Hampshire	299	126	173
New Jersey	994	639	355
New York	4,559	2,236	2,323
North Carolina	198	195	3
Ohio	1,800	1,316	484
Pennsylvania	3,702	2,496	1,206
Rhode Island	475	203	272
South Carolina	200	194	6
Tennessee	199	181	18
Texas	197	176	21
Virginia	386	374	12
Washington	200	112	88
West Virginia	199	174	25
Wisconsin	699	243	456
Total	25,440	15,161	10,279

The data here presented were gathered by experienced special agents of this Bureau by personal inquiry, the information being given generally by the housewife, who was often assisted by other members of the family. The agents began this work in the localities to which they were assigned by making themselves thoroughly acquainted with the prevailing prices of all staple necessaries, thus enabling them to verify, to a certain extent, the statements as to cost of living. Of necessity much of the information was given from memory although some families were found that kept correct book accounts of income and expenditure, while many kept partial accounts, and many had store pass books. There was a disposition on the part of the families visited to give exact information, and by careful questioning and checking income and expenditures with surplus or deficit, the agent was able to secure a statement that both he and the informant believed to be a

very accurate and true presentation of the income and of the various expenditures of the family. While individual statements may not be absolutely accurate, it can safely be assumed that averages based on any considerable number of statements correctly represent the group or class of families from which they were secured, as such errors as may exist in the statements of individuals are doubtless compensating.

In instances where the averages are based on a small number of families they should of course be accepted with due caution, for though the family statements may be accurate, the averages may not include a sufficiently large number to represent fairly the class for which they stand.

Space would not admit of the publication in detail of the statements or schedules for the 25,440 families. But the statements shown in detail would be of little additional value, as the only object in such a presentation would be to afford the basis for the preparation of other combinations and tables than are here published. It is believed that all the more important features are brought out in the tables presented in this report.

ANALYSIS OF TABLES.

The subject-matter of the report is presented in six general tables, each of which is subdivided into a number of subordinate tables.

The titles of the general tables are as follows:

Table I. Membership of family.

Table II. Occupation, earnings, and nonemployment of head of family.

Table III. Income and expenditure of family.

Table IV. Detailed expenditures in 2,567 families.

Table V. Income and expenditure in 11,156 normal families.

Table VI. Consumption of food in 1,043 normal families.

A short statement of the contents of the general tables will be given first, after which the several subordinate tables will be taken up separately and explained.

Table I describes the families investigated, showing the State in which the families lived, the nativity or birthplace of the head of the family, the persons constituting the family, the persons contributing to the support of the family, and the sex and age of the children, together with their condition as regards school attendance and work.

Table II shows the industries and occupations in which the heads of the families—that is, the husbands—were engaged, their earnings during the year, and the cause and duration of their nonemployment, if any.

Table III is one of the most important tables of the report, showing the State in which the family lived, the nativity of the head of the

family, the sources and amount of income of the family, the families having expenditures for the chief items in cost of living, namely, housing, fuel, lighting, food, clothing, and sundries, and the expenditures therefor, also the number of rooms occupied by the family.

Table IV gives a more detailed statement of the expenditures in 2,567 of the families from which it was found possible to secure this information. The expenditures for food are itemized under fresh beef, salt beef, bread, milk, eggs, potatoes, etc. The expenditures for clothing for husband, wife, and children are shown separately. The expenditures are also shown for taxes, insurance, dues to labor organizations, sickness, etc. The facts are presented by the State of residence and the nativity of the head of the family as in preceding tables.

Table V sets forth the income and expenditure of 11,156 "normal" families according to the number of children in the family. In the preceding tables the data have been presented for the families without any selection with regard to the constituent elements of the family, some families containing dependents, boarders, or lodgers, while others did not. Still others contained young children, while others contained children nearly, if not quite, of adult age.

For purposes of comparison those families having certain attributes were selected from the whole number investigated. The families thus selected are termed "normal." The "normal" family, for the purposes of this study, is one which has—

The husband at work;
A wife;
Not more than five children, and none over 14 years of age;
No dependent, boarder, lodger, or servant;
Expenditures for rent, fuel, lighting, food, clothing, and sundries.

As in Tables I, III, and IV, the facts are given by the State of residence and the nativity of the head of the family. In addition, however, the data in this table are presented by size of family and by classified income, thus affording an opportunity to study the difference in expenditures for families of different sizes and for families having different incomes.

Table VI gives information as to the quantity of the principal articles of food consumed and the cost of the same. In this table the relative amount of food consumed by the different members of the family has been taken into consideration, and data for 1,043 normal families only, from which an itemized report of the expenditure for food was received, have been included therein. A number of these normal families were found to have no children, while in the families that reported children great differences were of course found in their number and ages. Inasmuch as the amount of food consumed in a family depends not only on the number of children, but also on the ages of the children, in order to make an exact comparison of expenditures

for food the relative consuming powers of the different members of the normal families were estimated after careful comparison and study. On the basis of these estimates it was assumed as generally true for the purpose of this table—

1. That all husbands consume a like amount of food.
2. That the wife consumes 90 per cent as much food as the husband.
3. That a child from 11 to 14 years of age, inclusive, consumes 90 per cent as much food as the husband.
4. That a child from 7 to 10 years of age, inclusive, consumes 75 per cent as much food as the husband.
5. That a child from 4 to 6 years of age, inclusive, consumes 40 per cent as much food as the husband.
6. That a child 3 years of age or under consumes 15 per cent as much food as the husband.

Thus the consumption of food in the normal family may be expressed briefly as follows:

	Units.
The husband consumes	100
The wife consumes	90
A child from 11 to 14 years of age, inclusive, consumes	90
A child from 7 to 10 years of age, inclusive, consumes	75
A child from 4 to 6 years of age, inclusive, consumes	40
A child 3 years of age or under consumes	15

Previous comparisons of this character have shown these figures to be approximately correct. With all families reduced to this common basis the quantity and cost of food consumed per 100 units has been computed. The table shows, not the quantity consumed and the cost per family or per individual, but the quantity consumed and the cost per 100 units of consumption, that is, per adult male.

In order that the reader may fully understand the several general and subordinate tables, an explanation is given of each in the following pages. In the explanation and illustration no effort is made to draw conclusions from any of the primary tables, nor is any extended analysis made of the summary tables, the object being simply to make all points in the tables entirely clear, leaving the reader to draw his own conclusions.

The full list of all the general tables and subordinate tables is given in the table of contents and need not be repeated here.

As has been stated, this report is based on data furnished by 25,440 families. More data, however, were secured from some of these families than from others; families differed as to the persons constituting them, and expenditures differed in character in the several families. For this reason many of the tables intended to throw light upon certain specific conditions embrace but a part of the entire 25,440 families. Some tables cover all of the families, other tables refer only to certain kinds of families, or families having certain expenditures.

All families are included in Table I and part of Table III. The subordinate tables III–D, III–K, and III–L do not include the families having boarders and lodgers other than relatives or children of the family, and the families having members eating at home but lodging outside of the home. Table II includes all husbands at work.

Table IV relates only to the 2,567 families that gave statements of their expenditures in greater detail than did the other families.

Table V relates only to 11,156 of the 25,440 families that had certain characteristics for which they are classed as normal families. Each family so classed had a husband and a wife; not more than five children, no one of whom was over 14 years of age; no dependent, boarder, lodger, or servant; occupied a rented house, and had expenditures for fuel, lighting, food, clothing, and sundries.

Table VI includes only the 1,043 normal families that gave detailed reports of their expenditures.

As the several tables are based on different numbers and kinds of families, it is to be expected that the income and the expenditure for the several items enumerated will differ more or less in these tables.

Thus the average income of the 25,440 families was $749.50; that of the 11,156 normal families—including no boarders or lodgers and having no children over 14 years of age—$650.98; while that of the 2,567 families that reported expenditures in detail was $827.19 (p. 75).

The normal families had a smaller average income than did the 25,440 families. This is accounted for mainly by the fact that the normal family had no income from boarders and lodgers, and seldom from the children, as the children in these families were all young. But the average size of the 11,156 normal families was 3.96, while that of all families was 4.88. The 2,567 families had a larger average income than the 25,440 families, but the fact that the average size of the former was 5.31 persons as opposed to an average of 4.88 persons for the latter group in large part explains this.

It will be seen that the item of rent appears in four distinct groups of families and that the amount expended for this item is different in every case. In Tables III–G and III–I it is seen that the average rent paid by 20,615 families (all of the families investigated that paid rent) was $118.40. In Tables III–K and III–L, all renting families that had regular boarders and lodgers, or members of the family lodging outside of the home, were excluded. The average rent paid by the 19,090 families remaining was $116.55, or $1.85 less than the average for the entire 20,615 families. Table IV shows that rent was paid by 2,076 of the 2,567 families that reported expenditures in detail. The average rent paid by these 2,076 families was $122.92. Rent was paid by all of the 11,156 normal families included in Table V. The average amount was $111.97.

Thus it is seen that four different averages are shown for rent in as many different groups of families. The expenditures for other items will be found to differ in much the same way.

The fact that these differences occur is here brought to the reader's attention in order that he may not be confused in his study of the tables. When figures from this report are used, care should be observed to note the table from which the statement is taken as well as the number and character of the families considered therein.

In connection with the investigation as to cost of living an effort was made to ascertain the condition of the homes as to sanitation, furnishings, and cleanliness.

As the agents of the Bureau obtained all of their information by the courtesy of the household, they could judge of these conditions only from what could be observed during the interview with the family.

The agents often did not have the opportunity to inspect the premises thoroughly, as they had no authority to act as sanitary officers.

In many families it was quite impossible to secure a knowledge of these conditions. From the data that could be secured the following table has been prepared:

CONDITION OF HOMES AS TO SANITATION, FURNISHINGS, AND CLEANLINESS, BY GENERAL NATIVITY OF HEAD OF FAMILY.

General nativity of head of family.	Per cent of homes the sanitary condition of which was—				Per cent of homes furnished—				Per cent of homes in which the condition as to cleanliness was—			
	Good.	Fair.	Bad.	Total.	Well.	Fairly well.	Poorly.	Total.	Good.	Fair.	Bad.	Total.
United States	63.94	29.33	6.73	100.00	64.16	25.84	10.00	100.00	81.37	12.61	6.02	100.00
Foreign	58.11	37.00	4.89	100.00	57.46	27.79	14.75	100.00	77.13	17.60	5.27	100.00
Total	61.46	32.59	5.95	100.00	61.44	26.63	11.93	100.00	79.63	14.66	5.71	100.00

From this table it appears that 61.46 per cent of all families for which reports were received lived under good sanitary conditions; 32.59 per cent lived under fair sanitary conditions, and 5.95 per cent under bad sanitary conditions. A comparison of native and foreign families shows a larger percentage of native families living under good sanitary conditions, a larger percentage of foreign families under fair sanitary conditions, and a larger percentage of native families under bad sanitary conditions. Of the homes, 61.44 per cent were well furnished, 26.63 per cent fairly well furnished, and 11.93 per cent poorly furnished. A larger percentage of the native than of the foreign families had well-furnished homes.

As to general cleanliness, 79.63 per cent of the homes were reported as being in good condition, 14.66 per cent in a fair condition, and 5.71 per cent in a bad condition. Larger percentages of homes of native

than of foreign families were reported in the conditions good and bad, while there was a larger percentage of homes of foreign families reported in a fair condition.

The fact that nearly 80 per cent of the families were found in a good condition as to cleanliness, while only 61 per cent lived under good sanitary conditions and had homes well furnished, indicates that there was a disposition to live under as good conditions as possible. Many families that could not afford to live under good sanitary conditions or have their homes well furnished could be, and were, cleanly.

In the following pages the various tables are taken up in order and their meaning and relation briefly indicated.

TABLE I.—MEMBERSHIP OF FAMILY.

Table I, as has been stated, describes in some detail in its subordinate tables the membership of the family. To bring together some of the statistics from these tables and show the number of native and foreign families investigated in each geographical division of the United States, and the number of each class of persons (husbands, wives, children, boarders, etc.) in these families, the following table is here inserted:

NUMBER AND SIZE OF FAMILIES INCLUDED IN THE INVESTIGATION, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Number of families.	Number of persons.								Average size of family.
		Husbands.	Wives.	Children.	Dependents.	Boarders.	Lodgers.	Servants.	Total.	
North Atlantic States:										
Native	7,359	7,143	7,258	15,602	560	2,324	377	36	33,300	4.53
Foreign	6,423	6,178	6,270	16,609	410	2,702	639	22	32,830	5.11

Foreign	10,279	9,910	10,052	27,394	653	4,120	1,112	54	53,295	5.18
Total	25,440	24,578	25,021	61,226	2,050	9,120	1,876	237	124,108	4.88

The foreign families, it will be noticed, average larger than the native families in each of the geographical divisions. As would be expected in an investigation taking up families as they are found with no effort at selection as to nativity, few foreign families appear in the Southern groups, only 3.8 per cent of all the foreign being in those groups while 19.9 per cent of all the native families investigated are there located. This means, therefore, that the averages for all the foreign families are in effect averages of foreign families living under the conditions prevailing in the Northern and Western States, while in the averages of all the native families Southern conditions have an important modifying influence. But this can not be said to misrepresent the country as a whole, for the foreign-born population constitutes only an insignificant proportion in the South, while in the North and West it is a very considerable element. However, any comparison, outside of State and geographical summaries, of the native and foreign families, without due consideration of these facts, might lead to erroneous conclusions, for in some cases, certainly, the conditions prevailing in the locality will explain differences that might improperly be assigned to differences on account of nativity.

Table I–A—Condition of families as to husband and wife, for each State, by nativity of head of family (pp. 110 to 131).—This table relates to the husband and the wife of the family, grouped according to the State of residence of the families discussed and the place of birth of the head of the family; that is, of the husband.

A consideration of the first line of figures for New York, for example, on pages 122 and 123 shows that the heads of 2,236 of the families investigated in this State were born in the United States. In 2,127 of these 2,236 families the husband was living with his family, 109 families being without the husband, the latter being either dead or separated from his family. Of the 2,127 husbands 2,116 were at work during the year, 3 were idle the entire year, and 8 were invalids the entire year.

In 2,209 of the 2,236 families the wife was living at home, while in 27 she was either dead or separated from her family. Of the 2,209 wives 304 were at work, at least some part of the year, at other than home duties, earning money and contributing to the support of the family. These wives were either taking in washing or sewing, or doing other work they could do in their homes, or were going out from home to work as servants or as operatives in mills, factories, etc. Generally they were also doing the whole or a part of the ordinary work of the household. The greater number of the wives, 1,905, however, were at home and presumably engaged in the ordinary work of the home.

The remainder of the line on the second page is devoted to percentages based on the preceding figures—thus, 95.13 per cent of the 2,236 families had husbands, 4.87 per cent did not; 98.79 per cent of the

families had wives, 1.21 per cent did not. It is next shown that of the 2,127 husbands 99.48 per cent were at work, 0.14 per cent idle, and 0.38 per cent invalid; and that of the 2,209 wives 13.76 per cent were at work and 86.24 per cent at home.

The next line treats of families from which reports were secured, the heads of which were born in Austria-Hungary. This line may be followed across in the same manner as the preceding line devoted to the families having native-born heads. The list of foreign nativities ends with a total and average for all foreign families, and is followed by a grand total and average for the 4,559 families investigated in the State.

Table I-B—Condition of families as to children, for each State, by nativity of head of family (pp. 132 to 155).—This table relates to the children of the family. It does not include or account for all the children of the family, but only such children as were living at home, receiving support from the family funds, and generally contributing their earnings, if any, to the family funds during the period covered by the investigation. The table does not include children who had left the parental roof, nor does it include children who supported themselves and lived with their parents as regular paying boarders. Like Table I-A this table presents the facts grouped according to the State of residence of the families and the place of birth of the heads of families.

The first line for the State of New York on pages 146 and 147 shows that 445 of the 2,236 native families investigated in the State had children at work, and that the number of children at work was 665, making an average of 1.49 at work in each of the 445 families. There were 1,137 families having children at school during a part or the whole of the school year. The number of children at school was 2,261, making an average of 1.99 children at school in each of the 1,137 families.

Twenty families had 23 children at work part of the year and at school part of the year. Of the 2,236 families, 1,299 had children at home. The number of children at home was 2,155, making an average of 1.66 children at home for each of the 1,299 families. The expression "children at home" includes children too young to attend school, those who were of school age, but for some reason did not attend school during the year, and those who were beyond the school age, but were at home and unemployed.

Next follows a statement as to all children collectively. One thousand nine hundred and nine families had children, and 327 families had none. The total number of children in the 1,909 families was 5,104, giving an average of 2.67 per family.

The remainder of the table is devoted to percentages based on the numbers preceding. Of the 2,236 families 85.38 per cent had children in the family and 14.62 per cent had none. Of the 1,909 families having

children 23.31 per cent had children at work, 59.56 per cent had children at school, 1.05 per cent had children at work and at school, and 68.05 per cent had children at home. Of the 5,104 children in the group of families considered 13.03 per cent were at work, 44.30 per cent at school, 0.45 per cent at work and at school, and 44.22 per cent at home.

A comparison of the percentages of children at work and of children at school in any of the States where a considerable number of both native and foreign families is represented shows but slight differences.

Table I–C—Condition of children according to age groups, for each State, by nativity of head of family (pp. 156 to 223).—This table shows the condition of the children in the families as regards school attendance and work, for each State and each nativity of head of family, by sex and age groups. Under each nativity one line is devoted to male children, one line to female children, and one to the totals of the sexes.

By reference to pages 198 and 199, relating to the families in New York, it is seen that in the families of United States nativity no male child under 10 years of age was at work; that 59 male children between 10 and 16 years of age were at work; that 240 male children between 16 and 21 years of age were at work, and that 54 male children 21 years of age or over were at work. At the end of the line is given the total of 2,528 male children and their average age, which was 8.58 years.

In like manner the facts are given for each foreign nativity and for all foreign nativities combined. A comparison can thus be made of the condition of children in native and foreign families in each State.

The reader will observe that Tables I–B and I–C are so closely related that they should be studied together.

Table I–D—Condition of families as to dependents, boarders, etc., for each State, by nativity of head of family (pp. 224 to 235).—This table shows the number of families having dependents, boarders, lodgers, and servants and the number of persons in each of these several classes, grouped according to the State of residence and the nativity of the head of the family. Dependents are persons other than the children of the family, who are supported wholly or partly from the family funds and contribute their earnings, if any, to the family funds. Children who are supporting themselves, boarding at home and paying board as they would in any other place, are included with boarders.

The first line for the State of New York on page 231 shows that of the 2,236 native families investigated 166 had dependents, and that the number of dependents in these families was 186. Of the 2,236 native families, 402 had boarders, the total number of boarders being 624. Fifty two families had a total of 126 lodgers. Seven families had

one servant each. The percentages show that 7.42 per cent of the 2,236 native families had dependents, 17.98 per cent had boarders, 2.33 per cent had lodgers, and 0.31 per cent had servants.

In like manner the facts are presented for each foreign nativity and for all foreign nativities combined. A comparison can thus be made between native and foreign families in each State.

The facts set forth in detail in the four tables just described are condensed or summarized in a number of shorter tables which follow. In one set of tables the facts are summarized according to the State of residence and also according to geographical divisions and in another according to the place of birth of the head of the family.

In the detail tables the nativities are given as reported, but in the summary tables all nativities for which fewer than 50 families were investigated are grouped together under the title "Other foreign." The 113 families so grouped were reported under the following nativities:

NATIVITIES OF 113 FAMILIES GROUPED AS "OTHER FOREIGN" IN SUMMARY TABLES.

Nativity.	Families.	Nativity.	Families.
Argentine Republic	1	Madagascar	1
Australia	6	Madeira Islands	1
Azores	1	Mexico	4

Luxemburg	1		
		Total	113

Table I–E—Summary of condition of families as to husband and wife, by States (pp. 236 and 237).—This table summarizes the data given in Table I–A according to the State of residence of the families investigated and also by geographical divisions.

Reference to the total shows that 25,440 families were included in the investigation. There were 24,578 husbands in these families, of which number 24,402 were at work at least at some time during the year, 36 were idle the entire year, and 140 were invalids the entire year.

The number of wives was 25,021. Of these wives 2,173 were at work at least some part of the year, and 22,848 were at home. In 862 families there were no husbands and in 419 families no wives. The percentages show that 96.61 per cent of the families had husbands and 3.39 per cent had not, and that 98.35 per cent of the families had wives and 1.65 per cent did not have wives. Of the total number of husbands 99.28 per cent were at work, 0.15 per cent were idle, and 0.57 per cent were invalids.

The percentages relating to the wives probably constitute the most interesting figures in this table. Female labor is an important subject

of economic study, and it is interesting to know that in this large number of families 8.68 per cent of the wives were working at least some part of the year, earning money with which to help support, and in some instances to entirely support, the family.

In a study of economic conditions it is often desirable to have data arranged according to large geographical divisions. For that reason this table and the succeeding summaries, by States, include a general summary for the five geographical divisions into which the several States have been grouped. The classification is, so far as the States were covered by this investigation, the same as used by the United States Census, and is as follows:

North Atlantic States:
- Maine.
- New Hampshire.
- Massachusetts.
- Rhode Island.
- Connecticut.
- New York.
- New Jersey.
- Pennsylvania.

South Atlantic States:
- Delaware.
- Maryland.
- District of Columbia.
- Virginia.
- West Virginia.
- North Carolina.
- South Carolina.
- Georgia.

North Central States:
- Ohio.
- Indiana.
- Illinois.
- Michigan.
- Wisconsin.
- Minnesota.
- Iowa.
- Missouri.
- Kansas.

South Central States:
- Kentucky.
- Tennessee.
- Alabama.
- Louisiana.
- Texas.

Western States:
- Colorado.
- California.
- Washington.

No material difference is seen in the several geographical divisions as to the per cent of husbands at work, but a considerable difference is seen as to the per cent of wives at work. In the South Atlantic States, 14.17 per cent of the wives were at work; in the South Central States, 11.96 per cent; in the North Atlantic States, 9.23 per cent; in the North Central States, 6.16 per cent, and in the Western States, 3.36 per cent.

The larger percentages in the Southern States are probably due, to some extent, to the fact that many colored families were included.

Table I-F—Summary of condition of families as to husband and wife, by nativity of head of family (pp. 238 and 239).—The data set forth in detail in Table I-A and summarized by States in the preceding table are here summarized by the nativity of the head of the family.

In 15,161 families the husband was native born, and in 10,279 families foreign born. A study of the percentages shows that 96.75 per cent of the native families had husbands and 98.73 per cent had wives.

In the foreign families the percentages are approximately the same, for 96.41 per cent had husbands and 97.79 per cent had wives. The condition of the husbands as to employment was nearly the same in the native and in the foreign families. In the native families 99.47 per cent of the husbands were at work, at least some time during the year, 0.11 per cent were idle, and 0.42 per cent were invalid; in the foreign families 99.01 per cent of the husbands were at work, 0.20 per cent were idle, and 0.79 per cent were invalid.

There was found no great difference as to the condition of the wives in native and in foreign families. In the native families 8.95 per cent were at work during at least a part of the year, and 91.05 per cent were at home. In the foreign families 8.29 per cent of the wives were at work during at least a part of the year, and 91.71 per cent were at home, the percentage of wives at work being a little greater in the native families.

In the families grouped as "other foreign" 13.39 per cent of the wives were at work; in the French families 13.10 per cent were at work, while only 0.99 per cent of the wives in the Dutch families were at work, the other nativities showing percentages ranging between these limits.

The following table is here presented to enable a comparison to be made of the native and foreign families within each geographical division with regard to the per cent of wives at work:

PER CENT OF WIVES AT WORK BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Per cent of wives at work.	Geographical division and general nativity of head of family.	Per cent of wives at work.
North Atlantic States:		South Central States:	
Native	9.04	Native	12.52
Foreign	9.44	Foreign	8.95
Total	9.23	Total	11.96
South Atlantic States:		Western States:	
Native	14.50	Native	4.00
Foreign	10.88	Foreign	2.33
Total	14.17	Total	3.36
North Central States:		United States:	
Native	5.99	Native	8.95
Foreign	6.38	Foreign	8.29
Total	6.16	Total	8.68

Table I-G—Summary of condition of families as to children, by States (pp. 240 and 241).—The data given in Table I-B are summarized here by States and by geographical divisions. Reference to the total shows that 21,448 families had children. The total number of children was 61,226, making an average of 2.85 children for the 21,448 families.

There were 5,674 families having children at work, 13,396 families having children at school, 268 families having children at work and at school, 14,828 families having children at home, and 3,992 families having no children.

As to the children, there were 9,135 at work at some time during the year, 26,995 at school, 302 at work and at school, and 24,794 at home. The average number of children at work in the 5,674 families having children at work was 1.61; the average number of children at school was 2.02 in the 13,396 families reporting children at school; the average number of children at work and at school was 1.13 in 268 families, and the average number at home was 1.67 in the 14,828 families having children at home.

In the percentages it is seen that 84.31 per cent of all the families investigated had children living with the parents as a part of the family, and that 15.69 per cent of the families did not have children living at home as a part of the family. Of the 21,448 families having children 26.45 per cent had children at work all or a part of the year, 62.46 per cent had children at school, 1.25 per cent had children at work part of the year and at school part of the year, and 69.13 per cent had children at home.

Of the 61,226 children, 14.92 per cent were at work some part of the year, 44.09 per cent were at school, 0.49 per cent were at work and at school, and 40.50 per cent were at home.

The figures for the several States show that in Georgia 57.85 per cent of the 261 families having children had children at work some part of the year, and that 42.88 per cent of such families in Maryland had children at work. Kansas showed the smallest percentage of families having children at work, namely, 8.28.

In the South Atlantic States 33.54 per cent of the families having children had children at work some part of the year; in the South Central States 29.08 per cent of such families had children at work; in the North Atlantic States 26.11 per cent; in the North Central States 25.43 per cent, and in the Western States 18.45 per cent.

Of those families which had children the largest percentage having children at school was found in Rhode Island, where the percentage was 76.87. In Minnesota 71.34 per cent of such families had children at school, in Maine 70.45 per cent, etc. The smallest percentage, 30.65, was in Georgia.

In the North Central States the per cent was 65.81; the lowest per cent in any division was 53.73 for the South Atlantic States.

From an examination of the percentages relating to the children in the several States it appears that 38.56 per cent of the children in Georgia were at work some part of the year, as were 26.02 per cent of the children in Maryland, 23.35 per cent of the children in Rhode Island, etc.

In Kansas but 5.54 per cent of the children were at work. The highest percentage of children at school was 54.84 per cent in Minnesota and the lowest was 17.55 per cent in Georgia. Of the children at home the highest percentage was found in Texas, where the rate was 52.90 per cent. The lowest percentage was found in Rhode Island, the rate being 29.25 per cent.

An examination of the percentages relating to the children in the several geographical divisions shows that 20.49 per cent of the children in the South Atlantic States were at work some part of the year. In the South Central States 16.75 per cent of the children were at work; in the North Atlantic States 14.88 per cent; in the North Central States 13.37 per cent, and in the Western States 11.14 per cent.

The highest percentage of children at school in any division was 50.03 per cent in the Western States. Following this division are the North Central States with 46.05 per cent; the North Atlantic States with 44.65 per cent; the South Central States with 37.66 per cent, and lastly, the South Atlantic States with 36.18 per cent of the children at school.

The percentage of children at home varied from 44.91 per cent in the South Central States to 38.66 per cent in the Western States.

The figures for the several States can be analyzed readily by the reader. In studying the number of children at work and the number at school the reader should always consider the small number that are at work part of the time and at school part of the time.

Table I–II—Summary of condition of families as to children, by nativity of head of family (pp. 242 and 243).—The data summarized by States in the preceding table are summarized by the nativity of the head of the family in this table. Of the 15,161 native families 12,636 had children, and the total number of children in these native families was 33,832, making an average of 2.68 children per family. Out of 10,279 foreign families 8,812 families had a total of 27,394 children, an average of 3.11 children per family, or 0.43 more per family than was found in the native families. The data for the several foreign nativities show that the largest average number of children per family was in the Dutch families, where the number was 3.65 children. The reader should bear in mind that the average number of children per family does not represent all of the children who are living, born to the family, but only those children who are living with the parents as a part of the family. Another striking feature of the table is that in no case do the families of any foreign nativity show so small an average number of children as do the native families. Of the native families 83.35 per cent had children, while of the foreign families 85.73 per cent had children. Of the 12,636 native families having children

22.63 per cent had children at work during part of the year, 59.79 per cent had children at school, 1.32 per cent had children at work and at school, and 70.35 per cent had children at home. Of the 8,812 foreign families having children 31.95 per cent had children at work, 66.28 per cent had children at school, 1.15 per cent had children at work and at school, and 67.39 per cent had children at home. In a study of the condition of the children it is noticeable that the foreign families show a greater percentage of children in school and a greater percentage of children at work and a correspondingly smaller percentage of children at home. This is due in large measure to the influence of the South, where the native families reporting far outnumber the foreign families, and where the opportunities for attending school are not equal to those in the North and West where the foreign families are almost exclusively found.

The figures for the native families show 13.18 per cent of the children at work, 43.01 per cent at school, 0.56 per cent at work and at school, and 43.25 per cent at home, while the figures for the foreign families show 17.06 per cent at work, 45.43 per cent at school, 0.41 per cent at work and at school, and 37.10 per cent at home.

As to the children in the several nativities the largest per cent reported at work was 21.30 for the Welsh families; the smallest per cent at work was 7.25, which per cent was reported both for Danish and Swedish families. The largest per cent of children at school was 57.45, reported for the Swiss families, and the smallest was 38.93, reported for the Austro-Hungarian families. The greatest per cent of children at home was 50.70, shown for the Italian families, while the smallest was 24.82, for the Swiss families.

Table I–I—Summary of condition of children according to age groups, by States (*pp. 244 to 249*).—This table is a summary by States of the data set forth in Table I–C. The grand total shows that 21,448 families had children. Of the whole number of children at work, 8 were 5 or under 10 years of age, 1,583 were 10 or under 16 years of age, 5,865 were 16 or under 21 years of age, and 1,679 were 21 years of age or over. The totals relating to children in the other classifications may be followed easily in this table. In the totals for "All children" it is seen that the number of males and of females is nearly the same in the first three age groups. From 16 years of age up, however, the number of female children in the families exceeds the number of males to quite an extent, the male children probably having left the family to go to work elsewhere, and the females to a greater extent having remained with the family.

The average age of the male children was 9.04 years, and of the female children 9.65 years. The average age of all children was 9.35 years.

The data contained in this table are so plainly presented that no further explanation is deemed necessary. The size of the table does not admit of the introduction of percentages from which comparative results might be more readily drawn. The more important elements of the table are brought out more clearly in the form of percentages in the succeeding table.

Table I–J—Per cent of children 5 or under 16 years of age at work, at school, and at home, by States (pp. 250 to 253).—This table is composed of percentages based on the table just preceding. It is to be expected that children under 5 years of age are at home, and that children 16 years of age and over are usually at work, but it is generally conceded that children 5 or under 16 years of age should be in school. This table shows the percentages of children 5 or under 10 years of age, 10 or under 16 years of age, and the total children 5 or under 16 years of age in the various classifications.

By reference to the grand total it is seen that of the children 5 or under 10 years of age 0.05 per cent were at work, 67.77 per cent were at school, 0.05 per cent were at work and at school, and 32.13 per cent were at home. Of the children 10 or under 16 years of age 9.67 per cent were at work, 85 per cent were at school, 1.34 per cent were at work and at school, and 3.99 per cent were at home. When the two groups are combined, comprising the children 5 or under 16 years of age, it is seen that 4.70 per cent were at work, 76.10 per cent were at school, 0.67 per cent were at work and at school, and 18.53 per cent were at home.

In the group of 5 or under 10 years of age the highest percentage of school attendance is 87.04, reported for Maine; the lowest is 27.68, reported for Georgia. In the group of 10 or under 16 years of age the highest percentage of school attendance is 99.07, reported for the State of Washington; the lowest is 29.87 per cent, reported for Georgia. In the combined group of 5 or under 16 years of age the highest percentage of school attendance is 87.95, reported for Maine, and the lowest, 28.95 per cent, reported for Georgia.

A consideration of the figures for geographical divisions shows that the highest percentage of children at work in the age group 10 or under 16 years was in the South Atlantic States, where 22.29 per cent of the children were so reported. In the South Central States 16.65 per cent of the children in that age group were reported at work; in the North Atlantic States 8.48 per cent; in the North Central States 7.28 per cent, and in the Western States 2.38 per cent.

The highest percentage of school attendance in the group 5 or under 10 years of age is shown for the North Central States, where 71.20 per cent of the children in that age group were reported as being in school. In the Western States 70.55 per cent of the children in that

age group were at school; in the North Atlantic States 68.58 per cent; in the South Atlantic States 57.94 per cent, and in the South Central States 53.30 per cent.

In the group 10 or under 16 years of age the highest percentage of school attendance is shown for the Western States, where 95.46 per cent of all children in that age group were at school. The percentage was 87.41 for the North Central States; 87.22 for the North Atlantic States; 73.63 for the South Central States, and 68.18 for the South Atlantic States.

In each of the geographical divisions a small percentage of the children were at work part of the year and at school part of the year.

In the combined group 5 or under 16 years of age it will be observed that, as a rule, the percentage of school attendance is a little larger for the females, while the percentage of children at work is considerably larger for the males. As to children at home, the percentage is larger for the females, except in the South Central States. In this group the school attendance is seen to be 82.65 per cent in the Western States; 78.83 per cent in the North Central States; 77.62 per cent in the North Atlantic States; 63.31 per cent in the South Central States, and 63.17 per cent in the South Atlantic States. These percentages do not purport to show the school attendance of the entire population of the several States, but only the attendance reported for the families canvassed in the several States. The figures of the United States census show conditions quite different in the States at large. But as the data for this report were gathered almost exclusively from wage workers' families in the industrial centers, it is to be expected that these figures will differ from those of the census.

Table I–K—Summary of condition of children according to age groups, by nativity of head of family (pp. 254 to 257).—This table shows the classification of the children according to age groups and nativity of head of family. Of the children of native families at work 8 were 5 or under 10 years of age, 889 were 10 or under 16 years of age, 2,843 were 16 or under 21 years of age, and 721 were 21 years of age or over. Of the children of foreign families at work 694 were 10 or under 16 years of age, 3,022 were 16 or under 21 years of age, and 958 were 21 years of age or over.

The principal feature of this table is, of course, the school attendance. That subject is taken up in more detail in the succeeding table. Two interesting tables, however, may be drawn from this table.

The first shows for each condition of children and by general nativity of head of family, the percentage of children in each age group; the second shows for each age group and by general nativity of head of family, the percentage of children in each condition. The tables follow.

PER CENT OF CHILDREN IN EACH AGE GROUP, BY CONDITION OF CHILDREN AND BY GENERAL NATIVITY OF HEAD OF FAMILY.

Condition of children and general nativity of head of family.	Under 5 years.	5 or under 10 years.	10 or under 16 years.	16 or under 21 years.	21 years or over.	Total.
At work:						
Native		0.18	19.98	63.73	16.16	100.00
Foreign			14.85	64.65	20.50	100.00
Total		.09	17.33	64.20	18.38	100.00
At school:						
Native	0.21	44.82	50.39	4.56	.02	100.00
Foreign	.21	42.87	52.85	3.99	.08	100.00
Total	.21	43.92	51.52	4.30	.05	100.00
At work and at school:						
Native		3.68	70.53	25.79		100.00
Foreign		.89	76.79	21.43	.89	100.00
Total		2.65	72.85	24.17	.33	100.00
At home:						
Native	66.28	23.20	2.68	5.31	2.53	100.00
Foreign	65.14	21.91	2.56	6.00	4.39	100.00
Total	65.81	22.68	2.63	5.59	3.29	100.00
All children:						
Native	28.75	29.36	25.85	12.81	3.23	100.00
Foreign	24.26	27.61	27.80	15.16	5.17	100.00
Total	26.74	28.57	26.73	13.86	4.10	100.00

PER CENT OF CHILDREN IN EACH CONDITION, BY AGE GROUPS AND BY GENERAL NATIVITY OF HEAD OF FAMILY.

Age groups.	At work.			At school.			At work and at school.			At home.			Total.		
	Native.	Foreign.	Total.	Native.	Foreign.	Total.	Native.	Foreign.	Total.	Native.	Foreign.	Total.	Native.	Foreign.	Total.
Under 5 years				0.32	0.39	0.35				99.68	99.61	99.65	100.00	100.00	100.00
5 or under 10 years	0.08		0.05	65.66	70.54	67.77	0.07	0.01	0.05	34.19	29.45	32.13	100.00	100.00	100.00
10 or under 16 years	10.17	9.11	9.67	83.82	86.35	85.00	1.53	1.13	1.34	4.48	3.41	3.99	100.00	100.00	100.00
16 or under 21 years	65.61	72.76	69.11	15.33	11.97	13.68	1.13	.58	.86	17.93	14.69	16.35	100.00	100.00	100.00
21 years or over	65.91	67.70	66.92	.27	.71	.52		.07	.04	33.82	31.52	32.52	100.00	100.00	100.00
Total	13.18	17.06	14.92	43.01	45.43	44.09	.56	.41	.49	43.25	37.10	40.50	100.00	100.00	100.00

The average age of the children in the families was greater in the foreign families, both for males and females. The average age of male children in the native families was 8.60 years; in the foreign families 9.58 years. The average age of the female children was 9.23 years in the native families and 10.17 years in the foreign families. The average age of all children in the native families was 8.93 years and in the foreign families 9.88 years.

Table I-L—Per cent of children 5 or under 16 years of age at work, at school, and at home, by nativity of head of family (pp. 258 and 259).—This table consists of percentages based on Table I-K. It shows the percentages of children 5 or under 16 years of age that are in each of the several classifications—at work, at school, at work and at school, and at home—according to the nativity of the head of the family.

Of the children 5 or under 10 years of age in native families 0.08 per cent were at work; 65.66 per cent at school; 0.07 per cent at work and at school, and 34.19 per cent at home. Of the children in foreign families of the same age group none were at work; 70.54 per cent were at school, 0.01 per cent were at work and at school, and 29.45 per cent were at home. Thus it is seen that in this age group the attendance of children at school was nearly 5 per cent greater in the foreign families than in the native families.

In the next age group, 10 or under 16 years of age, 10.17 per cent of the children in native families were at work, 83.82 per cent were at school, 1.53 per cent at work and at school, and 4.48 per cent at home. Of the children of this age group in the foreign families, 9.11 per cent were at work, 86.35 per cent at school, 1.13 per cent at work and at school, and 3.41 per cent at home.

According to these figures there was a slightly larger percentage of children at work in the native families than in the foreign families, a larger percentage of children in foreign families were at school, and a larger percentage of children in the native families were at home.

The percentages for the age group, 5 or under 16 years of age, show that 4.80 per cent of the children in native families and 4.57 per cent of the children in foreign families were at work, 74.17 per cent of the children in native families and 78.47 per cent of the children in foreign families were at school, 0.75 per cent of the children in native families and 0.57 per cent of the children in foreign families were at work and at school, and 20.28 per cent of the children in native families and 16.39 per cent of the children in foreign families were at home. These figures show that in the 25,440 families covered by this investigation, the percentage of children attending school in the age group, 5 or under 16 years, was greater in the foreign families.

The figures for the several nativities in the group 5 or under 10 years of age show that the percentage of school attendance in the foreign families was greater than that in the native families in all nativities except Russia and Wales, in which families the percentage fell below that in the native families. In the group 10 or under 16 years of age 10 nativities show a greater percentage of school attendance than the United States, while 5 nativities and the group "other foreign" show a smaller percentage than the United States.

In the group 5 or under 16 years of age 12 nativities ranked above the United States in school attendance, while 3 nativities and the group "other foreign" ranked below the United States. The highest percentage of school attendance in any nativity was 89.41 per cent shown for Switzerland; the lowest, 70.95 per cent shown for Russia. The highest percentage of children at work in the group 5 or under 16 years of age was 8.46 per cent, reported for Welsh families; the lowest was 1.44 per cent, reported for Norwegian families.

Although the table shows that in the families investigated a slightly greater per cent of the children of foreign parentage were attending school than of the children of native parentage, and that the per cent of children of school age who were at work was slightly greater for the native families than for the foreign families, it should be remembered that nearly 20 per cent of the native families were in the Southern States, where school attendance, because of local conditions, is necessarily low and the proportion at work is high, while of the foreign families less than 4 per cent were in the South. The place of residence should be considered in any study of school attendance or of children at work.

The question of the condition of children, by geographical divisions, by sex, and by general nativity, is better shown in the following table:

PER CENT OF CHILDREN 5 OR UNDER 16 YEARS OF AGE AT WORK, AT SCHOOL, AND AT HOME, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Sex.	At work.	At school.	At work and at school.	At home.	All children
North Atlantic States:

Table I–M—Summary of condition of families as to dependents, boarders, etc., by States (p. 260).—This table is a summary by States and by geographical divisions of the data given in Table I–D. This table gives for each State and geographical division the number of families investigated, the number and per cent of families having dependents, boarders, lodgers, and servants, and the number of such dependents, boarders, lodgers, and servants.

Of the total 25,440 families, 1,720, or 6.76 per cent, had dependents in the family; 5,367 families, or 21.10 per cent of the whole number had boarders; 684 families, or 2.69 per cent, had lodgers, and 234 families, or 0.92 per cent, had servants.

An inspection of the figures for the different States shows that 22.56 per cent of the families in Alabama had dependents. In Louisiana 19.17 per cent of the families had dependents; in Rhode Island, 16.21 per cent had dependents, etc.

More than one-third of the families (37.82 per cent) reported from Maryland had boarders. In Georgia 32.89 per cent had boarders. No lodgers were reported by the families investigated in 5 States. The largest percentages of families having servants were in the States of Virginia, North Carolina, Georgia, and West Virginia. In 6 States the families investigated reported no servants.

The figures for the several geographical divisions show that 15.07 per cent of the families in the South Central States contained dependents. In the South Atlantic States 10.49 per cent of the families had dependents. The percentages were 6.08 per cent for the North Central States, 6.05 per cent for the North Atlantic States, and 2.88 per cent for the Western States.

Boarders were reported in 26.86 per cent of the families in the South Atlantic States; in 22.44 per cent of the families in the South Central States; in 21.40 per cent of the families in the North Atlantic States; in 19.51 per cent of the families in the North Central States, and in 13.50 per cent of the families in the Western States.

But a small proportion of the families in any division had lodgers, the range being from 1.72 per cent in the South Central States to 3.37 per cent in the North Central States.

In the South Atlantic States 4.65 per cent of the families had servants, but in each of the other divisions less than 1 per cent of the families had servants.

Table I–N—Summary of condition of families as to dependents, boarders, etc., by nativity of head of family (p. 261).—This table is a summary of the conditions of the families as to dependents, boarders, etc., by nativity of the head of the family. It shows that of the 15,161 native families, 1,157, or 7.63 per cent, had dependents; 3,030, or 19.99 per cent, had boarders; 339, or 2.24 per cent, had lodgers, and 180, or 1.19 per cent, had servants; and that of the 10,279 foreign families, 563, or 5.48 per cent, had dependents; 2,337, or 22.74 per cent, had boarders; 345, or 3.36 per cent, had lodgers, and 54, or 0.53 per cent, had servants.

The French nativity shows a larger percentage of families having dependents than any other nativity, namely, 9.30 per cent.

About one-fourth of the Canadian, English, French, Irish, Dutch, and Welsh families had boarders. Less than 1 per cent of all families had servants. The percentage was more than twice as large, however, for native families as for foreign families.

In connection with the number of families that include persons of these several classes, the number of persons in each class is also shown.

TABLE II.—OCCUPATION, EARNINGS, AND NONEMPLOYMENT OF HEAD OF FAMILY.

Table II–A—Heads of families in each specified industry, by States (pp. 262 and 263).—This table is the first of a series relating to the occupation, earnings, and nonemployment of the heads of families. The reader should note that this series of tables does not include the few heads of families who for some cause were idle the entire year, nor does it include the heads of families who were invalids. It includes the 24,402 heads of families, that is to say, husbands, who were employed during the whole or a part of the year, and who, as shown in Table I–F, constituted 99.28 per cent of all heads of families.

In this table, the industries in which the heads of families were employed are shown by States and by geographical divisions. The totals show that 130 heads of families were engaged in agriculture, 2,010 in domestic and personal service, 8 in fisheries, etc.

This investigation was made in the leading industrial centers of the several States, hence the small number of heads of families reported for agriculture and for fisheries. No attempt was made to go into the farming sections to secure schedules from farm laborers or to visit fishing stations to secure schedules from fishermen. The agents of the Bureau, while at work in the localities to which they had been assigned, chanced to find a few families whose heads were engaged in these industries, and secured schedules for them. In general the facts are representative of the industrial portion of the country as a whole and of the several States canvassed. South Carolina is an exception, as the number of reports from farm laborers is unduly large and the number secured from employees in the textile industry is not large enough to correspond with the importance of this industry in that State.

The principal industries represented are: Domestic and personal service; hand trades, which include bricklayers, carpenters, painters, etc.; the iron and steel industry; lumber and its remanufactures; the textile industries; the manufacture of vehicles; trade, and transportation.

The heads of families in each industry in each geographical division are shown in the following table:

HEADS OF FAMILIES EMPLOYED IN EACH INDUSTRY, BY GEOGRAPHICAL DIVISIONS.

Industry.	North Atlantic States.	South Atlantic States.	North Central States.	South Central States.	Western States.	Total.
Agriculture	51	43	33	1	2	130
Domestic and personal service	1,199	152	488	76	95	2,010
Fisheries	7				1	8
Manufactures:						
Chemical and allied products	98	15	43	7		163
Clay, glass, and stone products	260	29	179	15	3	486
Food and kindred products	322	27	344	32	15	740
Hand trades	1,753	320	922	143	121	3,259
Iron and steel and their products	1,745	270	998	170	62	3,245

HEADS OF FAMILIES EMPLOYED IN EACH INDUSTRY, BY GEOGRAPHICAL DIVISIONS—Concluded.

Industry.	North Atlantic States.	South Atlantic States.	North Central States.	South Central States.	Western States.	Total.
Manufactures—concluded.						
Leather and its finished products	442	21	144	24	9	640
Light and power	211	21	68	10	3	313
Liquors and beverages	130	9	147	13	8	307
Lumber and its remanufactures	336	60	600	45	30	1,071
Metals and metal products other than iron and steel	327	28	111	14	6	486
Paper and printing	286	29	154	12	10	491
Shipbuilding	139	24	42	1	7	213
Textiles	1,094	251	49	84	4	1,482
Tobacco	134	50	71	24		279
Vehicles for land transportation	368	137	515	62	53	1,135
Miscellaneous	885	87	475	64	20	1,531
Mining	471	81	66	52	88	758
Professional	103	12	49	6	9	179
Trade	1,300	114	688	60	92	2,254
Transportation	1,557	270	980	220	195	3,222
Total	13,218	2,050	7,166	1,135	833	24,402

Table II–B—Heads of families in each group of classified earnings, by industries and occupations (pp. 264 to 282).—This table shows, by industries, the occupations in which the heads of families were engaged, and their classified earnings during the year. Under each industry a number of occupations are shown. As many occupations were represented by one person only, it was not deemed advisable to take the space necessary to show all such in detail; therefore they have been grouped under the term "other occupations."

By reference to the first line in the table, on page 264, it is seen that 100 heads of families followed the occupation of farm laborer, and of this number 2 earned during the year under $100, 39 earned $100 or under $200, 17 earned $200 or under $300, etc. The reader is cautioned not to confuse the year's earnings here shown with the rate of wages that these persons may have received. A man working at a low rate of wages earns a small amount even though he loses no time during the year, while another man, commanding a high rate of wages when at work, may earn during the year even less than the first, because he is idle a considerable part of the time. Further explanation of this table is unnecessary.

Table II–C—Per cent of heads of families in each group of classified earnings, in occupations embracing 100 or more persons (p. 283.)—In this table are presented several of the leading occupations which have been selected for more extended study. The table shows, for occupations which embrace 100 or more persons, the per cent of heads of families whose year's earnings fall within the several groups of classified earnings. In this table the occupation has been made the primary feature, and the industry the secondary, for the purpose of bringing together from the several industries the persons engaged in the same occupation.

The first occupation shown in the table is that of baker, in food and kindred products. Table II-B shows 156 heads of families engaged in this occupation. The table under consideration shows that 1.28 per cent of these bakers earned during the year $100 or under $200; a like per cent earned $200 or under $300; 6.41 per cent earned $300 or under $400, etc. A little more than one-half the total number earned $600 or under $800. Of the barbers, 1.49 per cent earned under $100 during the year, and 0.75 per cent earned $1,000 or over; the greater number, however, earned between $500 and $800.

Table II-D—Summary of heads of families in each group of classified earnings, by industries (*p. 284*).—This is a summary of Table II-B, by industries. Of the total 24,402 heads of families included in this table, 130 were engaged in agriculture, 2,010 in domestic and personal service, 8 in fisheries, etc. Of the number engaged in agriculture, 2 earned under $100 during the year, 40 earned $100 or under $200, 17 earned $200 or under $300, etc. The totals show that 4,369 heads of families earned $500 or under $600, 4,359 earned $600 or under $700, 4,113 earned $700 or under $800, 4,096 earned $400 or under $500, making 16,937 heads of families, or more than two-thirds of the total number, earning from $400 to $800 per year.

Table II-E—Per cent of heads of families in each group of classified earnings, by industries (*p. 285*).—This table consists of percentages based on the table immediately preceding. From the totals it is seen that 17.90 per cent of the total of 24,402 heads of families earned $500 or under $600, 17.86 per cent $600 or under $700, 16.85 per cent $700 or under $800, 16.79 per cent $400 or under $500, and 8.37 per cent $300 or under $400.

In the industries iron and steel, leather, light and power, liquors, metals, paper and printing, vehicles, and professional the highest percentages are found under the group $700 or under $800. In the industries domestic and personal service, hand trades, shipbuilding, and transportation the highest percentages are found under the group $600 or under $700. In the industries clay, etc., food, etc., and trade, the highest percentages are found under the group $500 or under $600. In the industries chemicals, etc., lumber, textiles, tobacco, miscellaneous manufactures, and mining the highest percentages are found under the group $400 or under $500.

Twenty-five per cent of the heads of families engaged in fisheries earned $400 or under $500, and a like proportion earned $500 or under $600. The highest percentage of persons in any group under agriculture is in the class of $100 or under $200.

Table II-F—Heads of families idle each specified number of weeks, by States (*pp. 286 and 287*).—This table shows, by States and by geographical divisions, the number of heads of families idle each specified

number of weeks. By reference to the first line in the table it is seen that of the 287 heads of families in Alabama reported as having been employed during the year, 14 were not idle during any portion of the time; 18 were idle 1 week; 25, 2 weeks, etc. The number of heads of families idle during some part of the year was 273. The average period of idleness for the 273 heads of families was 9.85 weeks. The highest average period of idleness in any State was 12.37 weeks, reported for Louisiana, and the lowest average period, 5.78 weeks, reported for Minnesota.

The average period of idleness of the persons who were idle in the several geographical divisions was as follows: In the North Atlantic States, 9.59 weeks; in the South Atlantic States, 9.01 weeks; in the North Central States, 8.83 weeks; in the South Central States, 9.22 weeks; and in the Western States, 11.33 weeks.

The following table shows, by States and by geographical divisions, the per cent of the heads of families reported as at work who were not idle during the year and the per cent who were idle during some portion of the year:

PER CENT OF HEADS OF FAMILIES NOT IDLE DURING THE YEAR, AND PER CENT IDLE DURING SOME PORTION OF THE YEAR, BY STATES.

State.	Per cent of heads of families—		State.	Per cent of heads of families—	
	Not idle.	Idle.		Not idle.	Idle.
Alabama	4.88	95.12	New York	43.82	56.18
California	70.93	29.07	North Carolina	64.25	35.75
Colorado	55.79	44.21	Ohio	63.21	36.79
Connecticut	41.56	58.44	Pennsylvania	42.69	57.31
Delaware	48.42	51.58	Rhode Island	33.48	66.52
District of Columbia	51.00	49.00	South Carolina	26.02	73.98
Georgia	58.43	41.57	Tennessee	18.95	81.05
Illinois	53.24	46.76	Texas	46.74	53.26
Indiana	31.62	68.38	Virginia	62.08	37.92
Iowa	48.36	51.64	Washington	78.31	21.69
Kansas	74.61	25.39	West Virginia	28.28	71.72
Kentucky	39.46	60.54	Wisconsin	37.81	62.19
Louisiana	17.78	82.22			
Maine	58.96	41.04	Total	50.19	49.81
Maryland	43.77	56.23			
Massachusetts	75.91	24.09	North Atlantic States	50.70	49.30
Michigan	35.71	64.29	South Atlantic States	48.29	51.71
Minnesota	41.06	58.94	North Central States	51.58	48.42
Missouri	66.54	33.46	South Central States	25.02	74.98
New Hampshire	67.56	32.44	Western States	69.15	30.85
New Jersey	50.51	49.49			

By reference to the above table it is seen that the largest proportion of heads of families not idle during any portion of the year was found in Washington, it being 78.31 per cent, while the smallest proportion not idle during some portion of the year was found in Alabama, it being 4.88 per cent.

The following table shows by geographical divisions the per cent of heads of families idle at some time during the year, the average weeks idle based on the number of heads of families idle, and the average weeks idle based on the total heads of families.

PER CENT OF HEADS OF FAMILIES IDLE AND AVERAGE WEEKS IDLE, BY GEOGRAPHICAL DIVISIONS.

Geographical division.	Per cent idle.	Average weeks idle based on heads of families idle.	Average weeks idle based on total heads of families.
North Atlantic States	49.30	9.59	4.73
South Atlantic States	51.71	9.01	4.66
North Central States	48.42	8.83	4.28
South Central States	74.98	9.22	6.91
Western States	30.85	11.33	3.50
Total	49.81	9.43	4.70

Table II-G—Heads of families idle each specified number of weeks, by nativity (pp. 288 and 289).—The extent of the nonemployment of the heads of families, according to their nativity, is shown in this table. The total shows that 24,402 heads of families are included in the table. Of this number 12,248, or 50.19 per cent, were not idle during the year; 708 were unemployed 1 week, 1,471 were unemployed 2 weeks, etc.

The number of heads of families who were idle some part of the year was 12,154, or 49.81 per cent of the total number of heads of families. These 12,154 persons were idle an average of 9.43 weeks. If the aggregate weeks idle were apportioned among the 24,402 heads of families the average duration of idleness per individual would be 4.70 weeks.

Of the 14,590 heads of native families 7,573, or 51.91 per cent, were not idle during the year, and of the 9,812 heads of foreign families 4,675, or 47.65 per cent, were not idle during the year. The average period of idleness of the 7,017 heads of native families who were idle was 9 weeks, while that of the 5,137 heads of foreign families who were idle was 10.04 weeks. According to these figures there was a greater proportion of the heads of foreign families idle than of native, and also a greater duration of idleness for those who were idle.

The following table shows by nativity, the per cent of heads of families reported as at work who were not idle during the year, and the per cent who were idle during some portion of the year:

PER CENT OF HEADS OF FAMILIES NOT IDLE DURING THE YEAR, AND PER CENT IDLE DURING SOME PORTION OF THE YEAR, BY NATIVITY.

Nativity.	Per cent of heads of families—		Nativity.	Per cent of heads of families—	
	Not idle.	Idle.		Not idle.	Idle.
United States	51.91	48.09	Russia	33.10	66.90
			Scotland	49.38	50.62
Austria-Hungary	42.34	57.66	Sweden	57.72	42.28
Canada	60.22	39.78	Switzerland	31.48	68.52
Denmark	50.51	49.49	Wales	35.04	64.96
England	48.90	51.10	Other foreign	46.79	53.21
France	41.67	58.33			
Germany	45.50	54.50	Total foreign	47.65	52.35
Ireland	48.59	51.41			
Italy	34.40	65.60	Total United States and foreign	50.19	49.81
Netherlands	31.73	68.27			
Norway	45.39	54.61			

From the above table it is seen that the largest proportion of heads of families not idle during the year was found among those born in Canada, it being 60.22 per cent, while the smallest proportion not idle during the year was found among those born in Switzerland, it being 31.48 per cent.

The table which follows shows by nativity the per cent of heads of families idle at some time during the year, the average weeks idle based on the number of heads of families idle, and the average weeks idle based on total heads of families:

PER CENT OF HEADS OF FAMILIES IDLE, AND AVERAGE WEEKS IDLE, BY NATIVITY.

Nativity.	Per cent idle.	Average weeks idle based on heads of families idle.	Average weeks idle based on total heads of families.
United States	48.09	9.00	4.33
Austria-Hungary	57.66	9.05	5.22
Canada	39.78	9.50	3.78
Denmark	49.49	7.94	3.93
England	51.10	10.42	5.33
France	58.33	11.94	6.97
Germany	54.50	9.45	5.15
Ireland	51.41	10.87	5.59
Italy	65.60	10.71	7.03
Netherlands	68.27	8.29	5.66
Norway	54.61	8.29	4.53
Russia	66.90	11.22	7.51
Scotland	50.62	10.98	5.56
Sweden	42.28	8.95	3.78
Switzerland	68.52	7.66	5.25
Wales	64.96	10.28	6.68
Other foreign	53.21	8.74	4.65
Total foreign	52.35	10.04	5.26
Total United States and foreign	49.81	9.43	4.70

Table II–II—Heads of families idle each specified number of weeks, by causes (pp. 290 and 291).—In this table is shown the number of those heads of families reported at work who were unemployed during some portion of the year, by causes and duration of idleness. The chief cause of nonemployment was inability to get work. Of the 12,154 heads of families idle, 4,046, or 33.29 per cent, were idle from this cause alone, the average period of idleness from this cause being 10.90 weeks. The next chief cause of nonemployment was sickness, from which cause 2,739 heads of families were idle for an average of 7.71 weeks.

Slack work caused the idleness of 1,586 heads of families. "Slack work" is distinguished from "unable to get work" in that when idle from slack work in the regular place of employment the employee makes no effort to get work elsewhere, while "unable to get work" includes the employee who does not wait for work in his regular place of employment but seeks for it wherever it may be found. The latter cause includes the man who seeks to get work at his regular trade and also the man who is willing to do, but unable to secure, any kind of work.

Strikes caused the idleness of 251 heads of families, the average period of idleness from this cause being 9.65 weeks.

Often two or more causes for the idleness are given. When more than two causes were reported, the two producing the greatest period of idleness have been given in the table.

Table II–I—Per cent of heads of families idle from each specified cause, in occupations embracing 100 or more persons (pp. 292 and 293).—This table shows the per cent of heads of families idle in the more important occupations from the several causes. The occupations given in this table are the same as those given in Table II–C.

The line for bakers in the table shows that of those heads of families in this occupation who were idle some part of the year 3.77 per cent were idle because of slack work, 1.89 per cent because of strike, 9.43 per cent because of vacation, 26.41 per cent because of sickness, 49.06 per cent because of inability to get work, 3.77 per cent because of sickness and inability to get work, 1.89 per cent because of sickness and some other cause enumerated in columns numbered 1 to 10, 1.89 per cent because of inability to get work and some other cause from 1 to 10, and 1.89 per cent from some combination of causes 1 to 10.

The following table shows for each of the leading causes the per cent of heads of families idle based on total heads of families, the per cent idle based on total idle, and average weeks idle. These causes together constitute 93 per cent of all cases of idleness.

PER CENT OF HEADS OF FAMILIES IDLE AND AVERAGE WEEKS IDLE, BY PRINCIPAL CAUSES.

Cause of idleness.	Per cent idle based on total heads of families.	Per cent idle based on heads of families idle.	Average weeks idle.
Accident	0.83	1.66	8.98
Bad weather	1.12	2.25	9.32
Establishment closed	2.14	4.30	8.58
Sickness	11.22	22.54	7.71
Sickness and establishment closed	.48	.95	11.91
Sickness and slack work	.83	1.67	10.33
Sickness and unable to get work	1.84	3.70	14.15
Sickness and vacation	.55	1.11	5.32
Slack work	6.50	13.05	9.79
Strike	1.03	2.07	9.65
Unable to get work	16.58	33.29	10.90
Vacation	3.21	6.45	2.61

Table II–J—Heads of families idle from each specified cause, by industries (pp. 294 and 295).—This table summarizes, by industries, the causes of nonemployment of the 12,154 heads of families who were idle some part of the year. From an inspection of the causes of nonemployment shown for the several industries it is seen that "unable to get work" was the principal cause of idleness in all industries except chemicals, etc., iron and steel, light and power, liquors, paper and printing, vehicles, and transportation, in which industries "sickness" was the leading cause.

Table II–K—Per cent of heads of families idle from each specified cause, by industries (pp. 296 and 297).—This table consists of percentages based on Table II–J. By reference to the totals it is seen that accident caused 1.66 per cent of the idleness, bad weather 2.25 per cent, drunkenness 0.26 per cent, etc. It may be well to remark that it is quite probable that drunkenness in some cases was reported as "sickness" by the forbearing wife when giving the data for the schedule. An inspection of the figures under the several causes in the different industries, shows that under "accident" the highest per cent is found in transportation. Several industries show no idleness from this cause. Under "bad weather" the highest per cent is found in fisheries. The highest per cent under "strikes" is found in iron and steel, the highest under "sickness" in light and power, and the highest under "unable to get work" in agriculture.

TABLE III.—INCOME AND EXPENDITURE OF FAMILY.

Table III–A—Families having an income from various sources, for each State, by nativity of head of family (pp. 298 to 308).—The source of the income of the family, by the State of residence and by nativity of head of family, is shown in this table. The first two columns of the table give the number of families and their average size, which facts are reproduced as having an important bearing on both the income and the expenditure of the family. On page 305, which gives the data for the State of New York, it is found that 4,559 families in that State are covered by the investigation. Of the 2,236 native families, 2,116, or 94.63 per cent, had an income from the occupation of the husband; 304, or 13.60 per cent, from that of the wife; 452, or 20.21 per cent, from that of the children; 443, or 19.81 per cent, from boarders and lodgers, and 357, or 15.97 per cent, from other sources. Of the 2,323 families with heads of foreign nativity, 2,154, or 92.72 per cent, had an income from the occupation of the husband; 371, or 15.97 per cent, from that of the wife; 703, or 30.26 per cent, from that of the children; 481, or 20.71 per cent, from boarders and lodgers, and 374, or 16.10 per cent, from other sources.

A comparison of native and foreign families shows that a slightly larger per cent of the native families have an income from the occupation of the husband, while a smaller per cent of native families have an income from the other specified sources, and in the case of income from occupation of children this difference is quite large.

In like manner comparison may be made between the families of the various foreign nativities.

Table III–B—Families having an expenditure for various purposes, for each State, by nativity of head of family (pp. 309 to 319).—This table reports the number of families having expenditures for housing,

fuel, lighting, clothing, food, and other purposes. The first line of the section, relating to the State of New York, on page 315, shows that of the 2,236 native families investigated in New York, 2,020 rented the houses they occupied and that 216 owned the houses they occupied. Of the 216 families owning their homes, 130 owned them free of incumbrance and 86 with incumbrance. Forty-nine of the 86 families owning incumbered homes made payments on the principal during the year and 83 made payments on the interest. All of the 2,236 families had expenditures for fuel, lighting, clothing, food, and other purposes.

In like manner the facts are given for the families of each foreign nativity and for all foreign nativities combined, as well as for native and foreign families combined.

Table III–C—Income and expenditure per family, for each State, by nativity of head of family (pp. 320 to 341).—This is one of the most important tables of the report. The first line for New York, on pages 332 and 333, is taken for illustration as in the explanation of the preceding tables. The items of income and expenditure represent averages for the number of families only which are shown in Tables III–A and III–B to have had the kind of income or expenditure specified in this table. For instance, Table III–A shows that 2,116 native families, or 94.63 per cent of all families, had an income from the occupation of the husband. This table shows an average income of $648.25 from those 2,116 husbands. The 304 wives which are shown in Table III–A to have contributed toward the support of the family earned an average of $158.04. The average income from children, in the 452 families having an income from children, was $313.69. The 443 families having an income from boarders and lodgers had an average income of $240.25 from that source. The average income from other sources, in the 357 families having such income, was $67.18. The total income per family in the 2,236 families was $756.68. The total income per family, it should be noted, is not a total of the averages shown in the preceding columns, because the averages for the items are based upon those families only which reported an income from the specified source, while the total income per family is based upon all families, every family of course having some income.

The average expenditure for rent paid by the 2,020 families, which are shown in Table III–B to have rented houses, was $127.18. In 12 of the families owning houses and having an expenditure on account of mortgage incumbrance the principal and interest payments were combined in such a way that the informant could not separate the two items. If the principal and interest paid by these 12 families is omitted, the table shows an average principal payment of $109.54 by 37 families and an average interest payment of $49.51 by 71 families which owned their homes incumbered. The average expenditure for fuel in the 2,236 families was $34.68; for lighting, $8.32; for clothing,

$100.87; for food, $322.07, and for all other purposes $140.93. The total expenditure per family in the 2,236 families was $726.07.

The average income reported by the 2,236 families exceeded their average expenditure by $30.61. Of the 2,236 families, 943 reported an average surplus of $105.64 and 464 an average deficit of $67.17. The remaining 829 families reported their entire income spent and that they came out even at the end of the year.

These facts in regard to the income and expenditure of the families with native-born heads may be compared with those for each foreign nativity and with those for all foreign combined. A comparison with the foreign families as a whole shows that in the foreign families where the husband was at work the average income from his occupation was $618.10 against $648.25 in the native families. Of the foreign families, taking account only of those represented by 12 or more families, the largest average incomes from husband were $708.49 in Scotch families and $684.42 in Norwegian families, and the smallest $548 in Italian families and $564.84 in French families.

A comparison of the income from occupation of wife, in families having wives at work, shows an average for the foreign families, as a whole, of $150.40, and for the native families $158.04. The largest averages for any foreign nativities reporting 12 or more families were $210.50 for the Swiss and $198.40 for the Danish. In none of the 24 Norwegian families did the wife work to help support the family.

The average income from the occupation of children who contributed to the family purse, in those families in which children were at work, was for foreign families $363.84 against $313.69 for native families. The largest averages for any foreign nativities represented by 12 or more families were $505.20 for the Swiss and $485 for the French.

The average income from boarders and lodgers, in families reporting such income, was for foreign families $266.85 and for native families $240.25. The largest averages for any foreign nativities represented by 12 or more families were $392.68 for the Scotch and $366.33 for the Swiss.

A comparison of the total income per family, which of course is the average for the total number of families in each case, shows that the average for the foreign families was $773.01 against $756.68 for the native families. It is thus seen that the average for the foreign families was $16.33 larger than that for the native families, although, as has been shown above, the average income of the native husbands was $30.15 in excess of that of foreign. The largest average for any foreign nativity represented by 12 or more families was $880.47 for the Scotch.

The items of expenditure may be compared in like manner. In the foreign families the total expenditure per family was $744.16, while in the native families it was $726.07. The average income per family exceeded the average expenditure by $28.85 for foreign and by $30.61 for

native families. The average income exceeded the average expenditure by $103.10 in 12 Welsh families and by $50.56 in 102 Italian families. The number of families having a surplus and those having a deficit and the average amount of surplus or deficit are given in the table.

The figures for each of the other 32 States covered by the investigation are given in the table, and a study of them may be made in like manner.

Table III-D—Families renting and owning homes, size of home, and cost of rent, for each State, by nativity of head of family (pp. 342 to 361).—This table does not include all families from which schedules were obtained. Where a family keeps boarders or lodgers a statement of the number of rooms in the house does not show the condition of the family proper as to house room. As a rule, regular boarders and lodgers have more commodious accommodations than the immediate members of the family with which they live. Relatives and children, on the other hand, who are boarding with the family are more likely to share equally with the other members in the accommodations of the household. Therefore, all families having boarders or lodgers, other than relatives or children, are excluded from this table. A few families which reported members lodging outside of the home were also excluded from this table.

In Table III-A, 2,236 native families are shown for the State of New York. This table includes for that State (pp. 354 and 355) only 2,102 of the 2,236 native families. Of these 2,102 families, 1,918 rented the houses they occupied and 184 owned their homes. The average size of the families in rented houses was 4.53 persons; the average number of rooms per family was 4.78, and per individual 1.05. The average cost of rent for the 1,918 families was $125.75 per year; the cost per individual, $27.73, and the cost per room, $26.30. The average size of the families owning homes was 4.72 persons; the average number of rooms per family was 7.03, and the average number per individual 1.49.

A combination of the data for the families renting and the data for the families owning the homes they occupied, shows that the average size of the 2,102 native families was 4.55 persons, and that there was an average of 4.98 rooms per family and 1.09 rooms per individual.

Figures covering the same facts are given for the families of each foreign nativity and for all the foreign families combined, and comparisons can be easily made.

Table III-E—Summary of families having an income from various sources, by States (p. 362).—This table is a summary, by States and geographical divisions, of the sources of income shown in detail in Table III-A. In the 25,440 families covered by this investigation the labor of the husband contributed income in 24,402 families, or 95.92 per cent of the whole number; the labor of the wife contributed income

in 2,173 families, or 8.54 per cent of the whole number; and the labor of children contributed income in 5,644 families, or 22.19 per cent of the whole number. Receipts from boarders and lodgers added to the family income in 5,918 families, or 23.26 per cent of the whole number, while 3,651 families, or 14.35 per cent of the whole number, had income from sources other than those named.

A comparison of the geographical divisions shows that the percentage of families having income from the wife was largest in the Southern States and smallest in the Western States. The labor of the wife contributed income in 13.91 per cent of the families in the South Atlantic States; in 11.79 per cent of the families in the South Central States; in 9.06 per cent of the families in the North Atlantic States; in 6.08 per cent of the families in the North Central States, and in 3.32 per cent of the families in the Western States. The labor of the children contributed income in 28.59 per cent of the families in the South Atlantic States; in 24.24 per cent of the families in the South Central States; in 21.92 per cent of the families in the North Central States; in 21.64 per cent of the families in the North Atlantic States, and in 14.27 per cent of the families in the Western States. Boarders and lodgers were a source of revenue in 28.41 per cent of the families in the South Atlantic States; in 23.91 per cent of the families in the South Central States; in 23.46 per cent of the families in the North Atlantic States; in 22.14 per cent of the families in the North Central States, and in 16.04 per cent of the families in the Western States.

From Table I–F it is seen that nearly all husbands who were not invalids were at work, hence the number of families having income from the husband corresponds very nearly with the number of families having husbands. The percentage of families having income from the wife varied from 35.50 per cent in South Carolina to none in Colorado. A little more than one-half of the families in Georgia had income from children, while the smallest percentage of families having such income was 4.08 in Kansas. In the State of Washington 46.50 per cent of the families had income from boarders and lodgers, while in South Carolina only 2.50 per cent of the families had income from that source. In Louisiana 41.45 per cent of the families reported income from other sources. In New Hampshire only 2.01 per cent of the families had income from other sources.

Table III–F—Summary of families having an income from various sources, by nativity of head of family (p. 363).—The sources of income summarized by States in the preceding table are here summarized by nativity of head of family. The average size of the 15,161 native families is shown to be 4.67 persons, and that of the 10,279 families of foreign nativity to be 5.18 persons.

The husband contributed to the family income in 96.23 per cent of the native families and in 95.46 per cent of the foreign families; the wife contributed to the family income in 8.84 per cent of the native

families and in 8.10 per cent of the foreign families; and children contributed to the family income in 18.65 per cent of the native families and in 27.40 per cent of the foreign families.

Income from boarders and lodgers was reported in 21.81 per cent of the native families and in 25.40 per cent of the foreign families. Income from other sources was reported in 14.08 per cent of the native families and in 14.75 per cent of the foreign families.

Considered by nativities, this table shows that the largest proportion of families having an income from the wife was 13.27 per cent in the group "other foreign," while the largest proportion of families having an income from children was 35.29 per cent in the Welsh nativity. The largest proportion of families having an income from boarders and lodgers was 29.84 per cent, reported for those of Irish nativity, while the largest from other sources was 19.23 per cent, reported for families of Dutch nativity.

The following table shows these facts for native and foreign families within each geographical division:

SUMMARY OF FAMILIES HAVING AN INCOME FROM VARIOUS SOURCES, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Families.		Families with an income from—					Per cent of families with an income from—				
			Occupation of—			Boarders and lodgers.	Other sources.	Occupation of—			Boarders and lodgers.	Other sources.

Table III-G—Summary of families having an expenditure for various purposes, by States (p. 364).—This table is a summary, by States and geographical divisions, of the families having expenditures for the various purposes. The total shows that, of the whole 25,440 families investigated, 20,615 were renting the houses they occupied at the time of the investigation. These families which were renting their homes constituted 81.03 per cent of all families, while the number of families owning their homes was 4,825, or 18.97 per cent of all families.

The following table shows, for the several States and the geographical divisions, the per cent of families living in rented and in owned homes:

PER CENT OF FAMILIES OCCUPYING RENTED AND OWNED HOMES, BY STATES.

State.	Per cent of families occupying—		State.	Per cent of families occupying—	
	Rented homes.	Owned homes.		Rented homes.	Owned homes.
Alabama	78.11	21.89	New York	88.51	11.49
California	68.64	31.36	North Carolina	61.62	38.38
Colorado	56.35	43.65	Ohio	82.06	17.94
Connecticut	90.99	9.01	Pennsylvania	86.30	13.70
Delaware	83.16	16.84	Rhode Island	90.32	9.68
District of Columbia	90.00	10.00	South Carolina	85.00	15.00
Georgia	93.62	6.38	Tennessee	78.89	21.11
Illinois	74.10	25.90	Texas	79.19	20.81
Indiana	72.71	27.29	Virginia	72.02	27.98
Iowa	68.67	31.33	Washington	82.50	17.50
Kansas	65.82	34.18	West Virginia	66.83	33.17
Kentucky	73.73	26.27	Wisconsin	60.94	39.06

Massachusetts	84.79	15.21	North Atlantic States	86.66	13.34
Michigan	56.71	43.29	South Atlantic States	80.44	19.56
Minnesota	63.57	36.43	North Central States	72.44	27.56
Missouri	82.37	17.63	South Central States	79.20	20.80
New Hampshire	82.27	17.73	Western States	69.03	30.97
New Jersey	82.70	17.30			

Reference to the figures for the geographical divisions shows the largest percentage of home-owning families to be in the Western States and the smallest in the North Atlantic States. Of the States, Colorado and Michigan lead in this respect, and Georgia has the lowest per cent, with Connecticut next.

The homes owned by 2,703 families were unincumbered, while those of 2,122 families were incumbered. Expressed as percentages, 56.02 per cent of the owned homes were not incumbered and 43.98 per cent were incumbered.

The following table shows, by States and by geographical divisions, the per cent of owned homes which were free from incumbrance and the per cent upon which there was an incumbrance.

PER CENT OF OWNED HOMES FREE FROM INCUMBRANCE AND PER CENT INCUMBERED, BY STATES.

State.	Per cent of owned homes—		State.	Per cent of owned homes—	
	Not incumbered.	Incumbered.		Not incumbered.	Incumbered.
Alabama	60.00	40.00	New York	58.59	41.41
California	66.04	33.96	North Carolina	92.11	7.89

Indiana	66.10	33.90	Virginia	73.91	26.09
Iowa	50.00	50.00	Washington	83.33	16.67
Kansas	65.00	35.00	West Virginia	80.77	19.23
Kentucky	58.33	41.67	Wisconsin	29.31	70.69
Louisiana	20.00	80.00			
Maine	14.29	85.71	Total	58.58	41.42
Maryland	29.27	70.73			
Massachusetts	69.20	30.80	North Atlantic States	57.28	42.72
Michigan	70.94	29.06	South Atlantic States	50.60	49.40
Minnesota	42.31	57.69	North Central States	56.89	43.11
Missouri	88.10	11.90	South Central States	78.48	21.52
New Hampshire	75.00	25.00	Western States	93.06	6.94
New Jersey	60.71	39.29			

During the year payment on principal was made by 1,243 families, or 58.58 per cent, of the 2,122 families which had incumbrances on their homes, and payment of interest was made by 2,029 families, or 95.62 per cent of the families whose homes were incumbered.

All families had expenditures for lighting, food, and other purposes, all but 4 for fuel, and all but 3 for clothing.

Table III–H—Summary of families having an expenditure for various purposes, by nativity of head of family (p. 365).—A summary of the families having an expenditure for various purposes, by nativity of head of family, is given in this table. The number of native families renting the houses they occupied was 12,833, or 84.64 per cent of all native families. Of the 10,279 families of foreign nativity, 7,782, or 75.71 per cent, rented the houses they occupied.

The following table shows, by nativity of head of family, the per cent of families occupying owned and rented homes:

PER CENT OF FAMILIES OCCUPYING RENTED AND OWNED HOMES, BY NATIVITY OF HEAD OF FAMILY.

Nativity of head of family.	Per cent of families occupying—	
	Rented homes.	Owned homes.
United States	84.64	15.36
Austria-Hungary	82.69	17.31
Canada	84.78	15.22
Denmark	65.05	34.95
England	80.11	19.89
France	74.42	25.58

Italy	66.67	33.33			
Netherlands	29.17	70.83	Total United States and foreign	56.02	43.98

The above table studied in connection with Table III–H shows that of the 2,328 native families owning their homes, 1,375, or 59.06 per cent, owned them free of incumbrance, while 953 families, or 40.94 per cent, owned homes upon which there was an incumbrance. Of the 2,497 foreign families owning their homes, 1,328, or 53.18 per cent, owned them free of incumbrance, while 1,169, or 46.82 per cent, owned homes upon which there was an incumbrance.

The following table shows, by nativity of head of family, what per cent of the families whose homes were incumbered made payments on the principal and what per cent did not pay on the principal during the schedule year:

PER CENT OF FAMILIES OWNING HOMES INCUMBERED, PAYING AND NOT PAYING ON PRINCIPAL DURING THE YEAR, BY NATIVITY OF HEAD OF FAMILY.

Germany	46.88	53.12			
Ireland	51.96	48.04	Total foreign	53.12	46.88
Italy	30.00	70.00			
Netherlands	79.41	20.59	Total United States and foreign	58.58	41.42

Payments on principal were made by 622, or 65.27 per cent of the 953 native families having homes incumbered, while interest payments were made by 887, or 93.07 per cent of the 953 families. Of the 1,169 foreign families which owned incumbered homes, 621, or 53.12 per cent, paid something on the principal, and 1,142, or 97.69 per cent, made interest payments during the schedule year.

The following table shows the number and per cent of families owning homes and the number and per cent of homes that were owned free from incumbrance, for native and foreign families within each geographical division:

NUMBER AND PER CENT OF FAMILIES OWNING HOMES AND NUMBER AND PER CENT OF OWNED HOMES FREE FROM INCUMBRANCE, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Total number of families.	Families owning homes.		Owned homes free from incumbrance.	
		Number.	Per cent.	Number.	Per cent.
North Atlantic States:					
Native	7,359	857	11.65	477	55.66

Table III–I—Summary of income and expenditure, by States (pp. 366 and 367).—The average income and expenditure of the 25,440 families, grouped by nativity of head of family for the several States in Table III–C, are here summarized by States and by geographical divisions. The items of income and expenditure shown in this table are averages for that number of families only which are shown in Tables III–E and III–G to have had the kind of income or expenditure specified in this table. Thus, the average income from husbands in the 24,402 families having income from husband was $621.12, the average income from wives in the 2,173 families having income from wives was $128.52, the average income from children in the 5,644 families having income from children was $320.63, the average income from boarders and lodgers in the 5,918 families having income from that source was $250.77, and the average income from other sources in the 3,651 families having such income was $92.49, while the total income per family for the 25,440 families was $749.50.

It is interesting to note that were the total income from each source named apportioned among the 25,440 families covered by this inquiry,

ture for this item was generally lower in the Southern States than in other sections of the country, Georgia, however, standing higher than the other States of the South. The lowest average was $15.82, in South Carolina, and the highest $42.68, in Minnesota. By geographical divisions the average expenditure per family for fuel was $34.84 in the Western States, $32.95 in the North Central States, $30.62 in the South Atlantic States, $30.51 in the North Atlantic States, and $24.04 in the South Central States.

The cost of lighting was comparatively small in all the States, averaging $7.53, and in no State averaging as much as $10. The average expenditure per family, by geographical divisions, ranged from $8.14 in the Western States to $4.97 in the South Central States.

The average cost of clothing for all families having such expenditure was $94.99, and varied from $33.87 in South Carolina to $136.37 in New Hampshire. The average expenditure was $119.66 in the Western States, $97.89 in the North Central States, $93.60 in the North Atlantic States, $88.20 in the South Central States, and $87.62 in the South Atlantic States.

The chief item of expenditure was food, and the average for all families was $312.92. The average cost of food per family varied from $156.15 in South Carolina to $357.97 in Rhode Island. In 4 States the average cost was below $250, in 11 States it was between $250 and $300, in 14 States it was between $300 and $350, and in 4 States it was above $350. The average cost per family, by geographical divisions, was nearly the same in the Western, North Central, and North Atlantic States, being $317.62 in the Western States, $316.92 in the North Central States, and $316.18 in the North Atlantic States. In the South Atlantic States it was $294.96, and in the South Central States, $280.94. The expenditure for food, as compared with the total expenditure, was 44.90 per cent in the North Atlantic States, 45.37 per cent in the South Atlantic States, 44.71 per cent in the North Central States, 43.87 per cent in the South Central States, 42.67 per cent in the Western States, and 44.75 per cent in all States.

The average expenditure per family for other purposes, considering the total families, was $145.37. By geographical divisions the average per family varied from $161.95 in the North Central States to $135.84 in the North Atlantic States.

The total expenditure per family for all purposes was $699.24. In the individual States it varied from $786.64 in the District of Columbia to $365.15 in South Carolina. In 14 States it was above $700, in 12 States between $600 and $700, in 6 States between $500 and $600, and in 1 State below $500. The Western States reported the largest average expenditure per family, as they did also the largest average income, the average expenditure in these States being $744.41. The North

Central States, while ranking third in average income, ranked second in average expenditure, the amount being $708.88. The average expenditure in the North Atlantic States was $704.16; in the South Atlantic States, $650.18, and in the South Central States, $640.44. The expenditure constituted 93.21 per cent of the income in the North Atlantic States; 94.12 per cent in the South Atlantic States; 94.31 per cent in the North Central States; 94.82 per cent in the South Central States; 84.27 per cent in the Western States, and 93.29 per cent in all States.

The average income for the year of the 25,440 families exceeded their average expenditure by $50.26. This does not take into consideration payments made during the year on the principal of mortgages upon homes, which, if distributed among all families would show an increase in average savings of about $7. In the individual States the average saving per family (not including the payments on mortgage) was largest in Washington, being $169.96. For the geographical divisions the average family income for the year in the Western States exceeded the average expenditure for the year by $138.98; in the North Atlantic States, by $51.33; in the North Central States, by $42.74; in the South Atlantic States, by $40.62; and in the South Central States, by $34.98.

A surplus at the end of the year was reported by 12,816 families or about one-half of the whole number of families. The average surplus for these families was $120.84. A deficit was reported by 4,117 families, the average deficit for these families being $65.58. Of the total there remained 8,507 families, and these reported that they came out even at the end of the year; that is, that as nearly as they could account for their income and expenditure, they had used up all they had earned or otherwise obtained during the year. This report does not pretend to show the assets and liabilities of the families at the end of the year. Probably few families would show a balance sheet exactly like that of the preceding year. Presumably many of these families went forward or backward at least a little in their assets; they most likely had more or less of furniture, clothing, fuel, and food on hand than at the close of the preceding year.

The largest percentage of families having a surplus was in the State of Washington, where 90.50 per cent reported a surplus. Except in the States of Kentucky, Maryland, and Tennessee there were more families reporting a surplus than families reporting a deficit.

The families having a surplus or deficit may be more clearly seen in the table following.

FAMILIES REPORTING A SURPLUS, A DEFICIT, OR NEITHER A SURPLUS NOR A DEFICIT, BY STATES AND BY GEOGRAPHICAL DIVISIONS.

State.	Number of families reporting—		
	A surplus.	A deficit.	Neither a surplus nor a deficit.

Table III–J—Summary of income and expenditure, by nativity of head of family (pp. 368 and 369).—This table summarizes by nativity of head of family the same facts which in the preceding table were summarized by States. The figures appearing in the grand total are the same as in the preceding table. In this table the opportunity to compare the income and expenditure of native families with that of foreign families is offered. But, as has been said before, the fact should be borne in mind that the averages for all the foreign families are in effect averages of foreign families living under the conditions prevailing in the Northern and Western States, only 3.8 per cent of the foreign families being in the Southern groups, while the averages for all the native families are modified to a much greater extent by Southern conditions, since 19.9 per cent of the native families are resident in the two Southern groups. In looking for the explanation of differences, therefore, local conditions must be considered as well as nativity. This and the preceding table need, therefore, to be studied together.

The table shows 15,161 native families and 10,279 foreign families,

the average size of the native families being 4.67 persons and of the foreign families 5.18 persons. It should be remembered that the averages shown in this table are based upon the number of families shown in Table III–F and Table III–H as having the kind of income or expenditure here specified. Hence the reader should refer constantly to those tables when studying this table.

The average income from 14,590 native-born husbands was $637.22 and that from 9,812 foreign-born husbands was $597.19, making the average income of the native husband $40.03, or 6.70 per cent, greater than that of the foreign husband. The average income from the labor of 1,340 wives in native families was $122.43, and that from the labor of 833 wives in foreign families $138.32, making the average income of the wives in the foreign families $15.89, or 12.98 per cent greater than that of the wives in the native families. In 2,828 native families the average income from children was $296.24, and in 2,816 foreign families the average income from children was $345.13. The amount received from boarders and lodgers averaged $230.21 in 3,307 native families and $276.81 in 2,611 foreign families. The average income from other sources amounted to $88.65 in 2,135 native families and to $97.89 in 1,516 foreign families. The combined income from all sources averaged $742 for the 15,161 native families and $760.57 for the 10,279 foreign families. Thus the average income of the foreign families exceeded that of the native families by $18.57.

If each nativity be taken separately, and the total income from each source be divided by all families investigated instead of by the number that actually reported an income from the sources specified, and the percentages be computed from the averages thus obtained, the result will be as follows:

PER CENT OF TOTAL INCOME FROM VARIOUS SOURCES, BY NATIVITY OF HEAD OF FAMILY.

Nativity of head of family.	Per cent of income from—					Total.
	Husband.	Wife.	Children.	Boarders and lodgers.	Other sources.

Total	79.49	1.47	9.49	7.78	1.77	100.00

The average yearly rent paid by the 12,833 native families that rented was $118.54, and by the 7,782 foreign families $118.16. The average payment on the principal of the mortgage was $155.92 for the native and $139.12 for the foreign families separately reporting such payments. The average interest payment was $52.97 for the native and $55.80 for the foreign families separately reporting interest paid.

The average cost of fuel was $30.28 for the native families and $32.21 for the foreign families. Lighting cost an average of $7.31 for the native families and $7.87 for the foreign families; clothing, $93.71 for the native families and $96.88 for the foreign families; food, $302.82 for the native families and $327.82 for the foreign families. Expenditures for other purposes averaged $147.84 for the native families and $141.73 for the foreign families. The total expenditure per family for the native families was $691.58 and for the foreign families $710.53, or $18.95 more than the expenditure for the native families.

The average income for the year in the 15,161 native families exceeded the average expenditure by $50.42; and in the 10,279 foreign

families by $50.04. Of the native families, 7,770, or 51.25 per cent, had an average surplus of $117.55, while of the foreign families 5,046, or 49.09 per cent, had an average surplus of $125.90. An average deficit of $63.24 was reported by 2,357 native families, comprising 15.55 per cent of the whole number of native families. Of the foreign families 1,760, or 17.12 per cent, reported an average deficit of $68.72. There was neither a surplus nor a deficit reported by 5,034 native families and 3,473 foreign families; that is, their expenditures were equal to their income during the year.

From a study of the figures for the several nativities it is seen that the highest average income from husbands was from those of Scotch nativity, the amount being $682.20; the lowest was $508.67, from those of Italian nativity. One wife of Dutch nativity contributed $520 to the family income. Twenty-three Italian wives contributed to the family income an average of $119.45. The highest average income from children was $445.99, reported by the families of Scotch nativity; the lowest, $221.15, reported by the families of Danish nativity. The highest average income from boarders and lodgers was $319.49 for the families of Canadian nativity; the lowest, $170.66, for the families of "other foreign" nativity. The highest average income from other sources was $139.55 for the families of Canadian nativity; the lowest, $39.35, for the families of Welsh nativity. The total income was larger for the families of 11 foreign nativities than for the native families. The largest total income per family was $857.46, reported for the families of Scotch nativity; the lowest was $611.19, reported for the families of Italian nativity.

Among families of foreign nativity the highest average expenditure for rent was $130.67, paid by the families of French nativity, while the lowest was $83.89, paid by the families of Dutch nativity. The average expenditure of native families for this item was $118.54. Average principal payments on mortgaged property ranged from $304.86 for the families of Austro-Hungarian nativity to $51.59 for the families of Dutch nativity, and interest payments from $79.45 for the families of Italian nativity to $31.20 for the families of French nativity.

The expenditure for fuel varied but little among the different nativities. The highest was $38.41 for the families of Dutch nativity, and the lowest was $27.49 for the families of Italian nativity. The cost of lighting was comparatively small for all nativities, the average ranging from $8.62 for the families of Scotch nativity to $6.75 for the families of Welsh nativity.

The highest average cost of clothing was $111.04, expended by the families of Welsh nativity, and the lowest was $68.68, expended by the families of Italian nativity. In the families of 9 of the foreign nativities the expenditure for clothing was greater than the average expenditure by the native families for that purpose.

The expenditure for food constituted 43.79 per cent of the total expenditure by native families, and 46.14 per cent of the total expenditure by foreign families. The following table shows, by nativity of head of family, the amount of the average family expenditure for food and the proportion that this was of the total expenditure per family:

AVERAGE EXPENDITURE FOR FOOD AND PER CENT OF TOTAL EXPENDITURE, BY NATIVITY OF HEAD OF FAMILY.

Nativity of head of family.	Total expenditure per family.	Average expenditure for food.		Nativity of head of family.	Total expenditure per family.	Average expenditure for food.	
		Amount.	Per cent.			Amount.	Per cent.
United States	$691.58	$302.82	43.79	Russia	$655.06	$316.78	48.35
				Scotland	782.87	339.20	43.33
Austria-Hungary	646.88	313.48	48.44	Sweden	708.32	320.14	45.20
Canada	720.51	325.70	45.20	Switzerland	716.67	314.39	43.87
Denmark	688.71	311.38	45.21	Wales	730.05	336.83	46.14
England	754.07	337.08	44.70	Other foreign	682.49	304.82	44.66
France	706.30	309.36	43.80				
Germany	702.94	324.27	46.13	Total foreign	710.53	327.82	46.14
Ireland	726.25	341.14	46.97				
Italy	566.85	271.16	47.84	Total U. S. and foreign	699.24	312.92	44.75
Netherlands	604.97	276.00	45.62				
Norway	715.80	324.50	45.33				

According to the above table the families of Irish nativity had the largest average expenditure for food, or $341.14, and the Italian families the smallest, or $271.16. The largest percentage of total expenditure made for food was 48.44 per cent by the families of Austro-Hungarian nativity, while the lowest was 43.33 per cent by the families of Scotch nativity. The largest total expenditure per family was $782.87 by the families of Scotch nativity, and the smallest was $566.85 by the families of Italian nativity.

The following table shows, by geographical divisions and general nativity of head of family, the average family expenditure for food and the per cent that this was of the total expenditure per family:

AVERAGE EXPENDITURE FOR FOOD AND PER CENT OF TOTAL EXPENDITURE, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Total expenditure per family.	Average expenditure for food.		Geographical division and general nativity of head of family.	Total expenditure per family.	Average expenditure for food.

m Not including payments made by 146 families in which principal and interest were combined.

Table III–K—Summary of families renting and owning homes, size of home, and cost of rent, by States (p. 370).—This table gives a summary by States and by geographical divisions of the data presented in Table III–D. In the explanation given for Table III–D it was stated that that table did not include all of the 25,440 families canvassed in this investigation. Families containing boarders and lodgers other than children or relatives were excluded, as were also a few families of which some of the members were reported as lodging elsewhere. The reason for the exclusion was that regular boarders or lodgers have, as a rule, more commodious quarters than the members of the family proper, and an average based on families having boarders or lodgers would show a larger room space and room cost than would correspond with these items for the family proper, as has already been explained on page 49. This table therefore includes but 23,447 families, of which number 19,090 rented the houses or rooms in which they lived and 4,357 owned the homes they occupied.

A consideration of the total for the families renting their homes shows that the average size of the families was 4.67 persons and the number of rooms per family was 4.73, making an average of 1.01 rooms per individual. The average yearly cost of rent was $116.55 per family, or $9.71 per month. The average cost of rent per individual was $24.98 and the average cost per room was $24.62. A comparison of the figures for the several States shows that, for the families renting, the largest number of rooms per family was 5.89, in Delaware, and the smallest number was 2.81, in South Carolina. The largest number of rooms per individual was 1.26, in Delaware, the smallest was 0.63, in Tennessee.

The highest average rent paid per family in any State was $149.22, in California, the lowest, $57.63, in South Carolina; the highest rent per individual was $36.99, in California, the lowest, $13.96, in Georgia; the highest rent per room was $35.03, in Missouri, the lowest, $14.78, in Michigan. The figures for the geographical divisions show that the largest number of rooms per family, 5.01, was in the North Atlantic States; the smallest, 3.63, in the South Central States. The largest number of rooms per individual was 1.16 in the Western States; the smallest, 0.72, in the South Central States. The highest average rent paid per family was $144.41, in the Western States; the lowest, $94.43, in the South Central States. The highest average rent paid per individual was $36.18, in the Western States; the lowest, $18.71, in the South Central States. The cost of rent per room ranged from $31.25 in the Western States to $20.66 in the South Atlantic States.

Of the 23,447 families included in this table, 4,357 owned their homes. The average size of the families owning their homes was

5.12 persons. The average number of rooms per family was 5.92, as against 4.73 for families in rented houses, and the average rooms per individual was 1.16 as against 1.01 in rented houses. The largest number of rooms per family in owned houses was found in Rhode Island, the smallest in Louisiana, the number being 7.91 rooms in the former State and 4.18 in the latter. The number of rooms per individual was largest in New Hampshire and smallest in Louisiana, the numbers being 1.68 and 0.68, respectively. The largest average number of rooms per family in owned houses in any of the geographical divisions was 6.55, in the North Atlantic States; the smallest number, 4.47, in the South Central States. The largest average number of rooms reported per individual was 1.30 in the North Atlantic States, and the smallest was 0.85 in the South Central States.

Reference to the total number of families in both rented and owned houses shows that the average size of the 23,447 families was 4.75. On page 362 it is seen that the average size of all the 25,440 families investigated, including those having boarders and lodgers other than members of the family, was 4.88. The largest number of rooms per family was 6.02, in Delaware; the smallest, 3.05, in South Carolina, the average number for the United States being 4.95. The largest number of rooms per individual was 1.29, in New Jersey, and the smallest was 0.65, in Tennessee. In the North Atlantic States there were 5.21 rooms per family, while in the South Central States the rooms per family were 3.80. The highest average number of rooms per individual in any group was 1.16, in the Western States; the lowest, 0.75, in the South Central States, the average for all States being 1.04 rooms.

Table III–L—Summary of families renting and owning homes, size of home, and cost of rent, by nativity of head of family (*p. 371.*)—This, like the preceding table, is a summary of Table III–D, but by the nativity of the head of the family instead of by States. This table shows the average number of rooms occupied per family and per individual, the average cost of rent per family and per individual in the families that rented the houses they occupied, etc. There are included in this table 13,991 native families and 9,456 foreign families.

The average size of the native families occupying rented houses, as shown by this table, was 4.50 persons and that of the foreign families, 4.93 persons. The average number of rooms for families living in rented houses was 4.72 for the native families and 4.75 for the foreign families. Each individual in the native families that rented had an average of 1.05 rooms, in the foreign families 0.96 rooms. The average cost of rent was $116.52 for the native and $116.59 for the foreign families that rented. The average cost of rent per individual was a little higher in the native families, being $25.87 as against $23.64 in

the foreign families. The average cost of rent per room was nearly the same for the native and foreign families, being $24.66 for the former and $24.55 for the latter.

The average size of families living in owned houses was 4.81 persons for the native families and 5.41 persons for the foreign families; the average number of rooms per family was 5.91 for the native families and 5.93 for the foreign families; and the average number of rooms per individual was 1.23 for the native families and 1.10 for the foreign families. A consideration of the figures for all families included in this table, shows that the average size of the native families was 4.55 persons and of the foreign families, 5.05 persons; the average number of rooms per family was 4.90 for the native families and 5.03 for the foreign families; and the average number of rooms per individual was 1.08 for the native families and 1 for the foreign families.

The average number of rooms for families living in rented houses varied from 3.52 for the Italian families to 5.41 for the Welsh families, and the average number per individual from 0.77 for the Italian families to 1.08 for the English and Swedish families. The average cost of rent per individual ranged from $16.91 for the Dutch families to $27.51 for the Swedish families, and the average cost per room from $16.30 for the Dutch families to $27.98 for the Italian families. In owned houses the average number of rooms per family varied from 4.71 for the Italian families to 6.72 for the Canadian families; and the average number of rooms per individual from 0.80 for the Italian families to 1.33 for the English families. A consideration of the figures for all families living in rented and owned houses shows that the average number of rooms per family varied from 3.67 for the Italian families to 5.76 for the Dutch families; and per individual from 0.77 for the Italian families to 1.13 for the English families.

The number of families and their average size, and the average number of rooms per family and per individual, for native and foreign families in each geographical division, are shown in the following table:

AVERAGE NUMBER OF ROOMS PER FAMILY AND PER INDIVIDUAL, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Families.		Average number of rooms per—	
	Total.	Average size.	Family.	Individual.
North Atlantic States:

Foreign	9,456	5.05	5.03	1.00
Total	23,447	4.75	4.95	1.04

TABLE IV.—DETAILED EXPENDITURES IN 2,567 FAMILIES.

Table IV shows in greater detail than has been given in the previous tables the cost of living for 2,567 families. The only basis of selection of these families was the ability to give the information sought in the desired detail. The families that were able to give such information respecting their income and expenditure were reported as being generally somewhat more intelligent and better educated than the average family canvassed.

The following table presents, by geographical divisions, certain comparative figures for the 2,567 families which reported in detail and the total 25,440 families canvassed. It shows the number and average size of the families, and the average income, expenditure for food, and expenditure for all purposes per family during the year covered by the investigation:

NUMBER AND AVERAGE SIZE OF ALL FAMILIES INVESTIGATED AND OF FAMILIES REPORTING EXPENDITURES IN DETAIL, AND AVERAGE PER FAMILY OF INCOME, EXPENDITURE FOR FOOD, AND TOTAL EXPENDITURE, BY GEOGRAPHICAL DIVISIONS.

Geographical division.	25,440 families.					2,567 families.				
	Families.	Average size.	Total income per family.	Expenditure for food per family.	Total expenditure per family.	Families.	Average size.	Total income per family.	Expenditure for food per family.	Total expenditure per family.
North Atlantic States	13,782	4.80	$755.49	$316.18	$704.16	1,415	5.25	$834.83	$338.10	$778.04
South Atlantic States	2,198	5.16	690.80	294.96	650.18	219	5.30	762.78	296.64	700.62
North Central States	7,340	4.98	751.62	316.92	708.88	721	5.46	842.60	321.60	785.95
South Central States	1,221	5.22	675.42	280.94	640.44	122	5.65	715.46	292.68	690.11
Western States	904	4.14	883.39	317.62	744.41	90	4.69	891.82	308.53	751.46
United States	25,440	4.88	749.50	312.92	699.24	2,567	5.31	827.19	326.90	768.54

The average income and expenditure of these 2,567 families were a little larger than the average income and expenditure of the total 25,440 families investigated. The average income of the 2,567 families included in Table IV was $827.19, and the average expenditure was $768.54, while the average income of the 25,440 families was $749.50, and the average expenditure was $699.24. The average size of these families was also a little larger than that of all the families canvassed, it being 5.31 persons as compared with an average of 4.88 for all families. When due allowance is made for the larger family, the difference in income and expenditure is small.

From the study of the expenditures in detail in these 2,567 families a fairly accurate idea may be gained of the per cent of all families having an expenditure for each purpose and the average amount of such expenditure. It is believed these families may be taken as fairly representative of the whole 25,440, and of the wage-earners of the country at large in so far as the per cent of families having an expenditure for each purpose and the average amount of such expenditure are concerned. The figures are given with detail sufficient to admit of other summaries being made by anyone who desires to give the subject further study.

The following table shows the number and average size of native, of foreign, and of all families reporting expenditures in detail in each geographical divison:

NUMBER AND AVERAGE SIZE OF FAMILIES REPORTING EXPENDITURES IN DETAIL IN EACH GEOGRAPHICAL DIVISION, BY GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division.	Native.		Foreign.		Total.	
	Families.	Average size.	Families.	Average size.	Families.	Average size.
North Atlantic States	768	4.82	647	5.77	1,415	5.25
South Atlantic States	198	5.29	21	5.33	219	5.30
North Central States	448	5.23	273	5.83	721	5.46
South Central States	107	5.48	15	6.87	122	5.65
Western States	57	4.60	33	4.85	90	4.69
Total	1,578	5.03	989	5.76	2,567	5.31

Table IV-A—Families having an expenditure for various items of food, for each State, by nativity of head of family (pp. 372 to 387).—This table shows, by nativity of head of family, the number of families in each State from which detailed statements were secured, and the number of such families that had an expenditure for each of the principal items of food. By reference to page 382, it will be seen that 244 native families are reported in this table for New York. Of this number 243 had an expenditure for fresh beef, 172 had an expenditure for salt beef, 207 had an expenditure for fresh hog products, etc. The number of foreign families of each nativity having such expenditures is shown in like manner.

Table IV-B—Per cent of families having an expenditure for various items of food, for each State, by nativity of head of family (pp. 388 to 403).—This table consists of percentages based on the figures in the preceding table. The preceding table showed that 243 native families in New York had an expenditure for fresh beef. This table shows (p. 398) that these 243 families constituted 99.59 per cent of the total 244 native families from which detailed reports were obtained in New York. The other percentages were derived in like manner.

It will be seen that even some of the most common articles of food were not used by all families. The only articles reported as used by all the 244 native families in New York were: Milk, butter, sugar, potatoes, other vegetables, and vinegar, pickles, and condiments. Those reported as used by all the 227 foreign families were: Fresh beef, eggs, milk, butter, potatoes, and other vegetables.

Table IV-C—Expenditure per family for various items of food, for each State, by nativity of head of family (pp. 404 to 419).—This table should be studied in connection with Table IV-A. Table IV-A shows 243 native families in New York having an expenditure for fresh beef. This table shows (p. 414) that the average expenditure for fresh beef in these 243 native families was $56.13. In like manner the other averages shown in this table are based on the number of families having an expenditure for the article named. The line concludes with a statement of the total expenditure per family for all food, which, of course, applies to the whole number of families. For the 244 native families the average expenditure for food, it is seen, was $343.51. From Table III-C, page 333, it appears that the 2,236 native families in New York covered by this investigation had an average expenditure of $322.07 for food. For the 244 families, it may be remarked, the amount spent for food was 43.07 per cent of the total family expenditure, while for the 2,236 families the amount spent for food was 44.36 per cent of the total expenditure.

A study of the average family expenditure for the individual articles here shown will disclose the fact that the amounts spent by families of the different nativities can not be fairly compared even where a considerable number of families are covered, because no information is here given as to the size of the family. Such information is not given in the table, because the number of families would differ with nearly every article of expenditure, all families being represented in few cases except in the column "total per family for food;" and to present such information for each article was impracticable, as the space required for so much detail would be too great. These families must be regarded simply as typical workingmen's families and studied as such, but the averages, with such small numbers as are here shown for the foreign nativities within individual States, can hardly be taken as representing average conditions within the States. The same is true of the expend-

itures for articles other than food taken up in Table IV-F. The summaries of Table IV, however, present data which are of much greater value.

Table IV-D—Families having an expenditure for various items other than food, for each State, by nativity of head of family (pp. 420 to 435).—This table and Tables IV-E and IV-F relate to expenditures for articles other than food. From Table IV-D, page 430, it appears that of the 244 native families in New York embraced within this tabulation, 218 paid rent, 7 made payment on the principal of an incumbrance on the home, 11 of those owning their homes paid interest, 244 had an expenditure for fuel, 244 for lighting, etc. The number of families of each foreign nativity having such expenditures is also shown.

Table IV-E—Per cent of families having an expenditure for various items other than food, for each State, by nativity of head of family (pp. 436 to 451).—This table consists of percentages based on the numbers shown in Table IV-D. Thus, the 218 native families in New York tabulated in the preceding table as paying rent constituted 89.34 per cent (p. 446) of the 244 native families investigated in New York. The 7 families paying principal were 2.87 per cent of the total 244 families, etc.

Table IV-F—Expenditure per family for various items other than food, for each State, by nativity of head of family (pp. 452 to 469).—This table gives the average expenditure for each of the items named in the families that had an expenditure for that item. Table IV-D reports 218 native families in New York paying rent, and this table shows (p. 462) that the average expenditure for rent in those 218 families was $130.40. Thirty-three native families had an expenditure for taxes. This table shows the average expenditure for taxes in these 33 families to have been $28.81. The other items named in the table may be read in the same manner. What has already been said in regard to a comparison of the average expenditure for the various articles of food by the families of the several nativities (p. 77) applies equally to the expenditures shown in this table and should be kept in mind by the reader.

Table IV-G—Disposition of surplus and manner of meeting deficit, for each State, by nativity of head of family (pp. 470 to 487).—When the schedules were secured from the 2,567 families which reported their expenditures in detail, information was also sought as to the disposition of surplus income and the manner of meeting the deficit when the expenditure exceeded the income. The result of this inquiry is set forth in Table IV-G and in the summaries based thereon. In a few of the States these items were not well reported.

In the table on page 480, it is seen that 471 of these 2,567 families are reported for the State of New York. The heads of 244 of

these families were born in the United States and the heads of 227 families were born in various foreign countries. Of the 244 native families 114 reported a surplus and 74 a deficit. Of the families that reported a surplus, 50 reported that they held the surplus on hand in cash, 49 had the surplus deposited in bank, 5 had invested the surplus in building associations, 7 had used the surplus to pay preexisting debts, and 3 did not report what disposition they had made of the surplus. Of the families reporting a surplus, 5 had also made payments toward the purchase of a home. Of the 74 families that reported a deficit, 26 stated that they met the deficit by obtaining credit, 16 had used former savings, 4 had borrowed money, 2 had employed other methods, and 26 failed to make a report of the method. One of the 74 families reporting a deficit had made a payment during the year on the principal of the debt outstanding against the home, which payment must be considered in the nature of a saving.

Table IV–H—Summary of families having an expenditure for various items of food, by States (*pp. 488 and 489*).—This table is a summary, by States and by geographical divisions, of the number of families having an expenditure for the various items of food named. The total shows that of the 2,567 families which gave reports in detail as to their expenditure for the principal items of food, 2,560 had an expenditure for fresh beef, 1,095 an expenditure for salt beef, etc.

Table IV–I—Summary of families having an expenditure for various items of food, by nativity of head of family (*pp. 490 and 491*).—This table is a summary, by the nativity of the head of the family, of the number of families having an expenditure for the various items of food. There were 1,578 native families that gave this detailed information. Of this number 1,572 families purchased fresh beef; 563 families, salt beef; 1,315 families, fresh hog products; 1,303 families, salt hog products, etc. A total of 989 families having foreign-born heads gave detailed information as to the food consumed. Of this number 988 used fresh beef, 532 salt beef, 843 fresh hog products, 826 salt hog products, etc. The proportion of families of the several nativities that used these several articles of food can better be studied in Table IV–K.

Table IV–J—Summary of per cent of families having an expenditure for various items of food, by States (*pp. 492 and 493*).—This table consists of percentages based on the figures in Table IV–H. From the total it is seen that 99.73 per cent of the 2,567 families had an expenditure for fresh beef, 42.66 per cent had an expenditure for salt beef, etc. No one article enumerated was purchased by all of the families. Several articles, however, were purchased by 99 per cent or more of the families—namely, fresh beef, eggs, butter, sugar, potatoes, other vegetables, and vinegar, pickles, and condiments. Less than half the families purchased salt beef; 84.07 per cent of the families purchased

fresh hog products, and 82.94 per cent purchased salt hog products. Tea was purchased by 87.30 per cent of the families, and coffee by 95.87 per cent. Bread was purchased by 78.61 per cent of the families, flour and meal by 98.40 per cent. Fruit was purchased by 97.90 per cent of the families.

An examination of the figures for the several States shows that fresh beef was purchased by every family reported for 28 States. In several States, however, no family reported the use of salt beef, and in no State did every family use it. The most general consumption of salt beef was in Massachusetts, where 97.63 per cent of the families used it. In 7 States every family used fresh hog products and in 9 States every family used salt hog products. The other facts can be followed readily by the reader.

A comparison of geographical divisions shows that every family in the Western division used fresh beef, while in the South Central division but 99.18 per cent used it, this being the lowest per cent shown for any division. Salt beef was used most largely in the North Atlantic division, where 61.84 per cent of the families used it, while in the South Central division the per cent was but 2.46. On the other hand, in the use of salt hog products the South Central division leads with 94.26 per cent, the lowest being 64.49 per cent for the North Central group. The other articles may be studied in like manner.

Table IV–K—Summary of per cent of families having an expenditure for various items of food, by nativity of head of family (*pp. 494 and 495*).—This table consists of percentages based on the figures shown in Table IV–I. It shows that more than 99 per cent of both native and foreign families had an expenditure for fresh beef. The figures differ materially for salt beef, only 35.68 per cent of the native families, as against 53.79 per cent of the foreign families, having had an expenditure for that article. This is due to some extent to the extremely low percentages in the Southern groups, as shown in the preceding table. Except for salt beef, no very great difference is seen between the percentages of native and foreign families having an expenditure for the several articles of food included in this table.

Table IV–L—Summary of expenditure per family for various items of food, by States (*pp. 496 and 497*).—This table shows, by States and geographical divisions, the average expenditure for the specified articles of food in the families having an expenditure for the several food items. Thus the average expenditure for fresh beef in 2,560 families was $50.19 per family. The average cost of salt beef to each of the 1,095 families using it was $12.33. By reference to the total cost of all food it is seen that the average cost for these 2,567 families was $326.90. This is $13.98 more than the average cost of food shown in Table III–I for the whole 25,440 families, but when due allowance

is made for the fact that the average size of the 2,567 families was 0.43 person larger than that of the 25,440 families, it is seen that the average cost of food was greater for the 25,440 families. A comparison of expenditure for food with total family expenditure shows that in the 2,567 families food required 42.54 per cent of the total family expenditure, while in the 25,440 families it required 44.75 per cent.

Comparison of average amounts expended for different articles of food as shown by this table is difficult, as the number of families entering into the average must always be taken into consideration. The total cost of all food, however, covers all families; hence direct comparison of the total cost of food, by States and by geographical divisions, can be made in this table. In order that such a comparison may be made for all families in the various geographical divisions, without regard to the number using each specified article, two tables are presented, showing cost and quantity by geographical divisions. In preparing these tables the aggregates for each item were divided by the total number of families, thus giving averages for all families investigated.

AVERAGE COST PER FAMILY OF THE VARIOUS ARTICLES OF FOOD CONSUMED, BY GEOGRAPHICAL DIVISIONS.

Article.	North Atlantic States: 1,415 families, average size 5.25.	South Atlantic States: 219 families, average size 5.30.	North Central States: 721 families, average size 5.46.	South Central States: 122 families, average size 5.65.	Western States: 90 families, average size 4.69.	United States: 2,567 families, average size 5.31.
Fresh beef	$54.27	$41.08	$46.06	$37.84	$54.13	$50.05
Salt beef	8.18	1.13	2.20	.33	.66	5.26

The following table, based upon that on page 81, shows the per cent which the average cost per family of each article of food consumed was of the total food cost per family.

PER CENT OF TOTAL EXPENDITURE FOR FOOD MADE FOR EACH OF THE PRINCIPAL ARTICLES, BY GEOGRAPHICAL DIVISIONS.

Article.	North Atlantic States: 1,415 families, average size 5.25.	South Atlantic States: 219 families, average size 5.30.	North Central States: 721 families, average size 5.46.	South Central States: 122 families, average size 5.65.	Western States: 90 families, average size 4.69.	United States: 2,567 families, average size 5.31.
Fresh beef	16.05	13.75	14.32	12.93	17.54	15.31
Salt beef	2.42	.38	.68	.11	.21	1.61
Fresh hog products	3.79	3.51	5.72	5.33	1.31	4.29
Salt hog products	3.61	8.97	3.50	9.60	3.59	4.25
Other meat	3.63	1.29	2.70	.48	1.75	2.99
Poultry	3.01	2.83	2.90	2.03	2.32	2.90
Fish	2.98	1.74	1.76	1.35	2.24	2.45
Eggs	5.45	5.21	4.74	4.51	3.57	5.14

Tea	1.87	1.47	1.31	.92	1.11	1.62
Coffee	2.87	3.54	4.01	4.17	2.61	3.26
Sugar	4.93	4.74	4.55	5.36	4.70	4.82
Molasses	.45	.67	.48	1.00	1.06	.52
Flour and meal	4.80	7.06	5.12	7.75	2.87	5.18
Bread	4.56	3.13	2.52	3.26	3.87	3.81
Rice	.57	.93	.60	1.26	.30	.63
Potatoes	4.07	3.11	4.05	3.94	3.19	3.95
Other vegetables	4.76	6.95	6.85	5.68	11.48	5.77
Fruit	4.53	5.10	5.33	3.94	13.14	5.05
Vinegar, pickles, and condiments	1.20	1.07	1.49	1.51	.48	1.26
Other food	5.30	6.41	8.28	7.22	3.76	6.24
Total	100.00	100.00	100.00	100.00	100.00	100.00

Table IV–M—Summary of expenditure per family for various items of food, by nativity of head of family (pp. 498 and 499).—This table shows the average expenditure for the several items of food in

the families having an expenditure for those items, according to nativity of head of family. Thus 1,572 native families (p. 490) had an average expenditure of $46.38 for fresh beef, and 988 foreign families had an average expenditure of $56.25 for the same article. The average expenditure by 563 native families for salt beef was $10.61, as compared with an average expenditure of $14.15 by 532 foreign families. The average cost of all food in the native families included in this table was $312.68, and in the foreign families $349.58. The highest average cost shown for any nativity in this table was $383.50 for the families of Irish nativity, while the lowest was $252.23 for the families of Swiss nativity—this latter average, however, representing only 6 families.

The above averages are in the case of individual articles based upon the number of families having an expenditure for the articles specified. In order that a general comparison may be made of average expenditures for each item by native, by foreign, and by all families, the following table was prepared. In each case the average was obtained by dividing the aggregate expenditure by the total families, including both those that consume the specified article and those that do not.

AVERAGE COST PER FAMILY OF THE VARIOUS ARTICLES OF FOOD CONSUMED, BY GENERAL NATIVITY OF HEAD OF FAMILY.

Article.	Native: 1,578 families, average size 5.03.	Foreign: 989 families, average size 5.76.	Total: 2,567 families, average size 5.31.
Fresh beef	$46.20	$56.19	$50.05
Salt beef	3.79	7.61	5.26
Fresh hog products	13.03	15.59	14.02
Salt hog products	14.58	12.87	13.89
Other meat	8.54	11.75	9.78
Poultry	9.13	10.07	9.49
Fish	6.67	10.14	8.01
Eggs	16.03	17.99	16.79
Milk	18.99	25.04	21.82
Butter	27.56	30.67	28.76
Cheese	2.33	3.08	2.62
Lard	9.71	8.78	9.35
Tea	4.62	6.37	5.30
Coffee	11.03	10.27	10.74
Sugar	14.81	17.28	15.76
Molasses	1.72	1.64	1.69
Flour and meal	15.85	18.23	16.76
Bread	11.69	13.65	12.44
Rice	1.99	2.15	2.05
Potatoes	11.84	14.67	12.93
Other vegetables	20.27	16.58	18.85
Fruit	16.98	15.80	16.52
Vinegar, pickles, and condiments	4.08	4.20	4.12
Other food	21.29	18.96	20.40
Total	312.68	349.58	326.90

Table IV–N—Summary of families having an expenditure for various items other than food, by States (pp. 500 and 501).—This table summarizes, by States and geographical divisions, the data presented in detail in Table IV–D. The total shows that of the 2,567 families embraced in this series of tables, 2,076 rented the homes they occupied; the remaining 491 families owned their homes. The number of these families owning their homes free of incumbrance is not

shown in this table. Payments on the principal of the mortgage or incumbrance on the home was made by 142 families and interest payments were made by 203 families. All of the families but one had an expenditure for fuel and all families had an expenditure for lighting. No further explanation of this table is necessary.

Table IV–O—Summary of families having an expenditure for various items other than food, by nativity of head of family (pp. 502 and 503).—This table summarizes, by nativity of head of family, the data presented in Table IV–D. Of the 1,578 native families it is seen that 1,314 paid rent, 79 made payment on the principal of the mortgage on their homes, and 105 paid interest. Of the 989 families having foreign-born heads, 762 paid rent, 63 made payment on the principal of the mortgage on their homes, and 98 paid interest.

Table IV–P—Summary of per cent of families having an expenditure for various items other than food, by States (pp. 504 and 505).—This table consists of percentages and is based upon the data presented in Table IV–N. Referring to the total, it is seen that 80.87 per cent of the families rented the houses they occupied, leaving 19.13 per cent of the families which owned their homes. Of mortgage incumbrance on homes, 5.53 per cent of all families paid on the principal and 7.91 per cent of all families paid interest. Fuel was an item of expenditure in 99.96 per cent of all families. All families had an expenditure for lighting. Clothing for the husband was an item of expenditure in 98.13 per cent of the families, for the wife in 98.71 per cent of the families, and for the children in 88.78 per cent of the families.

Taxes were paid by 34.32 per cent of the families. Insurance on property was paid by 31.40 per cent of the families and life insurance by 65.80 per cent. An expenditure incident to membership in labor organizations was reported by 36.77 per cent of the families and on account of membership in other organizations by 43.75 per cent. An expenditure for religious purposes was reported by 80.33 per cent of the families and for charity by 51.07 per cent. There was an expenditure for furniture by 84.53 per cent of the families, for books and papers by 94.74 per cent, and for amusements and vacation by 70.39 per cent. A little more than half of the families, 50.72 per cent, had an expenditure for intoxicating liquors, while 79.20 per cent had an expenditure for tobacco. About three-fourths of the families, 76.70 per cent, had an expenditure caused by sickness and death. Miscellaneous expenditures for purposes other than those enumerated were reported by 98.91 per cent of the families. The facts are shown for each State and also by geographical divisions.

Table IV–Q—Summary of per cent of families having an expenditure for various items other than food, by nativity of head of family (pp. 506 and 507).—This table is a summary, showing by nativity of head of family, the per cent of families having an expenditure for

items other than food. It shows that 83.27 per cent of the native families, as against 77.05 per cent of the foreign families, had an expenditure for rent. Payments on principal of the indebtedness on the home were made by 5.01 per cent of the native families and by 6.37 per cent of the foreign families; interest payments were made by 6.65 per cent of the native families and by 9.91 per cent of the foreign families. In the native and in the foreign families the percentages for fuel, lighting, and clothing were nearly the same. A slightly larger per cent of the foreign families paid taxes, and a still larger per cent paid property insurance. In life insurance the native families show a larger per cent. The per cent of families making payments to labor organizations was practically the same in the native and in the foreign families. As to payments to other organizations the foreign families show a larger per cent, namely, 48.74 per cent, as against 40.62 per cent of the native families. A larger per cent of the foreign families had an expenditure for religious purposes, but a larger per cent of the native families had an expenditure for charity.

There was an expenditure for furniture by 83.59 per cent of the native families and by 86.05 per cent of the foreign families. The foreign families show a larger per cent having an expenditure for books and papers. As to amusements, there is very little difference in the percentages. A marked difference is seen under intoxicating liquors, where 46.20 per cent of the native families and 57.94 per cent of the foreign families had an expenditure for that item. There is little difference in the percentages relating to tobacco. The percentage of families having an expenditure on account of sickness and death was a little larger for the native families.

The percentages relating to the several nativities can be readily analyzed by the reader.

Table IV–R—Summary of expenditure per family for various items other than food, by States (pp. 508 and 509).—This table is a summary, by States and geographical divisions, of the expenditure per family for items other than food. In studying the table, constant reference must be made to Table IV–N, which shows the number of families entering into the averages given in this table.

The average expenditure for rent by 2,076 families was $122.92. Payments on principal were made by 142 families and interest payments by 203 families, but in the case of 13 families the payments of principal and interest were combined in such a way that they could not be separated; therefore the average payment on principal is here shown for 129 families and the average interest payment for 190 families. The average payment on principal was $145.82 for the year, and the average interest payment, $53.73 for the year. The average cost of fuel was $32.24; of lighting, $8.15. Clothing for the husband cost an average of $34.38; for the wife, $26.37, and for the children, $54.15,

in the families that had an expenditure for these items. The average expenditure for taxes for the 881 families that paid taxes was $16.86 for the year. The average payment per family on property insurance was $4.89, and on life insurance, $29.55. The average payment to labor organizations was $10.52, and to other organizations $11.84. The average payment for religious purposes was $9.49 by 2,062 families and that for charity was $4.68 by 1,311 families. The average expenditure for furniture was $31.13 by 2,170 families; for books and papers, $8.82 by 2,432 families; for amusements, $17.44 by 1,807 families; for intoxicating liquors, $24.53 by 1,302 families; for tobacco, $13.80 by 2,033 families, and the expenditures because of sickness and death, $26.78 by 1,969 families.

A study of the figures for the several States shows that the highest average rent paid was $162.96, in the District of Columbia; the lowest was $54.38, in South Carolina. The highest average paid for fuel was $43.61, in Michigan; the lowest, $15.80, in South Carolina. The highest average paid for lighting was $11.72, in the District of Columbia; the lowest, $2.83, in South Carolina. The highest average paid for husband's clothing was $44.03, in Massachusetts, the lowest, $18.20, in Georgia; the highest for wife's clothing was $41.58, in Massachusetts, the lowest, $10.75, in Tennessee; the highest for children's clothing was $91.27, in Kentucky, the lowest, $21.58, in South Carolina.

No taxes were paid by the 10 families in the District of Columbia. The highest average amount paid for taxes in any State was $37.57 by 5 families in Rhode Island. No property insurance was paid by the 20 families in South Carolina, while the highest average was $11.78 for 8 families in Tennessee. The highest average paid for life insurance was $49.33, in West Virginia, the lowest, $10.75, in Washington; the highest average paid to labor organizations was $28.36, in California, the lowest, $1, in Tennessee; to other organizations, the highest average paid was $34, in Kansas, the lowest, $4.63, in South Carolina. The highest and lowest average payments for religious purposes were $17.90 in West Virginia and $3.85 in Louisiana; for charity, $9.88 in Colorado and nothing in Louisiana; for furniture, $79.37 in Massachusetts and $6.89 in Iowa; for books and papers, $15.19 in Colorado and $4.67 in Texas; for amusements and vacation, $50.92 in Missouri and $1.90 in Iowa; for intoxicating liquors, $131.17 in the District of Columbia and $2.56 in North Carolina; for tobacco, $37.78 in Missouri and $7.89 in Texas; for expenditures incident to sickness and death, $47.47 in Minnesota and $12.50 in Colorado.

A few of the above statements should be explained. Two families in Kansas made payments to other organizations—a payment of $18 was made by one family and of $50 by the other. Although no

explanation of the $50 payment was made by the agent, it is probable that it included initiation fees to one or more organizations and was much more than the average yearly payment would amount to thereafter. Three families in the District of Columbia reported an expenditure for intoxicating liquors—one expended $1, another $12.50, while the third expended $380. The expenditure of the third family was questioned by the agent, but the wife, who gave the data, insisted that the statement was correct. This was a very exceptional family, and as only three of the families in the District of Columbia covered by the table had an expenditure for intoxicating liquors, the average, though mathematically correct, is undoubtedly not representative of the District of Columbia. In Missouri the average expenditure for tobacco was high, owing to the fact that the few families reported as using tobacco used it in large quantities.

Table IV–S—Summary of expenditure per family for various items other than food, by nativity of head of family (*pp. 510 and 511*).—This table gives, by nativity of head of family, a summary of the expenditures for items other than food. The table should be studied in connection with Table IV–O, which shows the number of families that enter into the averages shown in this table.

A comparison of the native with the foreign families shows that the rent paid by the native families averaged $122.03 and that paid by the foreign families, $124.47. Fuel and lighting both averaged higher in the foreign than in the native families. The cost of clothing for the husband and for the wife averaged slightly more in the native than in the foreign families, while the cost of clothing for the children in the foreign families was $61.05, as against $49.76 in the native families.

The foreign families paid an average of $20.13 in taxes, as against $14.74 paid by the native families. The expenditure for both property and life insurance averaged a little higher in the foreign than in the native families, while for labor and other organizations the native families had the larger average expenditure. The native families paid an average of $10.89 to labor organizations and the foreign families an average of $9.93. The average expenditure for religious purposes was larger in the foreign families; for charity the larger expenditure was made by the native families. The foreign families had larger expenditures for furniture and for books and papers; the native families spent more for amusements and vacation. The foreign families averaged more than the native families for intoxicating liquors and less for tobacco. The expenditure on account of sickness and death averaged a little higher in the native than in the foreign families.

A comparison of the average expenditures of families grouped according to the nativity of the head of the family shows that the highest average expenditure for rent was $142.13, paid by the families

of Swedish nativity, while the lowest was $98.40, paid by the families of Swiss nativity, the latter group, however, comprising only 5 families. The average cost of fuel in the families of Italian nativity was $29.61, in the families of Norwegian nativity, $37.87. Lighting averaged from $5.92 for the families of Swiss nativity to $9.51 for the families of Canadian nativity. The cost of clothing for the husband averaged from $25.19 in the families of Dutch nativity to $37.44 in the families of Canadian nativity; clothing for the wife, from $17.16 in the families of Italian nativity to $33.91 in the families of Canadian nativity; and clothing for the children, from $30.11 in the families of Italian nativity to $71.03 in the families of Irish nativity.

The lowest average for taxes paid by the families of any nativity was $2, paid by the 1 family classed as "other foreign;" the highest, $40, was paid by 1 family of Italian nativity. The highest average payment for property insurance was $8.39, paid by the families of Canadian nativity; the lowest, $1, paid by 1 family classed as "other foreign." The average payment for life insurance varied from $14.65, paid by 8 families of Italian nativity, to $39.70, paid by 29 families of Scotch nativity. No family of French nativity made payments to labor organizations, while 1 family of Swiss nativity paid $15 to such organizations. The average payment to other organizations varied from $7.60, paid by the families of Scotch nativity, to $18, paid by 1 family of French nativity. The average expenditure for the support of religion varied from $5.69 in the families of Italian nativity to $15.18 in the families of Norwegian nativity, and for charity from $2 in the families of Danish nativity to $5.40 in the families of English nativity.

The average expenditure for furniture varied widely, being as low as $11.06 in the families of Danish nativity, and as high as $51.91 in the families of Swiss nativity. The families of several foreign nativities had a larger expenditure for books and papers than had the native families. The lowest average expenditure for this item was $5.44, by the families of Italian nativity, while the highest was $11.24, expended by families of Danish nativity. The families classed as "other foreign" had the smallest expenditure for amusements and vacation; the families of Welsh nativity had the largest expenditure for this purpose.

The families of 2 of the foreign nativities expended 50 per cent more for intoxicating liquors than did the native families; those of certain other foreign nativities, however, spent much less. The amount varied was from $9.50, expended by the families of Dutch nativity, to $33.63, expended by the families of Scotch nativity. The native families expended more for tobacco than any of the foreign families, except those of French nativity, which expended an average of $15.04 for that item. The families of Norwegian nativity had an average expenditure of only $8.04 for tobacco.

In the families of 6 foreign nativities the average expenditure on account of sickness and death was greater than that of the native families. The lowest expenditure for this purpose was $12.75, in the families classed as "other foreign," the highest, $37.50, in the families of Danish nativity.

It is again suggested that the average expenditures shown in this table should always be studied in connection with the number of families having expenditures for the several items, as these averages apply to such families only.

Table IV-T—Summary of disposition of surplus and manner of meeting deficit, by States (pp. 512 and 513).—The facts given in detail in Table IV-G are summarized, by States and geographical divisions, in this table. Of the total 2,567 families which reported their income and expenditure in detail, 1,480 families had a surplus, 507 families had a deficit, and 580 families reported that they came out even at the end of the year—that is, their expenditures equaled their income.

Of the families reporting a surplus, 491 had the surplus on hand in cash, 682 had deposited the surplus in bank, 63 had placed it in building associations, 42 had invested it in real estate, 5 had invested it in shares of stock, 3 had loaned it, 60 had paid preexisting debts with it, 1 had disposed of it in some other way, and 133 made no report as to what they had done with the surplus. Many of the families that had put money into bank or had invested it in some way also had more or less cash left on hand, which cash on hand has been disregarded in this table. Seventy-nine of the 1,480 families which reported a surplus had also made payments on the principal of the incumbrance on the home.

Of the 507 families which reported a deficit for the year, 244 had met the deficit by obtaining credit, 94 had drawn on former savings, 1 had mortgaged real estate, 2 had mortgaged furniture, 1 had sold real estate, 13 had borrowed money, 2 had met the deficit in other ways, and 150 made no report as to the method of meeting the deficit. Nineteen of the families which reported a deficit for the year had made payments on the principal of the incumbrance on the home.

Of the 580 families which used up their whole income during the year, 22 had in reality saved some money by making a payment on the debt on the home.

Table IV-U—Summary of disposition of surplus and manner of meeting deficit, by nativity of head of family (pp. 514 and 515).—This table summarizes, according to the nativity of the head of the family, the data presented in Table IV-G. Thus, of the 1,578 native families, 913 reported a surplus. Of the families reporting a surplus 314 had the surplus on hand in cash; 375 had deposited the surplus in bank, etc. Further illustration is considered unnecessary.

TABLE V.—INCOME AND EXPENDITURE IN 11,156 NORMAL FAMILIES.

In the preceding tables the data have been presented for the families covered by the investigation without any selection with regard to the constituent elements of the family, some families containing dependents, boarders, or lodgers, while others did not. Some contained young children, while others contained children nearly, if not quite, of adult age. Table V presents a series of subordinate tables relating to the income and expenditure in 11,156 "normal" families, according to the number of children in the family and by classified income. As already defined a "normal" family has—

The husband at work;
A wife;
Not more than five children, and none over 14 years of age;
No dependent, boarder, lodger, or servant;
Expenditures for rent, fuel, lighting, food, clothing, and sundries.

These "normal" families of course average smaller than those in the previous tables, and this fact should be kept in mind in any comparison of the figures here with those of the tables already discussed. Thus the average size of the 11,156 normal families was 3.96 persons, while that of the total 25,440 families was 4.88, and that of the 2,567 families reporting expenditures in detail was 5.31.

Table V-A—Income and expenditure per family in normal families, for each State, by general nativity of head of family and size of family (*pp. 516 to 532*).—Table V-A shows the income and expenditure per family in the normal families investigated, for each State, by general nativity of head of family, and size of family. Reference to this table on page 526, shows that there were 1,135 of these normal families having native-born heads reported for the State of New York. Of these 1,135 families, 200 had no children, 276 had one child each, 274 had 2 children each, 220 had 3 children each, 121 had 4 children each, and 44 had 5 children each.

In the first line for New York it appears that in the 200 native families having no children the average income was $641.10. In these families the average expenditure for rent was $117.42; for fuel, $31.65; for lighting, $7.41; for clothing, $77.99, and for sundries, $126.17, making a total of $360.64 for all items except food. If the expenditure for food, $245.03, be added, the total expenditure is seen to be $605.67.

For the total 1,135 native families the average income was $680.99.

There were 1,019 families the heads of which were foreign born. Of these 161 had no children, 217 had 1 child each, 242 had 2 children, 207 had 3 children, 126 had 4 children, and 66 had 5 children.

Following the combination of all foreign families, a combination of

all normal families investigated in the State, both native and foreign born, is made. The total shows 2,154 normal families canvassed in the State of New York. Of these families 361 had no children, 493 had 1 child each, 516 had 2 children, 427 had 3 children, 247 had 4 children, and 110 had 5 children.

By following the line across the page the average income and expenditure of each of these classes may be seen. The average surplus or deficit for any class shown in the table may easily be determined by comparing the total expenditure with the total income.

Table V–B—Income and expenditure per individual in normal families, for each State, by general nativity of head of family and size of family (*pp. 533 to 549*).—This table shows per individual the same facts that are shown per family in the preceding. It also has the same form and may be read in the same manner.

Table V–C—Expenditure per family in normal families, by States and classified income (*pp. 550 to 559*).—This table shows the expenditures per family for each State, for the United States, and for the 5 geographical divisions, by classified income. It is seen, by reference to the table on page 555, that one family in New York had an income under $200. Fourteen families investigated had incomes of $200, or under $300. The 452 families having an income of $600 or under $700 comprised the largest group reported for New York. In this group the average expenditure for rent was $119.36, fuel $31.49, lighting $7.72, food $276.98, clothing $81.86, and sundries $116.60, making an average total expenditure of $634.01. For the total 2,154 normal families canvassed in New York the average cost of rent was $122.14; of fuel, $31.89; of lighting, $8.00; of food, $285.30; of clothing, $84.34, and of sundries, $128.16, making a total average expenditure in the 2,154 families of $659.83.

All the expenditures, it will be observed, show a tendency to increase with the increase in the size of income.

Table V–D—Expenditure per family in normal families, by nativity of head of family and classified income (*pp. 560 to 564*).—This table gives, by nativity of head of family and by classified income, the expenditures per family in normal families. As shown on page 500 a total of 7,248 normal families was reported, the heads of which were born in the United States. Of this number, 28 families had incomes under $200; 88 had incomes of $200 or under $300, etc. In the 1,485 families having incomes of $600 or under $700, the average expenditure for rent was $111.79, fuel $27.80, lighting $6.60, food $260.21, clothing $79.32, and sundries $124.06, making a total average expenditure of $609.78.

In the total 7,248 native families the average expenditure for rent was $112.22; for fuel, $27.73; for lighting, $6.82; for food, $263.13;

for clothing, $81.78, and for sundries, $131, making a total average expenditure of $622.68.

Comparisons can be made readily between the families of like income in the several nativities, but care should be taken that a comparison is not made where the number of families is too small to be fairly representative. Comparison can also be made in the table between the native and the combined foreign families. In such comparison the fact should not be overlooked that the normal families of foreign nativity are largely in the Northern and Western divisions (only 2.6 per cent being in the Southern divisions), and that an average for them is practically an average of families living under conditions prevailing in those divisions alone, while the average for the native normal families includes 15 per cent of such families living in the two Southern groups. The distribution of native and foreign families and their average size may be seen in the following table:

NUMBER AND AVERAGE SIZE OF NORMAL FAMILIES IN EACH GEOGRAPHICAL DIVISION, BY GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division.	Native.		Foreign.		Total.	
	Families.	Average size.	Families.	Average size.	Families.	Average size.
North Atlantic States	3,691	3.79	2,678	4.06	6,369	3.91
South Atlantic States	701	3.87	50	4.40	751	3.90
North Central States	2,191	3.99	996	4.38	3,187	4.11
South Central States	386	3.94	53	3.92	439	3.94
Western States	279	3.48	131	3.86	410	3.60
Total	7,248	3.86	3,908	4.14	11,156	3.96

Table V–E—Income and expenditure per family in normal families, by nativity of head of family and size of family (pp. 565 to 568).—This table brings together the normal families of all of the States canvassed and shows, by nativity of head of family and by size of family, the income and expenditure per family.

The table on page 565 shows that of the 7,248 normal families the heads of which were native born, 1,441 had no children, 1,771 had one child each, etc.

Of the 151 families the heads of which were born in Austria-Hungary, 25 had no children, 30 had one child each, etc.

This table affords an opportunity to study the income and expenditure of the families of the several nativities according to the size of the family. Thus, in the native families having no children, the average income per family was $635.17. This amount was exceeded in the Canadian, English, French, Norwegian, Scotch, Swedish, and "other foreign" families of the same size. The lowest income in this class of normal families was $412.64 in the families of Dutch nativity, the highest, $755.46 in the families grouped under "other foreign." A con-

sideration of the expenditure for food in the families having no children shows that the expenditure in the native families was $227.29, which amount was exceeded by the families of all foreign nativities except those of the French, Italian, Dutch, and Swiss nativities, the expenditure being lowest in the Dutch families.

The other items shown in the table may be read in like manner.

In the total of native and foreign families, it is seen that of the 11,156 normal families 2,124 had no children; 2,579 had one child each; 2,700 had two children each; 1,973 had three children each; 1,248 had four children each, and 532 had five children each.

The average income per family in the families having no children was $632.61. The table shows a gradual increase in the income as the size of the family increases until the families having five children are reached, in which group the average income drops back to about that of the families having three children each.

The average rent in the families having no children was $115.67. The average is less in the families having children. Expenditures for fuel tend to increase as the size of the family increases.

The cost of lighting increases with the size of the family until the families of five children are reached, when the average expenditure drops off a little. The cost of clothing per family, and the same is true of food, increases regularly, though not proportionately, with the size of the family.

The average expenditure for sundries rises in the families having one child each; drops a little in the families having two and three children each; rises again in the families having four children each, and then drops materially in the families having five children each.

The total expenditure increases with the size of the family.

As was shown in connection with the preceding table, the average size of the native families is smaller than of the foreign, and a considerably larger proportion of the native families are in the two Southern divisions. These facts should be kept in mind in making comparisons.

No summary of income and expenditure per family is given by States, as such a summary would necessarily be so long as to make it nearly as difficult to follow as the primary tables. The reader is referred to the totals for the several States to be found in Table V–A.

Table V–F—Per cent of total expenditure made for various purposes and per cent of income expended in normal families, by general nativity of head of family and size of family (*p. 569*).—This table consists of percentages based on the figures shown in the preceding table. For the native and foreign families combined, it is shown that in the families having no children 20.23 per cent of the total expenditure was for rent. As the size of the families increased the percentage of expenditure for rent decreased regularly, until in the families having five

children the expenditure for rent was 16.54 per cent of the total expenditure. The average expenditure for rent in all families was 18.12 per cent of the total expenditure.

The percentage of expenditure for fuel dropped a little as the families increased in size, until the families having five children each were reached, when it rose to between that of the families having two and those having three children each. The percentage of expenditure for lighting decreased as the size of the families increased. The percentage of expenditure for sundries rose a little in families having one child each, but dropped thereafter as the size of the families increased.

The necessity for this decrease in the percentage of expenditure for rent, fuel, lighting, and sundries is seen when the items of clothing and food are inspected. The percentage of expenditure for clothing increases slightly with the size of the family, while the percentage of expenditure for food increases very materially.

The last column of the table deserves special attention. The families having no children expended 90.40 per cent of their income, the families having one child each, 93.44 per cent of their income, the families having two children each, 95.35 per cent of their income, the families having three children each, 97.02 per cent of their income, the families having four children each, 98.19 per cent of their income, and the families having five children each, nearly 1 per cent more than their income. This deficit was probably met in many cases out of the savings of the family in former years.

In families of each size included in the table the native families expended a smaller percentage of their income than did the families of foreign nativity. Thus, the native families having no children, expended 90.28 per cent of their income, while the foreign families having no children expended 90.65 per cent of their income, etc.

Table V–G—Summary of income and expenditure per family in normal families, by general nativity of head of family and States (pp. 570 and 571).—Table V–G is a summary, by general nativity of head of family, and by States, of the income and expenditure per family. The size of the family is not taken into consideration.

In this table an opportunity is given to study the average income and expenditure of native families, of foreign families, and of native and foreign families combined, so far as investigated in the several States and in the geographical divisions. Thus the average income of the native normal family in Alabama was $561.12, in California, $829.17, in Colorado, $876.50, etc.

The average income of the normal families, the heads of which were foreign born, was $657.13 in Alabama, $771.83 in California, etc. The average income of all normal families investigated was $569.04 in Alabama, $811.57 in California, $861.90 in Colorado, etc.

At the close of each of the three sections of this table the data are summarized by geographical divisions.

Table V–II—Income per family and amount and per cent of total expenditure made for various purposes in normal families of each specified size, by geographical divisions and general nativity of head of family (pp. 572 to 579).—This table is presented in order to furnish convenient comparison of native and foreign families of the same size and in the same localities. It shows, for normal families of each specified size, the average income and the amount and per cent of expenditure made for various purposes, by geographical divisions and general nativity of head of family.

Thus the average income of native normal families having no children was $652.83 in the North Atlantic States, as opposed to $620.95 in the foreign families; the average expenditure was $594.25 in the native families, as opposed to $566.30 in the foreign families. The average expenditure for rent in the native families was $129.09, or 21.72 per cent of the total expenditure in native families, and in the foreign families $117.94, or 20.82 per cent; food cost $234.85, or 39.52 per cent, in the native, and $235.28, or 41.55 per cent, in the foreign families, etc. Similar figures are shown for the other geographical divisions and for the United States as a whole.

A like comparison of native and foreign families, by geographical divisions, may be made for normal families having 1 child, 2 children, etc.

Table V–I—Per cent of total expenditure made for various purposes and per cent of income expended in normal families, by States (p. 580).—This table consists of percentages based on the total normal families investigated in the several States and geographical divisions, as shown in Table V–G, no separation being made of native and foreign families.

In a study of the percentages relating to the five geographical divisions it is seen that in the Western States 20.08 per cent of the total expenditure went for rent; in the North Atlantic States, 19.70 per cent; in the South Atlantic States, 16.54 per cent; in the South Central States, 16.41 per cent, and in the North Central States, 15.25 per cent.

The expenditure for fuel was 4.93 per cent of the total expenditure in the South Atlantic States; 4.65 per cent in the Western States; 4.61 per cent in the North Central States; 4.54 per cent in the North Atlantic States, and 3.89 per cent in the South Central States.

The expenditure for lighting varied from 1.18 per cent of the total expenditure in the North Atlantic States to 0.81 per cent in the South Central States.

The percentage of expenditure for clothing was 15.58 in the Western States; 13.11 per cent in the South Central States; 13.02 per cent in the North Central States; 12.73 in the North Atlantic States, and 12.67 in the South Atlantic States.

The percentage of expenditure for sundries varied from 24.11 per cent in the South Central States to 17.77 in the Western States. The expenditure for food constituted 43.64 per cent of the total expenditure in the South Atlantic States; 43.47 per cent in the North Central States; 43.17 per cent in the North Atlantic States; 41.67 per cent in the South Central States, and 40.85 per cent in the Western States.

The percentage of the total income expended was 95.62 per cent in the North Central States; 95.35 per cent in the North Atlantic States; 94.90 per cent in the South Central States; 94.43 per cent in the South Atlantic States, and 85.51 per cent in the Western States.

In the total 11,156 normal families covered in this report, 18.12 per cent of the total expenditure was for rent, 4.57 per cent for fuel, 1.12 per cent for lighting, 12.95 per cent for clothing, 20.11 per cent for sundries, and 43.13 per cent for food. The total expenditure was 94.90 per cent of the income, leaving a surplus of 5.10 per cent of the income.

Table V–J—Summary of income and expenditure per family in normal families, by nativity of head of family (*p. 581*).—This table is a summary of income and expenditure per family, by nativity of head of family. The size of the family is not considered. Each line of this table is a total, as shown in Table V–E. An opportunity is here given for a ready comparison of the average income and expenditure of the normal families of the several nativities, but what has already been said of the influence of the Southern groups upon the averages for the native families should be borne in mind.

The average income of the native normal families investigated was $659.68 and of the foreign normal families $634.85. The average expenditure of the native families was $622.68 and of the foreign families $608.75. The average expenditure for rent was $112.22 in the native families and $111.49 in the foreign families; for fuel, $27.73 in the native families and $29.07 in the foreign families; for lighting, $6.82 in the native families and $7.10 in the foreign families; for clothing, $81.78 in the native families and $76.65 in the foreign families; for sundries, $131 in the native families and $111.77 in the foreign families; and for food, $263.13 in the native families and $272.67 in the foreign families.

The highest average income in these normal families was in the families of Scotch nativity, whose income was $714.93; the lowest was $519.47, the income of the families of Dutch nativity.

The highest average expenditure for rent was $125.48, in the families of Swiss nativity; the lowest, $76.45, in the families of Dutch nativity. The highest average expenditure for fuel was $32.18, in the families of Danish nativity; the lowest, $25.03, in the families of Italian nativity. Lighting ranged from $6.13 in the families of Dutch nativity to $7.85 in the families of English nativity; clothing from $58.77 in the

families of Dutch nativity to $90.51 in the families of English nativity; sundries from $82.72 in the families of Dutch nativity to $137.29 in the families of Scotch nativity, and food from $198.62 in the families of Dutch nativity to $290.15 in the families of Danish nativity.

Table V–K—Per cent of total expenditure made for various purposes and per cent of income expended in normal families, by nativity of head of family (p. 581).—This table shows the percentage of the total expenditure that was expended for the several purposes named and the percentage of the income expended, by nativity of head of family. These percentages are based on the averages shown in the preceding table.

In the native families 18.02 per cent of the total expenditure was for rent; in the foreign families 18.31 per cent was for rent. The expenditure for fuel was 4.45 per cent in the native families and 4.78 per cent in the foreign families; for lighting, 1.10 per cent in the native families and 1.17 per cent in the foreign families; for clothing, 13.13 per cent in the native families and 12.59 per cent in the foreign families; for sundries, 21.04 per cent in the native families and 18.36 per cent in the foreign families; and for food, 42.26 per cent in the native families and 44.79 per cent in the foreign families. The percentage of the income expended in the native families was 94.39 per cent and in the foreign families 95.89 per cent, leaving a surplus of 5.61 per cent of the income in the native families and 4.11 per cent in the foreign families.

Table V–L—Expenditure per family in normal families, by size of family and classified income (pp. 582 and 583).—This table shows the average expenditure in normal families, by size of family and classified income. This table affords an opportunity to see the difference in the expenditures in large and small families having the same income. For example, taking the families having an income of $600 or under $700 (the group containing the largest number of families), it is seen that the expenditures were as follows:

AVERAGE FAMILY EXPENDITURE FOR VARIOUS PURPOSES IN NORMAL FAMILIES HAVING AN INCOME OF $600 OR UNDER $700, BY SIZE OF FAMILY.

Object of expenditure.	Families with—						All families.
	No children.	One child.	Two children.	Three children.	Four children.	Five children.	
Rent	$117.94	$112.94	$109.76	$113.16	$113.81	$110.76	$113 03
Fuel	27.76	28.03	28.20	28.88	30.33	29.15	28 45
Lighting	6.88	6.79	7.11	6.46	6.88	6.38	6.82
Clothing	72.65	76.62	78.68	81.09	85.18	90.31	78.76
Sundries	124.66	123.11	122.47	117.96	98.13	97.26	118.59
Food	234.05	250.66	267.55	283.61	298.89	315.91	265.93
Total	583.94	598.15	613.77	631.16	633.22	649.77	611.58

Many interesting comparisons can be drawn from this table.

Table V–M—Per cent of total expenditure made for various purposes in normal families, by size of family and classified income (pp. 584 and 585).—This table consists of percentages based on the preceding table. It shows the per cent of total expenditure that was expended for the different items by families of each size and by classified income of the family. If, for example, the families having an income of $600 or under $700 are compared, the following percentages are seen:

PER CENT OF TOTAL EXPENDITURE MADE FOR VARIOUS PURPOSES IN NORMAL FAMILIES HAVING AN INCOME OF $600 OR UNDER $700, BY SIZE OF FAMILY.

Object of expenditure.	Families with—						All families.
	No children.	One child.	Two children.	Three children.	Four children.	Five children.	
Rent	20.20	18.88	17.88	17.93	17.97	17.04	18.48
Fuel	4.75	4.69	4.60	4.58	4.79	4.49	4.65
Lighting	1.18	1.13	1.16	1.02	1.09	.98	1.12
Clothing	12.44	12.81	12.82	12.85	13.45	13.90	12.88
Sundries	21.35	20.58	19.95	18.69	15.50	14.97	19.39
Food	40.08	41.91	43.59	44.93	47.20	48.62	43.48
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Table V–N—Income and expenditure per individual in normal families, by nativity of head of family and size of family (pp. 586 and 588).—This table shows, by nativity of head of family, and by size of family, the income and expenditure per individual in normal families. It has the same form as Table V–E. The reader will observe that Table V–E shows averages per family, while this table shows averages per individual. The facts are summarized for the native families, for those of each foreign nativity, for the foreign nativities combined, and for all families.

An inspection of the first line of the table shows that the average income per individual in the native families having no children was $317.59. It is seen that the average income per individual decreases as the size of the family increases, as must be expected, for all children in these normal families are young, and few of them are at work. The average income per individual for all native families investigated was $171.47.

The average rent per individual in the native families having no children was $58.28, in the families having one child, $36.62, in the families having two children, $27.48, etc.

The other items may be followed through readily in the several nativities.

A corresponding summary by States is not shown, the reader being referred to the State totals of Table V–B.

Table V–O—Summary of income and expenditure per individual in normal families, by general nativity of head of family and States (pp. 589 and 590).—This table is a summary of Table V–B. It shows, by States, the income and expenditure per individual in normal

families, for the native families, for the foreign families, and for the native and foreign families combined. The figures are also shown for the geographical divisions and for the United States.

Thus it is shown on page 589 that the income per individual for the 1,135 native families investigated in New York was $173.38, the average expenditure for rent was $30.94, etc.

In the next section of the table there are shown 1,019 normal families in New York the heads of which were foreign born. The average income per individual for these families was $162.48, the average expenditure for rent was $29.85, etc.

In the third section of the table the average income per individual is shown to be $168.10 for the 2,154 native and foreign families investigated in New York; the average rent per individual was $30.41, etc.

A comparison, by general nativity of head of family within each geographical division, may be easily made in the following table:

INCOME AND EXPENDITURE PER INDIVIDUAL FOR VARIOUS PURPOSES IN NORMAL FAMILIES, BY GEOGRAPHICAL DIVISIONS AND GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division and general nativity of head of family.	Families.		Total income per individual.	Expenditure per individual for—							
	Number.	Average size.		Rent.	Fuel.	Lighting.	Clothing.	Sundries.	Total of preceding.	Food.	Total of all.
North Atlantic States:											
Native	3,691	3.79	$175.60	$33.25	$7.57	$1.92	$21.71	$31.67	$96.12	$70.36	$166.48
Foreign	2,678	4.06	156.59	29.09	6.83	1.82	18.51	27.35	83.60	66.91	150.51
Total	6,369	3.91	167.27	31.42	7.24	1.88	20.31	29.78	90.63	68.85	159.48

Table V–P—Summary of income and expenditure per individual in normal families, by nativity of head of family (p. 591).—This table is a summary of Table V–N. It shows by nativity of head of family the income and expenditure per individual in the normal families. The size of the family is not taken into consideration in this table.

The average income per individual in the native families was $171.47, in the foreign families $155.28. The average rent per individual in the native families was $29.17, and in the foreign families $27.27. Fuel cost $7.21 per individual in the native families and $7.11 per individual in the foreign families; lighting, $1.77 in the native families and $1.74 in the foreign families; clothing, $21.26 in the native families and $18.75 in the foreign families; sundries, $34.05 in the native families and $27.34 in the foreign families; and food, $68.39 in the native families and $66.70 in the foreign families. The average total expenditure per individual in the native families was $161.85 and in the foreign families $148.91.

Table V–Q—Summary of expenditure per family in normal families, by general nativity of head of family and classified income (p. 592).—This is a summary of Table V–D. The averages for the native families, the foreign families, and the native and foreign families combined, classified according to income, are here brought together for ready comparison.

Taking, for example, the families whose income was $600 or under $700, it is seen that the average expenditures for the native and for the foreign families differed as follows:

AVERAGE EXPENDITURE FOR VARIOUS PURPOSES IN NORMAL FAMILIES HAVING AN INCOME OF $600 OR UNDER $700, BY GENERAL NATIVITY OF HEAD OF FAMILY.

Object of expenditure.	Native families.	Foreign families.	Object of expenditure.	Native families.	Foreign families.
Rent	$111.79	$115.19	Clothing	$79.32	$77.78
Fuel	27.80	29.60	Sundries	124.06	109.04
Lighting	6.60	7.19			
Food	260.21	275.90	Total	609.78	614.70

A like comparison can be made for the families with larger or smaller incomes and for all the families.

Table V–R—Per cent of total expenditure made for various purposes in normal families, by general nativity of head of family and classified income (p. 593).—This table consists of percentages based on the preceding table. An opportunity is here given to study percentages of expenditure for the different items in the native and the foreign families as the size of the income increases. No very marked differences are noticed between the native and the foreign families in the several groups of income, but as a whole the foreign families show a

little larger percentage of expenditure for rent, fuel, lighting, and food, and a little smaller percentage of expenditure for clothing and sundries.

The percentages for the different sizes of family in each specified class of income, are also shown in Table V–M, in connection with which table they are discussed.

A comparison of the per cent expended for each purpose according to the size of the family income can easily be made in the following table:

PER CENT OF EXPENDITURE FOR VARIOUS PURPOSES IN 11,156 NORMAL FAMILIES, BY CLASSIFIED INCOME.

Classified income.	Rent.	Fuel.	Lighting.	Food.	Clothing.	Sundries.	Total.
Under $200	16.93	6.69	1.27	50.85	8.68	15.58	100.00
$200 or under $300	18.02	6.09	1.13	47.33	8.66	18.77	100.00
$300 or under $400	18.69	5.97	1.14	48.09	10.02	16.09	100.00
$400 or under $500	18.57	5.54	1.12	46.88	11.39	16.50	100.00
$500 or under $600	18.43	5.09	1.12	46.16	11.98	17.22	100.00
$600 or under $700	18.48	4.65	1.12	43.48	12.88	19.39	100.00
$700 or under $800	18.17	4.14	1.12	41.44	13.50	21.63	100.00
$800 or under $900	17.07	3.87	1.10	41.37	13.57	23.02	100.00
$900 or under $1,000	17.58	3.85	1.11	39.90	14.35	23.21	100.00
$1,000 or under $1,100	17.58	3.77	1.16	38.79	15.06	23.69	100.00
$1,100 or under $1,200	16.59	3.63	1.08	37.68	14.89	26.13	100.00
$1,200 or over	17.40	3.85	1.18	36.45	15.72	25.40	100.00
Total	18.12	4.57	1.12	43.13	12.95	20.11	100.00

A study of the percentages relating to all families shows that the economic law propounded by Doctor Engel, for some years the chief of the royal bureau of statistics of Prussia, is not entirely borne out by the figures of this table.

Doctor Engel's propositions were:

First. That the greater the income the smaller the percentage of outlay for subsistence.

Second. That the percentage of outlay for clothing is approximately the same, whatever the income.

Third. That the percentage for lodging or rent, and for fuel and lighting is invariably the same, whatever the income.

Fourth. That as the income increases in amount the percentage of outlay for sundries becomes greater.

The first proposition is confirmed; the percentage of expenditure for food decreases as the size of the income increases. The second proposition is not confirmed, as the percentage of expenditure for clothing increases as the size of the income increases, being 8.68 per cent of the total family expenditure of families with an income under $200 a year, but reaching 15.72 per cent in the case of families with an income of $1,200 or over. The third proposition is partially borne out; the percentage of expenditure for rent does not change materially as the size of the income increases, the smallest per cent being 16.59

and the highest 18.69, and the percentage of expenditure for lighting varies but little; but the percentage of expenditure for fuel shows a marked tendency to decrease as the size of the income increases, the per cent for families with income under $200 being 6.69, while that for families with income between $1,100 and $1,200 was but 3.63. The fourth proposition is fully confirmed; the percentage of expenditure for sundries shows a decided increase as the size of the income increases.

TABLE VI.—CONSUMPTION OF FOOD IN 1,043 NORMAL FAMILIES.

Table VI is devoted to the subject of food, being a detailed study of the quantity of the principal articles of food consumed and the cost of the same. The data in this table relate to 1,043 normal families only, from which an itemized report of expenditures for food was obtained. A number of these normal families had no children, while in the families reporting children differences were of course found in the number and ages of the children. Inasmuch as the amount of food consumed in a family depends not only on the number of children, but also on the ages of the children, in order to make an exact comparison of expenditures for food, the relative consuming powers of the different members of the normal families were estimated after careful comparison and study, and on the basis of these estimates it was assumed as generally true for the purpose of this table—

1. That all husbands consume a like amount of food.
2. That the wife consumes 90 per cent as much food as the husband.
3. That a child from 11 to 14 years of age, inclusive, consumes 90 per cent as much food as the husband.
4. That a child from 7 to 10 years of age, inclusive, consumes 75 per cent as much food as the husband.
5. That a child from 4 to 6 years of age, inclusive, consumes 40 per cent as much food as the husband.
6. That a child 3 years of age or under consumes 15 per cent as much food as the husband.

Thus the consumption of food in the normal family may be expressed briefly as follows:

	Units.
The husband consumes	100
The wife consumes	90
A child from 11 to 14 years of age, inclusive, consumes	90
A child from 7 to 10 years of age, inclusive, consumes	75
A child from 4 to 6 years of age, inclusive, consumes	40
A child 3 years of age or under consumes	15

Previous studies of this character have shown these figures to be approximately correct.

With all families reduced to this common basis the quantity and cost of food consumed per 100 units has been computed. The table shows,

not the quantity consumed and the cost per family or per individual, but the quantity consumed and the cost per 100 units of consumption, that is, per adult male.

Table VI–A—Quantity and cost of certain articles of food in normal families, for each State, by nativity of head of family (pp. 594 to 621).—This is the first of five tables devoted to the subject of consumption of food in normal families. This is a four-page table, and in studying it the same group of families should be followed across the four pages.

By reference to the figures in this table relating to New York (pp. 610 to 613) it is seen that 125 of the normal families investigated in this State with heads of native birth, gave detailed statements as to the quantity and cost of food consumed by them. The average size of these families was 4.19 persons, and the quantity of food required per 100 units of consumption (or per adult male) was 112.64 pounds of fresh beef, which cost $17.06; 23.83 pounds of salt beef, which cost $2.44; 28.44 pounds of fresh hog products, which cost $3.72; 23.31 pounds of salt hog products, which cost $3.04, etc. Data are likewise shown for the families of each foreign nativity investigated, for the total families of foreign nativity, and for the total families of all nativities. The figures for the other States investigated may be studied in the same manner.

Table VI–B—Summary of quantity and cost of certain articles of food in normal families, by States (pp. 622 to 625).—This table summarizes Table VI–A, by States, and also combines the States by the usual geographical divisions. The averages by States are given for those who may desire to study them, but in many cases the number of families for which the facts were obtained in detail is too small to make the State averages thoroughly representative. The averages for the geographical divisions, representing a larger number of families, are much more valuable for study. The table covers in detail the expenditures for food of 1,043 families. The average size of these families was 4.20 persons, varying from an average of 3.68 in the South Atlantic States to 4.41 in the North Central States. The quantity of fresh beef used per 100 units of consumption (or per adult male) was greatest (102.17 pounds) in the Western States and smallest (80.60 pounds) in the South Central States. In the former case the cost was $15.67, in the latter $9.59. An examination of the other articles of food will enable a similar comparison to be made for the various sections of the country. The following table has been inserted here that this comparison may be more conveniently made.

QUANTITY OF CERTAIN ARTICLES OF FOOD USED PER 100 UNITS OF CONSUMPTION (OR PER ADULT MALE) IN NORMAL FAMILIES, BY GEOGRAPHICAL DIVISIONS.

Article.	North Atlantic States.	South Atlantic States.	North Central States.	South Central States.	Western States.	United States.
Fresh beef, pounds	98.11	81.70	95.22	80.60	102.17	95.98
Salt beef, pounds	16.54	3.72	3.83		1.03	11.05
Fresh hog products, pounds	25.55	24.05	39.65	25.08	7.58	28.47
Salt hog products, pounds	25.80	57.42	19.04	66.40	21.03	26.96
Other meat, pounds	27.51	7.88	20.18	1.45	11.41	22.73
Poultry, pounds	19.30	19.53	21.39	13.64	14.67	19.44
Fish, pounds	22.94	28.55	15.83	10.88	15.57	20.46
Eggs, dozen	24.31	24.93	18.95	19.56	11.86	23.48
Milk, quarts	114.09	54.84	97.60	51.14	106.02	103.71
Butter, pounds	30.61	25.82	30.55	24.22	31.33	30.13
Cheese, pounds	4.81	3.74	4.06	5.11	.87	4.38
Lard, pounds	19.23	36.12	25.86	42.26	12.39	22.50
Tea, pounds	3.98	2.97	1.82	1.76	1.47	3.13
Coffee, pounds	12.29	17.04	15.81	15.78	6.69	13.37
Sugar, pounds	72.07	71.98	62.30	68.90	78.55	69.57
Molasses, gallons	1.02	1.63	.87	2.29	1.10	1.06
Flour and meal, pounds	162.31	190.49	161.64	281.85	116.92	166.25
Bread, loaves	90.21	69.44	51.36	29.12	84.11	75.85
Rice, pounds	7.16	28.58	5.90	12.43	2.68	7.90
Potatoes, bushels	3.86	3.50	4.53	3.52	2.90	3.96

This table shows a considerably greater average quantity used per 100 units of consumption (that is, per adult male) of fresh beef, "other meat," milk, and butter in the Northern and Western groups, and a greater consumption of salt hog products, lard, flour and meal, and rice in the Southern groups. Smaller variations appear in a number of other articles. It will be noted that while the Western families from whom reports were obtained showed a greater average consumption of fresh beef than those in any other section, yet their consumption of all kinds of meat (including poultry and fish) was considerably below that of any other section. The respective amounts were: North Atlantic States, 235.75 pounds; South Atlantic States, 222.85 pounds; North Central States, 215.14 pounds; South Central States, 198.05 pounds; and Western States, 173.46 pounds. In any comparison of the consumption of particular articles of food in the various sections, the fact should not be lost sight of that a small consumption of one article may be balanced by a large consumption of some other similar article. The greater consumption may be due to a variety of causes, as a greater or better market supply, lower prices, better knowledge of methods of preparation, differences in taste, or to the varying needs of life under different climatic conditions.

The cost of the various articles of food is also shown in Table VI–B, and may be studied in like manner.

The total cost of food, per 100 units of consumption, in the 5 geographical divisions, and for the United States, is shown in the following brief table:

AVERAGE TOTAL COST OF FOOD PER 100 UNITS OF CONSUMPTION (OR PER ADULT MALE) IN NORMAL FAMILIES, BY GEOGRAPHICAL DIVISIONS.

Geographical division.	Average cost of food per 100 units of consumption.
North Atlantic States	$94.51
South Atlantic States	87.29
North Central States	87.17
South Central States	79.26
Western States	89.54
Total	91.31

It will be seen here that the greatest average expenditure for food per adult male was in the North Atlantic States, namely, $94.51, the Western States standing next with $89.54. The lowest expenditure for food ($79.26) was in the South Central States.

Table VI-C—Summary of quantity and cost of certain articles of food in normal families, by nativity of head of family (pp. 626 to 629).—This table summarizes, by nativity of head of family, the same data which in the preceding table were summarized by States and by geographical divisions. The table shows a total of 716 native families and of 327 foreign families, the average size of the native families being 4.08 persons and of the foreign families 4.45 persons. Just what a combination of all families with native-born heads on the one hand and all with foreign-born heads on the other means, may be seen from the following table, which shows for each of the geographical divisions, by general nativity of head of family, the number and average size of the normal families reporting expenditures in detail:

NUMBER AND AVERAGE SIZE OF NORMAL FAMILIES REPORTING EXPENDITURES IN DETAIL IN EACH GEOGRAPHICAL DIVISION, BY GENERAL NATIVITY OF HEAD OF FAMILY.

Geographical division.	Native.		Foreign.		Total.	
	Families.	Average size.	Families.	Average size.	Families.	Average size.
North Atlantic States	394	4.01	228	4.42	622	4.16
South Atlantic States	56	3.72	4	3.25	60	3.68
North Central States	195	4.34	79	4.58	274	4.41
South Central States	42	4.02			42	4.02
Western States	29	4.07	16	4.56	45	4.24
Total	716	4.08	327	4.45	1,043	4.20

It will be noticed here that practically all the foreign families are in the Northern and Western divisions, only 4 being in the South Atlantic States and none in the South Central States. Thus, of the total foreign families, 1.2 per cent are in the two Southern divisions, while of the native 13.7 per cent are in those divisions.

This means, therefore, that the average for all the foreign families is in effect an average of foreign families living under the conditions prevailing in the Northern and Western divisions, while in an average of all the native families Southern conditions have an important modifying influence; but this can not be said to misrepresent the country as a whole, for the foreign-born population represents but an insignificant proportion in the South, while in the North and West it is a very considerable element. However, any comparison of all native and foreign families without due consideration of these facts might lead to erroneous conclusions.

The table is in the same form as Table VI–B, and may be read in like manner.

Table VI–D—Cost of food per 100 units of consumption in normal families, by size of family and by States (p. 630).—The total cost of food per 100 units of consumption, by the size of the family, is shown in this table for each State, for the five geographical divisions, and for the United States. The table shows that, as a rule, the cost of food per 100 units of consumption decreases as the size of the family increases. Taking the country as a whole, in the families having no children the average cost of food for one year for each 100 units of consumption (or adult male) was $121.01, in the families having one child it was $109.20, in the families having two children it was $96.82, in the families having three children it was $86.05, in the families having four children it was $75.52, and in the families having five children it was $66.16.

The figures for States should not be compared without first considering whether the number of families was sufficient to represent average conditions.

Table VI–E—Cost of food per 100 units of consumption in normal families, by size of family and by nativity of head of family (p. 631).—In this table statistics similar to those in the preceding table are shown by nativity of head of family, and the table may be read in the same way. What has been said of the average for native and foreign families in the discussion of Table VI–C applies with equal force here. The cost of food per 100 units of consumption in the families having no children was $119.85 for the native families and $124.41 for the foreign families. The cost per 100 units in the families having one child was $109.94 for the native families and $106.81 for the foreign families; in the families having two children it was $95.24 for the native families and $100.34 for the foreign families; in the families having three children it was $85.06 for the native families and $87.71 for the foreign families; in the families having four children it was $78.13 for the native families and $71.61 for the foreign families; and in the families having five children it was $69.75 for the native families and $60.48 for the foreign families.

The following statement compares, by general nativity of head of family, the expenditure for food per 100 units of consumption in the normal families having one, two, three, four, and five children, with the expenditure per 100 units of consumption in the normal families having no children, the latter being taken as 100:

RELATIVE EXPENDITURE FOR FOOD PER 100 UNITS OF CONSUMPTION IN NORMAL FAMILIES WITH CHILDREN AS COMPARED WITH EXPENDITURE PER 100 UNITS OF CONSUMPTION IN NORMAL FAMILIES WITH NO CHILDREN.

Children in family.	Native families.	Foreign families.	All families.
No children	100.00	100.00	100.00
1 child	91.73	85.85	90.24
2 children	79.47	80.65	80.01
3 children	70.97	70.50	71.11
4 children	65.19	57.56	62.41
5 children	58.20	48.61	54.67

PART II.

RETAIL PRICES OF FOOD.

PART II.

RETAIL PRICES OF FOOD.

The Bureau of Labor, in investigating the condition of wageworkers and persons on small salaries, secured from 25,440 families, as has been seen in Part I, statements as to their yearly expenditures for rent, food, clothing, fuel, lighting, and sundries. In addition to this the agents of the Bureau also visited retail merchants and secured from their books retail prices of the principal staple articles of food.

A total of 5,302 schedules or statements of prices were secured from 814 retail merchants for the years 1890 to 1902, and 5,293 schedules from 811 merchants for the year 1903. The prices were secured in the same localities, in the 33 States (including the District of Columbia), from which data relating to family expenditures were obtained.

The prices for the various articles were secured for each month of the fourteen years from 1890 to 1903. The report as originally prepared was completed before the end of 1903 and that year could not, therefore, be included. But as the figures for that year became available after the close of the year and before the report was printed and could be easily inserted, this was done, thus making the price series complete to the end of 1903. Prices are quoted for 30 distinct articles, and under each article prices are shown for various grades and descriptions of that article.

The articles for which retail prices are quoted in this report, the number of schedules or statements of prices secured for each article, and the number of States from which the schedules were secured are shown in the table which follows:

ARTICLES FOR WHICH RETAIL PRICES ARE SHOWN, NUMBER OF SCHEDULES SECURED FOR EACH ARTICLE, AND NUMBER OF STATES FROM WHICH THE SCHEDULES WERE SECURED.

Article.	Total schedules.		States from which secured.	Article.	Total schedules.		States from which secured.
	1890 to 1902.	1903.			1890 to 1902.	1903.	
Apples, evaporated	36	36	14	Milk, fresh	157	156	27
Beans, dry	50	50	17	Molasses	228	228	32

Eggs	236	236	32	Tea	292	291	32
Fish, fresh	117	117	18	Veal	56	56	20
Fish, salt	83	82	18	Vinegar	74	74	19
Flour, wheat	272	272	33				
Lard	230	230	32	Total	5,302	5,293	33

The monthly prices of the various articles are not published in detail owing to the great amount of space required, but from these monthly prices an average price for each year has been computed for each schedule or separate statement of prices. The average price for the year was found in the usual way; that is, by adding together the 12 monthly quotations of prices for each article for the year and dividing by 12. These average prices have been carried to a sufficient number of decimal places to insure accuracy.

Table I.—Retail prices of food, 1890 to 1903 (*pp. 664 to 845*).—This table shows, for each year from 1890 to 1903, the average price of the particular article enumerated in each separate schedule or statement of prices. In addition to the average price for each year the average price for the 10-year period, 1890 to 1899, is also shown for reasons explained in connection with Table II. The 30 articles are presented in alphabetical order, the prices for each article are then shown by States, and, under the States, by localities from which secured.

The particular grade or description of each article is shown in connection with the average prices in as much detail as possible. As regards the description of each article, it should be stated that the greatest care was taken to secure prices throughout the period for an article of precisely the same kind and grade. Changes in quality are, of course, reflected in prices, and for this reason note has been made of any important changes which have occurred. By referring to the table it is seen that the first article is "Apples, evaporated," and the first line shows the average price computed from monthly statements of the price of evaporated apples, as sold by a certain retail merchant in Birmingham, Ala. The figures in the first column show the average price per pound, $0.0909, as computed from that particular statement of prices for the 10-year period, 1890 to 1899. The next column shows the average price per pound, $0.0850, in 1890, the next the average price per pound, $0.0817, in 1891, etc. The second line presents the price of evaporated apples in Montgomery, Ala., etc.

Table II.—Relative retail prices of food, 1890 to 1903 (*pp. 846 to 853*).—From the average price of each article relative prices have been computed for each year, the base used in computing these relative prices being in every instance the average price of the article for the 10-year period, 1890 to 1899, which is shown in Table I.

A relative price or an index number, as it is technically called, of any article is the per cent which the price of that article at any certain date is of the price of the same article at a date or a period which has been selected as the base or standard.

The base selected for this compilation is, as has been stated, the average price for the 10-year period, 1890 to 1899. This base period is the same as was used in the presentation of wholesale prices in Bulletins 39, 45, and 51 of this Bureau. The average for the 10-year period is used as the base for the reason that an average price for a

number of years more nearly shows average or normal conditions than does the price for a single year. The value of relative prices is to enable the reader to more readily follow the course of prices of a single article or of groups of articles.

While relative prices were computed for each of the 5,302 schedules or statements of prices, it was thought unnecessary to present them in detail. The 33 States from which prices were secured have been grouped, following the plan of the United States census. The relative prices for each article are shown for each of the five geographical divisions and for the United States. The classification of the States into groups is as follows:

North Atlantic States:
- Maine.
- New Hampshire.
- Massachusetts.
- Rhode Island.
- Connecticut.
- New York.
- New Jersey.
- Pennsylvania.

South Atlantic States:
- Delaware.
- Maryland.
- District of Columbia.
- Virginia.
- West Virginia.
- North Carolina.
- South Carolina.
- Georgia.

North Central States:
- Ohio.
- Indiana.
- Illinois.
- Michigan.
- Wisconsin.
- Minnesota.
- Iowa.
- Missouri.
- Kansas.

South Central States:
- Kentucky.
- Tennessee.
- Alabama.
- Louisiana.
- Texas.

Western States:
- Colorado.
- California.
- Washington.

By an examination of Table II, page 846, it is seen that the first article for which relative prices are presented is "Apples, evaporated." In the North Atlantic States 5 schedules or statements of prices were secured for this article—2 from Boston, Mass., and 3 from New York City, N. Y. The relative price (average price for 1890–1899 = 100) for that geographical division was 97 in 1890—that is, the price for that year was 97 per cent of the average price for the 10-year period, 1890 to 1899. This relative price 97 was found by first computing the relative price for each of the 5 separate statements of prices of evaporated apples returned for the North Atlantic States and then adding these 5 relative prices for 1890, and dividing by 5, the number of schedules secured in those States. The relative price in that division for each year was computed in the same way.

In the South Atlantic States 8 schedules or separate statements of prices were secured, therefore the sum of the relative prices of the 8 statements was divided by 8 to secure the relative prices for that group of States. In the North Central States 12 statements of prices were secured, in the South Central States 7 statements, and in the Western

States 4 statements. The total number of schedules secured for evaporated apples in the United States was 36. The same method was employed in computing the relative prices for evaporated apples in each of the years in the United States as in the geographical divisions—that is, the sum of the relative prices of the 36 statements was divided by the number of schedules.

In the part of the table showing relative prices for fresh beef, roasts and stews, page 846, it is seen that 112 schedules were secured in the North Atlantic States, 35 schedules in the South Atlantic States, 76 schedules in the North Central States, 22 schedules in the South Central States, and 17 schedules in the Western States, a total of 262 schedules in the United States. Meat of this description in the North Atlantic States reached the lowest price of the 14-year period in 1894, the relative price for that year being 97.9 or 2.1 per cent below the average price for the 10-year period, 1890 to 1899; in the South Atlantic States the lowest relative price, 97, was in 1893; in the North Central States the lowest, 98.8, was in 1896; in the South Central States the lowest, 95.3, was in 1890; in the Western States the lowest, 95.7, was in 1893. Considering all the schedules secured for this article in the United States the lowest relative price was 98.3, in 1894.

In each of the five divisions of States, and also in the United States considered as a whole, the highest relative price for this article during the 14-year period was reached in 1902. In the North Atlantic States the relative price for that year was 118.9 or 18.9 per cent above the average price for the 10-year period, 1890 to 1899; in the South Atlantic States, the relative price was 120.2; in the North Central States, 117.2; in the South Central States, 118.5; in the Western States, 119.9, and in the United States, 118.6.

The relative retail prices in the United States, considered as a whole, of the 30 articles of food for the fourteen years from 1890 to 1903 are presented in the table which follows:

RELATIVE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD IN THE UNITED STATES, 1890 TO 1903.

[Average price for 1890–1899=100.]

Year.	Apples, evaporated.	Beans, dry.	Beef, fresh, roasts and stews.	Beef, fresh, steaks.	Beef, salt.	Bread, wheat.	Butter.	Cheese.	Chickens.	Coffee.

1894	103.6	103.4	101.9	102.6	100.9	99.0	93.8	98.7	98.7	99.8
1895	99.4	99.2	98.8	91.8	94.2	98.8	91.8	98.5	98.5	98.9
1896	96.7	95.5	97.6	77.0	86.8	96.7	96.6	98.8	99.5	97.2
1897	97.4	97.3	98.2	93.0	84.3	97.9	95.7	98.5	99.9	97.4
1898	100.2	99.1	95.1	105.4	86.3	101.7	101.3	100.7	101.2	97.9
1899	102.9	101.8	99.2	96.1	85.1	102.4	101.7	104.4	103.7	98.3
1900	109.7	107.7	105.3	93.5	83.0	102.4	104.9	105.5	104.9	98.5
1901	121.0	117.5	110.2	116.8	82.6	103.5	103.0	106.7	108.8	98.9
1902	135.6	132.5	119.4	117.0	83.4	103.5	96.0	107.2	115.2	99.5
1903	139.8	129.0	121.3	114.8	80.2	103.9	96.1	106.0	114.9	99.1

From this table it is seen that the price of fresh roasting and stewing beef in 1890 was 99.5 per cent of the average price during the 10-year period from 1890 to 1899. In 1891 the price was exactly the average price for the 10-year period—that is, 100.0. The lowest point reached was in 1894, when it was 98.3 per cent of the average price for the 10-year period. The highest point reached was in 1902, when it stood at 118.6. In 1903 it stood at 113.1, or 13.1 per cent higher than the average price for the period from 1890 to 1899. In the use of these tables showing the relative figures it should be borne in mind that the difference in the relative prices in any two years is not the per cent of difference in the cost. For example: The relative price of fresh roasting and stewing beef was 98.3 in 1894 and 113.1 in 1903. The difference in these relative prices is 14.8; and this figure being 15.1 per cent of 98.3, the per cent of increase in 1903 over 1894 is 15.1 per cent.

From the preceding table is drawn the one which follows. It shows for the United States the lowest and highest yearly relative price of each of the 30 articles of food for the 14 years, 1890 to 1903, also the year in which the lowest and highest prices were reached.

LOWEST AND HIGHEST YEARLY RELATIVE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD IN THE UNITED STATES, 1890 TO 1903.

[Average price for 1890–1899=100.]

Article.	Lowest.		Highest.	
	Year.	Relative price.	Year.	Relative price.
Apples, evaporated	1897	87.8	1891	110.3

Fish, fresh	1890	99.3	1903	107.3
Fish, salt	1897	95.2	1903	108.4
Flour, wheat	1894	88.7	1891	112.5
Lard	1897	89.8	1902	134.3
Milk, fresh	1899	98.9	1903	105.8
Molasses	1897	97.7	1890	104.7
Mutton and lamb	1894	97.8	1902	114.7
Pork, fresh	1890	97.0	1902	128.3
Pork, salt, bacon	1890	95.8	1903	139.8
Pork, salt, dry or pickled	1890	95.3	1902	132.5
Pork, salt, ham	1898	95.1	1903	121.3
Potatoes, Irish	1896	77.0	1902	117.0
Prunes	1903	80.2	1890	116.8
Rice	1896	96.7	1903	103.9
Sugar	1895	91.8	1890	118.6
Tea	1895, 1897	98.5	1902	107.2
Veal	1895	98.5	1902	115.2
Vinegar	1896	97.2	1891	105.5

Of the 30 articles, the lowest yearly relative price was reached by 5 in 1890, 4 in 1894, 2 in 1895, 1 in 1895 and 1897, the price being the same for the two years; 4 in 1896, 8 in 1897, 2 in 1898, 1 in 1899, 1 in 1901 and 1902, and 2 in 1903. The highest yearly relative price was reached by 4 in 1890, 1 in 1890, 1891, and 1892, 3 in 1891, 11 in 1902, and 11 in 1903.

In addition to the relative prices which are shown for each of the articles, this report also shows relative prices for the 30 articles of food considered as a whole. The relative prices for the food group were computed and are presented in two ways—the one being simple averages, which were found by adding the relative prices for each of the articles and dividing by 30, the number of articles; the other being weighted averages, in which the relative prices were found by giving to the various articles their weight or relative importance, as measured by the value of the article consumed in a year by representative workingmen's families as shown by the family budgets secured in connection with this report. This weighted average will be further discussed in connection with other tables.

The following table presents the simple averages of the relative prices of the 30 articles of food for each year from 1890 to 1903 in each of the five geographical divisions and in the United States considered as a whole. In the North Atlantic States, 2,664 schedules were obtained

for 1890 to 1902, and 2,659 for 1903; in the South Atlantic States, 588 schedules were obtained for 1890 to 1902, and 587 for 1903; in the North Central States, 1,444 schedules were obtained for 1890 to 1902, and 1,443 for 1903; in the South Central States, 325 schedules were obtained for the whole period, and in the Western States, 281 schedules were obtained for 1890 to 1902, and 279 for 1903, making a total for the United States of 5,302 schedules for 1890 to 1902, and 5,293 for 1903.

RELATIVE RETAIL PRICES OF FOOD, SIMPLE AVERAGES, BY GEOGRAPHICAL DIVISIONS, 1890 TO 1903.

[Average price for 1890-1899=100.]

Year.	North Atlantic States.	South Atlantic States.	North Central States.	South Central States.	Western States.	United States.
1890	101.9	100.7	102.8	101.1	105.4	102.1
1891	102.9	101.5	104.1	102.9	106.2	103.4
1892	102.0	100.6	101.7	100.6	104.4	101.8
1893	104.3	102.1	105.0	102.9	102.7	104.1
1894	99.9	100.3	100.9	99.9	99.4	100.3
1895	98.2	99.5	98.3	98.2	97.3	98.2
1896	96.2	97.5	94.9	96.2	93.9	95.8
1897	96.9	97.8	95.3	97.2	94.2	96.3
1898	98.3	99.4	98.1	99.9	96.7	98.5
1899	99.3	100.6	99.4	101.0	99.8	99.6
1900	101.3	102.2	101.7	103.3	100.1	101.5
1901	104.4	106.6	106.7	108.1	102.0	105.5
1902	110.0	110.8	112.1	114.1	106.9	110.9
1903	110.4	110.1	112.0	114.0	108.1	110.9

This table of simple averages shows that the lowest relative price was reached in each of the five divisions and in the United States in 1896. The highest relative price was reached in 1902 in the South Atlantic States, the North Central States, and the South Central States, and in 1903 in the North Atlantic States and the Western States, while for the United States, the highest price was reached in 1902 and 1903, the relative price being the same for these two years. In the North Atlantic States the relative price ranged from 96.2 to 110.4; in the South Atlantic States, from 97.5 to 110.8; in the North Central States, from 94.9 to 112.1; in the South Central States, from 96.2 to 114.1; in the Western States, from 93.9 to 108.1, and in the total for the United States, from 95.8 to 110.9. As indicated by this table of simple averages, the price of food in the United States in 1903, compared with each of the other years of the period, was 8.62 per cent higher than in 1890, 7.25 per cent higher than in 1891, 8.94 per cent higher than in 1892, 6.53 per cent higher than in 1893, 10.57 per cent higher than in 1894, 12.93 per cent higher than in 1895, 15.76 per cent higher than in 1896, the year of lowest prices for food, 15.16 per cent higher than in 1897, 12.59 per cent higher than in 1898, 11.35 per cent higher than in 1899, 9.26 per cent higher than in 1900, 5.12 per cent higher than in 1901, and the same as in 1902.

The price of many articles of food was high in 1903, and the table which follows shows the articles whose price in 1903 was higher than

the average price for the 10-year period, 1890 to 1899, and also the articles whose price in 1903 was lower than the average price for 1890 to 1899. The table follows:

RELATIVE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD IN THE UNITED STATES, 1903 COMPARED WITH AVERAGE PRICE FOR 1890-1899.

[Average price for 1890-1899=100.]

Articles for which the price in 1903 was higher than the average for 1890-1899.	Relative price 1903.	Articles for which the price in 1903 was lower than the average for 1890-1899.	Relative price 1903.
Price higher.		*Price lower.*	
Bread, wheat	100.2	Prunes	80.2
Apples, evaporated	100.8	Coffee	89.3
Flour, wheat	101.2	Sugar	96.1
Molasses	103.8	Vinegar	99.1
Rice	103.9		
Milk, fresh	105.8		
Tea	106.0		
Fish, fresh	107.3		
Fish, salt	108.4		
Beef, salt	108.8		
Cheese	109.4		
Butter	110.8		
Mutton and lamb	112.6		
Beef, fresh, steaks	112.9		
Beef, fresh, roasts and stews	113.1		
Potatoes, Irish	114.8		
Veal	114.9		
Beans, dry	118.1		
Chickens	118.5		
Corn meal	120.7		
Pork, salt, ham	121.3		
Eggs	125.3		
Lard	126.7		
Pork, fresh	127.0		
Pork, salt, dry or pickled	129.0		
Pork, salt, bacon	139.8		

It is seen that the price of all of the more important articles, except sugar and coffee, was higher in 1903 than the average for the 10-year period, 1890 to 1899. Milk was 5.8 per cent higher, butter 10.8 per cent higher, fresh beef (steaks) 12.9 per cent higher, fresh beef (roasts and stews) 13.1 per cent higher, potatoes 14.8 per cent higher, salt ham 21.3 per cent higher, eggs 25.3 per cent higher, fresh pork 27 per cent higher, dry or pickled pork 29 per cent higher, and salt bacon 39.8 per cent higher.

The price of vinegar was 0.9 per cent lower in 1903 than for the 10-year period, 1890 to 1899, sugar 3.9 per cent lower, coffee 10.7 per cent lower, and prunes 19.8 per cent lower.

The preceding table is summarized in the short table which follows:

NUMBER AND PER CENT OF THE PRINCIPAL ARTICLES OF FOOD CLASSIFIED BY PER CENT WHICH THE 1903 RETAIL PRICE IS ABOVE OR BELOW THE AVERAGE PRICE FOR 1890-1899.

Price higher.	Number of articles.	Per cent of articles.	Price lower.	Number of articles.	Per cent of articles.
25 to 40 per cent	5	16.6	Less than 10 per cent	2	6.7
10 to 25 per cent	10	33.3	10 to 25 per cent	2	6.7
Less than 10 per cent	11	36.7	Total	4	13.4
Total	26	86.6	Grand total	30	100.0

From this table it is seen that in 1903 the price of 5 of the 30 articles of food, or 16.6 per cent, was from 25 to 40 per cent higher than the average price for the 10-year period, 1890 to 1899; the price of 10 articles, or 33.3 per cent of the total, was from 10 to 25 per cent higher than the average price for the 10-year period, and the price of 11 articles, or 36.7 per cent of the total, was less than 10 per cent higher than the average price for the 10-year period. On the other hand, the price of 2 articles, or 6.7 per cent of the whole number, was less than 10 per cent lower than the average price for the 10-year period, and the price of 2 articles, or 6.7 per cent of the whole number, was from 10 to 25 per cent lower than the average price for the 10-year period.

To render easy a comparison of the prices of the last year of the period 1903 with those of each of the other years, the following table has been prepared, showing the per cent of increase or decrease in the prices of 1903, compared with the prices of each previous year of the period:

PER CENT OF INCREASE (+) OR DECREASE (−) IN RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD, 1903 COMPARED WITH PREVIOUS YEARS.

Article.	Per cent of increase or decrease in 1903 compared with—

In this table (+) and (−) are used to show whether the price in 1903 was higher or lower than in the year indicated at the head of the column. Thus, on the first line it is seen that evaporated apples were 7.5 per cent lower in 1903 than in 1890; on the second line, that dry beans were 14.3 per cent higher in 1903 than in 1890; on the third

line, that fresh roasting and stewing beef was 13.7 per cent higher in 1903 than in 1890, etc.

Of the 30 articles included in this investigation and shown in the preceding table the average price of 15 was higher and the average price of 15 was lower in 1903 than in 1902.

Certain of the articles are related to each other in such a way as to make a comparison of the course of prices of such articles very interesting. These groups of related articles are shown in the table which follows:

RELATIVE RETAIL PRICES IN THE UNITED STATES OF CERTAIN GROUPS OF RELATED ARTICLES OF FOOD, 1890 TO 1903.

[Average price for 1890-1899=100.]

Year.	Cattle products.			Dairy products.		
	Beef, fresh, roasts and stews.	Beef, fresh, steaks.	Beef, salt.	Milk, fresh.	Butter.	Cheese.
1890	99.5	98.8	97.5	100.5	99.2	98.8
1891	100.0	99.4	98.3	100.5	106.4	100.3
1892	99.6	99.3	99.5	100.6	106.8	101.5
1893	99.0	99.6	100.3	100.4	109.9	101.8
1894	98.3	98.2	98.9	100.2	101.7	101.6
1895	98.6	99.1	99.6	100.0	97.0	99.2
1896	99.1	99.5	99.8	99.9	92.7	97.9
1897	100.3	100.2	100.9	99.7	93.1	99.0
1898	101.7	102.0	102.1	99.4	95.1	97.5
1899	103.7	103.9	103.2	98.9	97.7	102.4
1900	106.5	106.4	103.7	99.9	101.4	103.9
1901	110.7	111.0	106.1	101.1	103.2	103.3
1902	118.6	118.5	116.0	103.3	111.5	107.3
1903	113.1	112.9	108.8	105.8	110.8	109.4

Year.	Hog products.					Flour and bread.	
	Pork, fresh.	Pork, salt, bacon.	Pork, salt, dry or pickled.	Pork, salt, ham.	Lard.	Flour, wheat.	Bread, wheat.
1890	97.0	95.8	95.3	98.7	98.2	109.7	100.3
1891	98.7	96.6	98.9	99.3	99.8	112.5	100.3
1892	100.5	99.1	100.5	101.9	103.6	105.1	100.3
1893	107.0	109.0	108.7	109.3	117.9	96.1	100.1
1894	101.8	103.6	103.4	101.9	106.9	88.7	99.9
1895	99.7	99.4	99.2	98.8	100.1	89.0	99.7
1896	97.4	96.7	95.5	97.6	92.5	92.7	99.9
1897	97.6	97.4	97.3	98.2	89.8	104.3	100.0
1898	98.6	100.2	99.1	95.1	93.9	107.4	99.8
1899	101.7	102.9	101.8	99.2	97.1	94.6	99.6
1900	107.7	109.7	107.7	105.3	104.4	94.3	99.7
1901	117.9	121.0	117.5	110.2	118.1	94.4	99.4
1902	128.3	135.6	132.5	119.4	134.3	94.9	99.4
1903	127.0	139.8	129.0	121.3	126.7	101.2	100.2

Under cattle products are shown the three articles, beef, fresh, roasts and stews; beef, fresh, steaks, and beef, salt. The price of each of these three articles was higher in 1891 than in 1890; that of the two descriptions of fresh beef was lower, and that of salt beef was higher in 1892 than in 1891; prices of roasts and stews were lower and of steaks and salt beef higher in 1893 than in 1892; all three of the

articles show lower prices in 1894 than in 1893; in each year from 1895 to 1902, inclusive, the price of each of the three articles increased; all were lower, however, in 1903 than in 1902.

In the group hog products, all of the 5 articles take the same course in each of the 6 years, 1891 to 1896; in 1897 all except lard were higher than in 1896; in 1898 all except salt ham were higher than in 1897; in each of the 4 years, 1899 to 1902, all of the 5 articles were higher than in the year immediately preceding; in 1903 fresh pork, dry or pickled pork, and lard were lower, while bacon and ham were higher, than in 1902.

In the group flour and bread, it is seen that while there were decided fluctuations in the price of flour, there was but little change from year to year in bread prices. Exactly the opposite is shown in dairy products—milk, the raw product, varied but little, while both butter and cheese show great variations in price from year to year.

In connection with this report on retail prices it is interesting to verify the truth of the statement which has often been made, that retail prices usually follow the wholesale but do not always vary in the same proportion. The table which follows shows the relative wholesale prices of food (simple averages of 53 articles from 1890 to 1892 and of 54 articles from 1893 to 1903) and the relative retail prices of food (simple averages of 30 articles). The figures for wholesale prices are from Bulletin 51 of this Bureau.

The table follows:

RELATIVE WHOLESALE AND RETAIL PRICES OF FOOD IN THE UNITED STATES, 1890 TO 1903.

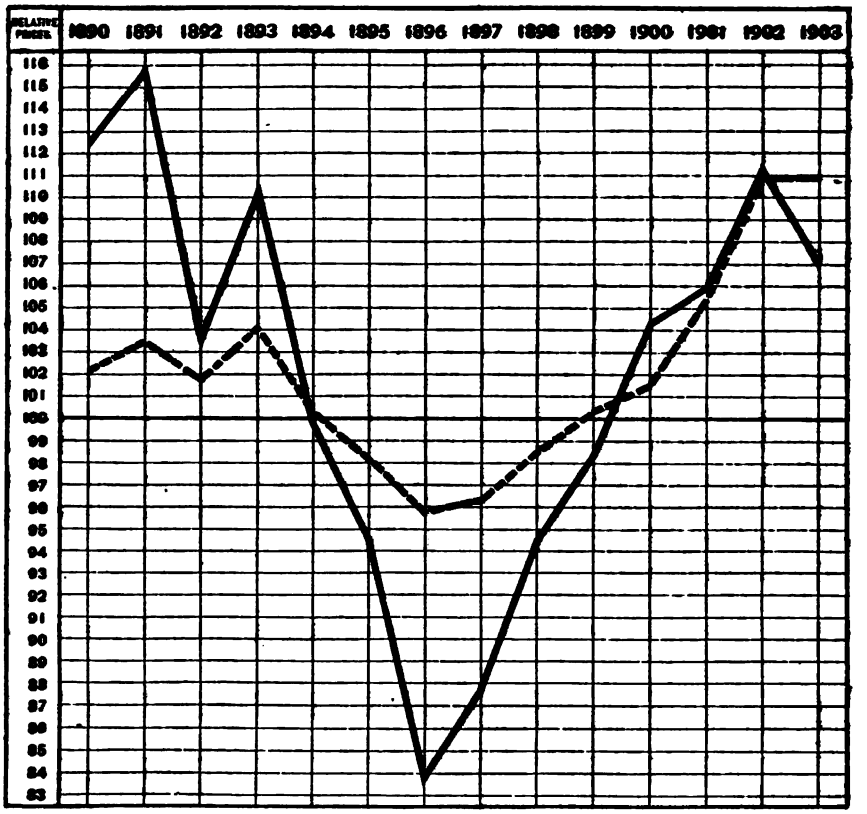

[The wholesale prices are from Bulletin 51 of the Bureau of Labor and are simple averages of 53 articles from 1890 to 1892 and of 54 articles from 1893 to 1903. The retail prices are simple averages of 30 articles. Average price for 1890–1899=100.]

Year.	Relative wholesale prices of food.	Relative retail prices of food.	Year.	Relative wholesale prices of food.	Relative retail prices of food.
1890	112.4	102.1	1897	87.7	96.8
1891	115.7	103.4	1898	94.4	98.5
1892	103.6	101.8	1899	98.3	99.6
1893	110.2	104.1	1900	104.2	101.5
1894	99.8	100.3	1901	105.9	105.5
1895	94.6	98.2	1902	111.3	110.9
1896	83.8	95.8	1903	107.1	110.9

The facts presented in this table are clearly shown in the graphic table which follows:

RELATIVE WHOLESALE AND RETAIL PRICES OF FOOD IN THE UNITED STATES, 1890 TO 1903.

[AVERAGE PRICE FOR 1890 TO 1899=100.]

WHOLESALE PRICES (SIMPLE AVERAGE OF 84 ARTICLES). RETAIL PRICES (SIMPLE AVERAGE OF 20 ARTICLES).

From this table it is seen that both wholesale and retail prices of food were higher in 1891 than in 1890, the wholesale, however, showing a much greater advance; both wholesale and retail prices were lower in 1892 than in 1891, the decline being much greater in wholesale than in retail; both were higher in 1893 than in 1892; both lower in 1894 than in 1893; both lower in 1895 than in 1894; both lower in 1896 than in 1895, the decline in wholesale being much greater than in retail; both were higher in each of the years from 1897 to 1902 than in the year immediately preceding; wholesale prices were lower in 1903 than in 1902, while retail prices remained on the same level.

No marked difference in the comparison is shown when articles for which prices not quoted in both the wholesale and retail price

compilations are eliminated and the average prices of the 25 articles or groups of articles of food common to both the wholesale and retail price investigations made by this Bureau are used.

It will now be interesting to consider retail prices in connection with certain information secured from the detailed schedules of cost of living furnished by 2,567 families. The total number of persons in the 2,567 families was 13,643. The table which follows shows, by geographical divisions, the total number of families, average size of family reporting expenditures in detail, and average income, average expenditure for all purposes, and average expenditure for food per family for the year 1901:

NUMBER OF FAMILIES, AVERAGE SIZE OF FAMILY, AVERAGE INCOME PER FAMILY, AVERAGE EXPENDITURE PER FAMILY FOR ALL PURPOSES, AND AVERAGE EXPENDITURE PER FAMILY FOR FOOD, BY GEOGRAPHICAL DIVISIONS, 1901.

Geographical division.	Families.	Average size of family.	Average income per family.	Average expenditure per family for all purposes.	Average expenditure per family for food.
North Atlantic States	1,415	5.25	$834.83	$778.04	$338.10
South Atlantic States	219	5.30	762.78	700.62	298.64
North Central States	721	5.46	842.60	785.95	321.60
South Central States	122	5.65	715.46	690.11	292.68
Western States	90	4.69	891.82	751.46	308.53
United States	2,567	5.31	827.19	768.54	326.90

A marked difference in conditions is seen by comparing the geographical divisions. The average family income varied from $715.46 in the South Central States to $891.82 in the Western States. The average family expenditure for all purposes was $690.11 in the South Central States and $785.95 in the North Central States. The average family expenditure for food was $292.68 in the South Central States and $338.10 in the North Atlantic States.

The average expenditure for food, when compared with the average expenditure for all purposes, does not vary materially in the five divisions. In the North Atlantic States the average expenditure for food was 43.46 per cent of the average expenditure for all purposes; in the South Atlantic States, 42.63 per cent; in the North Central States, 40.92 per cent; in the South Central States, 42.41 per cent; in the Western States, 41.06 per cent; and in the United States, considered as a whole, 42.54 per cent.

The table which follows shows, for the 2,567 families reporting expenditures in detail, the average amount expended per family for each of the principal items entering into the cost of living, and also the per cent which the amount expended for each item is of the total family expenditure.

AVERAGE EXPENDITURE OF 2,567 FAMILIES FOR EACH OF THE PRINCIPAL ITEMS ENTERING INTO COST OF LIVING, AND PER CENT OF AVERAGE TOTAL EXPENDITURE, 1901.

Expenditure for—	Expenditure based on all families.	
	Average.	Per cent of total expenditure.
Food	$326.90	42.54
Rent	99.49	12.95
Mortgage:		
Principal	[a] 8.15	1.06
Interest	[b] 3.98	.52
Fuel	32.23	4.19
Lighting	8.15	1.06
Clothing:		
Husband	33.73	4.39
Wife	26.03	3.39
Children	48.08	6.26
Taxes	5.79	.75
Insurance:		
Property	1.53	.20
Life	19.44	2.53
Organizations:		
Labor	3.87	.50
Other	5.18	.67
Religious purposes	7.62	.99
Charity	2.39	.31
Furniture and utensils	26.31	3.42
Books and newspapers	8.35	1.09
Amusements and vacation	12.28	1.60
Intoxicating liquors	12.44	1.62
Tobacco	10.93	1.42
Sickness and death	20.54	2.67
Other purposes	45.13	5.87
Total	768.54	100.00

[a] Including interest paid by 13 families.
[b] Not including interest paid by 13 families, included in principal.

The following table shows for each of the geographical divisions and for the United States, the average quantity per family of certain principal articles of food consumed in one year. These averages are based on all families from which detailed statements were secured in each geographical division.

AVERAGE QUANTITY PER FAMILY OF CERTAIN PRINCIPAL ARTICLES OF FOOD CONSUMED IN 1901, BY GEOGRAPHICAL DIVISIONS.

Article.	Unit.	North Atlantic States, 1,415 families.	South Atlantic States, 219 families.	North Central States, 721 families.	South Central States, 122 families.	Western States, 90 families.	United States, 2,567 families.
Fresh beef	lb.	352.2	306.8	363.5	317.4	348.4	349.7
Salt beef	lb.	75.8	9.4	21.3	3.5	3.8	48.6
Fresh hog products	lb.	103.4	85.3	152.6	128.1	28.4	114.2
Salt hog products	lb.	95.2	222.0	87.3	248.7	76.6	110.5
Other meat	lb.	98.1	28.1	68.8	11.2	37.8	77.7
Poultry	lb.	67.2	73.6	71.3	53.0	53.5	67.7
Fish	lb.	98.9	66.1	56.5	39.5	57.5	79.9
Eggs	doz.	85.8	90.6	88.3	85.0	39.8	85.2
Milk	qt.	396.3	191.9	348.2	220.8	324.4	354.5
Butter	lb.	118.9	102.1	124.0	88.9	108.9	117.1
Cheese	lb.	15.9	15.2	17.4	18.9	3.8	16.0
Lard	lb.	73.8	119.5	89.1	143.3	48.5	84.4
Tea	lb.	12.9	8.2	8.5	4.9	5.6	10.6
Coffee	lb.	38.5	60.7	57.5	71.4	25.2	46.8
Sugar	lb.	282.8	240.4	253.1	245.8	267.2	268.5
Molasses	gal.	3.2	4.6	3.4	6.2	4.0	3.6
Flour and meal	lb.	624.0	851.8	718.2	979.5	452.3	680.8
Bread	loaf	310.2	197.0	165.6	199.8	255.2	252.7
Rice	lb.	22.2	49.1	21.8	47.2	10.3	25.1
Potatoes	bu.	13.8	11.1	18.3	13.3	10.8	14.7

From this table it is seen that 349.7 pounds was the average quantity per family of fresh beef consumed in the 2,567 families investigated.

In the North Atlantic States the average quantity was 352.2 pounds; in the South Atlantic States, 306.8 pounds; in the North Central States, 363.5 pounds; in the South Central States, 317.4 pounds, and in the Western States, 348.4 pounds. The average for the United States was 349.7.

In the 5 divisions a great difference is seen in the consumption of salt beef. The average quantity consumed per family in the North Atlantic States was 75.3 pounds; in the South Atlantic States, 9.4 pounds; in the North Central States, 21.3 pounds; in the South Central States, 3.5 pounds, and in the Western States, 3.8 pounds. The average for the United States was 48.6 pounds.

Of the more important articles salt hog products show the greatest variation in quantity consumed per family. The average consumption of this article in the North Atlantic States was 95.2 pounds; in the South Atlantic States, 222 pounds; in the North Central States, 87.3 pounds; in the South Central States, 248.7 pounds, and in the Western States, 76.6 pounds. The average for the 2,567 families investigated in the United States was 110.5 pounds.

The average quantity of sugar consumed per family varied but little in the different localities. In the North Atlantic States it was 282.8 pounds; in the South Atlantic States, 240.4 pounds; in the North Central States, 253.1 pounds; in the South Central States, 245.8 pounds, and in the Western States, 267.2 pounds. The average for the 2,567 families was 268.5 pounds.

Another table shows the average cost per family of the principal articles of food consumed in one year. These averages are based on all families from which detailed statements were secured in each of the geographical divisions.

AVERAGE COST PER FAMILY OF THE PRINCIPAL ARTICLES OF FOOD CONSUMED IN 1901, BY GEOGRAPHICAL DIVISIONS.

Article.	North Atlantic States, 1,415 families.	South Atlantic States, 219 families.	North Central States, 721 families.	South Central States, 122 families.	Western States, 90 families.	United States, 2,567 families.

Sugar	16.67	14.15	14.63	15.70	14.49	15.76
Molasses	1.51	2.01	1.53	2.98	3.28	1.69
Flour and meal	16.24	21.10	16.47	22.68	8.85	16.76
Bread	15.41	9.34	8.11	9.55	11.93	12.44
Rice	1.94	2.77	1.92	3.70	.91	2.05
Potatoes	13.77	9.29	13.01	11.54	9.84	12.98
Other vegetables	16.08	20.75	22.03	16.62	35.41	18.85
Fruit	15.31	15.22	17.15	11.52	40.53	16.52
Vinegar, pickles, and condiments	4.06	3.21	4.80	4.41	1.49	4.12
Other food	17.91	19.13	26.63	21.12	11.61	20.40
Total	338.10	298.64	321.60	292.68	308.53	326.90

From this table it is seen that the average cost per family of the fresh beef consumed was $54.27 in the North Atlantic States, $41.08 in the South Atlantic States, $46.06 in the North Central States, $37.84 in the South Central States, and $54.13 in the Western States. The average cost for the 2,567 families investigated in the United States was $50.05. The average cost per family of salt hog products consumed was $12.19 in the North Atlantic States, $26.79 in the South Atlantic States, $11.25 in the North Central States, $28.09 in the South Central States, and $11.06 in the Western States. The average for all families investigated was $13.89.

The average cost of all food consumed during the year was $338.10 in the North Atlantic States, $298.64 in the South Atlantic States, $321.60 in the North Central States, $292.68 in the South Central States, and $308.53 in the Western States.

The average expenditure for food in the families investigated in the North Atlantic States was 15.52 per cent above the average expenditure in the families investigated in the South Central States. The average expenditure for the 2,567 families investigated in the United States was $326.90.

From the table just shown another table has been computed, showing the relative importance, as measured by the average family expenditure, of the principal articles of food consumed in one year. For the purpose of computing the relative importance of the various articles, the total food consumed is considered equal to 10,000. The table follows:

RELATIVE IMPORTANCE OF THE PRINCIPAL ARTICLES OF FOOD CONSUMED IN 1901, BY GEOGRAPHICAL DIVISIONS.

[Total food consumed = 10,000.]

Article.	North Atlantic States, 1,415 families.	South Atlantic States, 219 families.	North Central States, 721 families.	South Central States, 122 families.	Western States, 90 families.	United States, 2,567 families.
Fresh beef	1,605	1,375	1,432	1,293	1,754	1,531
Salt beef	242	88	68	11	21	161
Fresh hog products	379	351	572	533	131	429
Salt hog products	361	897	350	960	359	425
Other meat	363	129	270	48	173	299
Poultry	301	283	290	203	232	288
Fish	298	174	176	135	224	245
Eggs	545	521	474	451	357	514
Milk	718	436	612	418	663	656
Butter	881	863	886	743	1,031	860
Cheese	75	89	89	115	22	80

Tea	187	147	131	92	111	162
Coffee	287	354	401	417	261	328
Sugar	493	474	455	536	470	482
Molasses	45	67	48	100	106	54
Flour and meal	480	706	512	775	287	513
Bread	456	313	262	326	387	385
Rice	57	93	60	126	30	68
Potatoes	407	311	405	394	319	385
Other vegetables	476	695	685	568	1,148	577
Fruit	453	510	533	394	1,314	565
Vinegar, pickles, and condiments	120	107	149	151	48	126
Other food	530	641	528	722	376	624
Total food	10,000	10,000	10,000	10,000	10,000	10,000

This table shows that upon the basis of the reported expenditures for food in the 2,567 families, the total value of food being represented by 10,000, fresh beef has a value of 1,531; salt beef, 161; fresh hog products, 429; salt hog products, 425; other meat, 299; poultry, 290; fish, 245; eggs, 514; milk, 652; butter, 880; cheese, 80; lard, 286; tea, 162; coffee, 328; sugar, 482; molasses, 52; flour and meal, 513; bread, 381; rice, 63; potatoes, 395; other vegetables, 577; fruit, 505; vinegar, pickles, and condiments, 126, and other food, 624. It should be understood that these figures of relative importance are based on the cost of the various articles; that is, for every $100 spent for food, $15.31 was spent for fresh beef, $1.61 for salt beef, etc.

It is interesting to note that in the 2,567 families fresh hog products and salt hog products have almost equal importance, and that the two combined have almost exactly one-half the importance of fresh beef and salt beef combined. Eggs are practically equal in importance to flour and meal. Tea has one-half the importance of coffee, and sugar is almost equal in importance to the sum of tea and coffee. Butter is almost equal in importance to the sum of flour and meal and bread.

Marked differences in importance of the various articles are shown in the 5 groups of States. In the North Atlantic States fresh beef has a relative importance of 1,605; in the South Atlantic States, 1,375; in the North Central States, 1,432; in the South Central States, 1,293, and in the Western States, 1,754. The relative importance of salt beef is 11 in the South Central States, while in the North Atlantic States it is 242, or 22 times its importance in the South Central States.

The importance of salt hog products is 361 in the North Atlantic States, 897 in the South Atlantic States, 350 in the North Central States, 960 in the South Central States, and 359 in the Western States. The importance of sugar does not show a great difference; it is 493 in the North Atlantic States, 474 in the South Atlantic States, 455 in the North Central States, 536 in the South Central States, and 470 in the Western States.

By the use of this table a series of index numbers, or relative prices, has been computed in which the principal articles of food have been given the weight or importance shown in the preceding table, thus showing the course of retail prices from year to year when weighted according to average family consumption.

Certain groupings of the articles for which retail prices were secured are necessary in order to bring them within the classification reported in the family budgets.

Fresh beef is represented by the two articles—one, roasts and stews, and the other, steaks; salt hog products by the three articles—salt bacon, dry or pickled pork, and salt ham; other meat by the two articles—mutton and lamb, and veal; poultry by the single article—

chickens; fish by fresh fish and salt fish; flour and meal by wheat flour and corn meal. However, in obtaining an average index number to be used in weighting by relative importance, wheat flour is given twice the importance of corn meal. It would be necessary to give wheat flour even a greater weight as compared with corn meal but for the fact that bread is considered separately from flour and meal. Fruit is represented by two articles only—evaporated apples and prunes—as it was impossible to secure complete series of prices of other descriptions of fruits. Vinegar, pickles, and condiments are represented by the single article—vinegar, retail prices not being obtainable for other articles of this class.

This list includes all articles for which retail prices were secured except beans. The groupings are as follows:

Fresh beef:
- Roasts and stews.
- Steaks.

Salt beef.
Fresh hog products.
- Pork, fresh.

Salt hog products:
- Pork, salt, bacon.
- Pork, salt, dry or pickled.
- Pork, salt, ham.

Other meat:
- Mutton and lamb.
- Veal.

Poultry:
- Chickens.

Fish:
- Fresh.
- Salt.

Eggs.
Milk.
Butter.
Cheese.
Lard.
Tea.
Coffee.
Sugar.
Molasses.
Flour and meal:
- Flour, wheat (2).
- Corn meal (1 .

Bread.
Rice.
Potatoes.
Fruit:
- Apples, evaporated.
- Prunes.

Vinegar, pickles, and condiments:
- Vinegar.

Other food:
- The same index as for total food, except meat.

The figures showing the relative importance of the various articles of food are based on the family consumption for 1901. There is no doubt that the relative importance of articles varied slightly from year to year, but no figures are available covering the 14 years, therefore the relative consumption of the various articles of food is considered the same for each of the years.

The method of computing the series of relative prices weighted according to family consumption, for each of the geographical divisions and for the United States considered as a whole, can best be explained by illustrating the process.

The following table is for the United States for the year 1890:

RELATIVE RETAIL PRICES OF FOOD IN THE UNITED STATES IN 1890, THE VARIOUS ARTICLES BEING WEIGHTED ACCORDING TO AVERAGE CONSUMPTION IN 2,567 FAMILIES.

Article.	Relative importance.	Relative price.	Result.
Fresh beef	1,531	99.2	151,875.2
Salt beef	161	97.5	15,697.5
Fresh hog products	429	97.0	41,613.0
Salt hog products	425	96.6	41,055.0
Other meat	299	99.8	29,840.2
Total meat	2,845	98.4	280,080.9
Poultry	290	101.3	29,377.0
Fish	245	100.0	24,500.0
Eggs	514	100.6	51,708.4
Milk	652	100.5	65,526.0
Butter	880	99.2	87,296.0
Cheese	80	98.8	7,904.0
Lard	286	98.2	28,085.2
Tea	162	100.0	16,200.0
Coffee	328	105.4	34,571.2
Sugar	482	118.6	57,165.2
Molasses	52	104.7	5,444.4
Flour and meal	513	106.5	54,634.5
Bread	381	100.3	38,214.3
Rice	63	101.3	6,381.9
Potatoes	395	109.3	43,173.5
Fruit	505	112.9	57,014.5
Vinegar, pickles, and condiments	126	102.9	12,965.4
Total, except meat	5,954	104.2	620,161.5
Other food	624	104.2	65,020.8
Meat	2,845	98.4	280,080.9
Grand total	9,423	102.4	965,263.2

From Table II on page 846, it is seen that for the United States in 1890 the relative price of fresh beef, roasts and stews, was 99.5; of fresh beef, steaks, 98.8; the average of the two being 99.2, constitutes the relative price of fresh beef. The relative importance of fresh beef (as computed from the reports of 2,567 families) is 1,531. The relative price, 99.2, is multiplied by 1,531 to give it the proper weight in computing the relative price for all food in that year, and the result of the multiplication is entered in the last column of the table.

Again, from Table II, page 847, it is seen that for the United States in 1890 the relative price of salt beef was 97.5; that number is, as indicated in this table, multiplied by 161, the relative importance of salt beef, and the result is entered in the last column. The relative price of fresh pork for the United States in 1890 was 97; that number is multiplied by 429, the relative importance of fresh hog products.

For the United States in 1890, the relative price of salt bacon was 95.8, of dry or pickled pork, 95.3, and of salt ham, 98.7, the average of the three salt hog products being 96.6. This number, 96.6, is multiplied by 425, the relative importance of salt hog products. For the United States in 1890 the relative price of mutton and lamb was 100.7, and of veal 98.8, the average being 99.8, and as these two articles represent "other meat" that number is multiplied by 299, the relative importance of other meat.

The sum of the numbers indicating the relative importance of the various kinds of meat is 2,845, the relative importance in family consumption of all meat. The sum of the results which were obtained by multiplying the relative price of each of the kinds of meat by the number indicating its relative importance is 280,080.9. Therefore, to obtain the relative price of the group, meat, for the United States in 1890, the sum of the results is divided by 2,845, the relative importance of the meat group. The quotient, 98.4, shows the relative price of the meat group in 1890 when weighted according to family consumption.

Each of the remaining 17 articles or classes of articles are taken up in the same way as were the several kinds of meat, the relative price for the United States in 1890 as shown in Table II being multiplied by the relative importance of the article, as shown in the table on page 650. For the group of 17 articles, comprised in "total, except meat," the relative price, 104.2, was found in the same way as was the relative price for all meat, the sum of the results, 620,161.5, being divided by 5,954, the sum of the numbers indicating relative importance. One other group, designated "other food," remains to be considered. As the various descriptions of meat most generally used and also a class, "other meat," were included in the total meat, it is presumed that all meat was included in that total and that the food which in the family budgets was classed as "other food" must be more nearly related to the various articles considered in the group "total food, except meat," and therefore "other food" was given the same relative price as "total food, except meat."

The grand total of the numbers indicating relative importance was 9,423, and the sum of the results obtained by multiplying the relative price of each of the various articles considered by its relative importance was 965,263.2. The sum of the results divided by 9,423 is 102.4, the relative price of food for the United States in 1890 when the various articles are weighted according to the reported consumption in 2,567 families. The class "other vegetables" has a relative importance of 577, but it was impossible to collect retail prices of articles to represent properly this class for the 14 years hence it was not practicable to include that class in this table, and therefore the grand total of relative importance, 9,423, lacks 577 of making the 10,000 total importance of food indicated in the table on page 650. That is, 94.23 per cent of the total food consumption per family is represented in this table.

It is interesting to see that the relative price for 1890, weighted according to family consumption and including 94.23 per cent of the total food consumption, differed but little from the simple average of the 30 articles of food shown on page 641, the weighted price being 102.4 and the simple average 102.1. It should not be understood that the 30

articles for which retail prices were secured and which are enumerated on page 652 comprise 94.23 per cent of the food consumed, but these articles represent groups or classes which do, according to the 2,567 family budgets, comprise 94.23 per cent of the food consumed.

The weighted relative price for the United States for each of the years from 1891 to 1903 was found in the same way as has been explained for 1890.

The same method was employed in computing the weighted relative prices for each of the 5 geographical divisions as for the United States. The relative importance of the various articles, or classes of articles, in the different divisions, is shown in the table on page 650.

The table which follows shows for each of the 5 divisions and for the United States the relative price of food for each year from 1890 to 1903. In the first column under each division is shown the simple average of the relative prices of the 30 articles, and in the second column under each division is shown the relative prices weighted according to the average consumption of the various articles of food in the families investigated in the States included in the division. The relative prices obtained by the two methods are presented so that the reader can make such use or comparison of them as he desires. The table follows:

RELATIVE RETAIL PRICES OF FOOD, SIMPLE AND WEIGHTED AVERAGES, BY GEOGRAPHICAL DIVISIONS, 1890 TO 1903.

[Average price for 1890–1899=100.]

Year.	North Atlantic States.		South Atlantic States.		North Central States.		South Central States.		Western States.		United States.	
	Simple.	Weighted.	Simple.	Weighted.	Simple.	Weighted.	Simple.	Weighted.	Simple.	Weighted.	Simple.	Weighted.
1890	101.9	102.3	100.7	101.2	102.3	102.3	101.1	102.1	105.4	107.7	102.1	102.4
1891	102.9	103.2	101.5	102.1	104.1	104.5	102.9	103.6	106.2	108.7	103.4	103.8
1892	102.0	102.1	100.6	101.1	101.7	101.8	100.6	100.7	104.4	105.2	101.8	101.9
1893	104.3	104.4	102.1	103.2	105.0	105.4	102.9	103.5	102.7	102.9	104.1	104.4
1894	99.9	99.2	100.3	100.0	100.9	100.6	99.9	100.0	99.4	99.3	100.3	99.7
1895	98.2	97.7	99.5	98.7	98.3	98.0	98.2	98.1	97.3	96.7	98.2	97.8
1896	96.2	97.0	97.5	96.8	94.9	94.6	96.2	96.1	98.9	98.2	95.8	95.5
1897	96.9	96.9	97.8	97.1	95.3	95.6	97.2	97.3	94.2	92.7	96.3	96.3
1898	98.3	98.8	99.4	99.3	98.1	98.4	99.9	98.8	96.7	95.2	98.5	98.7
1899	99.3	99.5	100.6	100.5	99.4	98.9	101.0	99.9	99.8	98.5	99.6	99.5
1900	101.3	101.2	102.2	102.4	101.7	100.8	103.3	101.1	100.1	98.1	101.5	101.1
1901	104.4	104.7	106.6	106.9	106.7	106.1	108.1	106.9	102.0	99.9	105.5	105.2
1902	110.0	110.5	110.8	111.8	112.1	111.7	114.1	113.5	106.9	104.4	110.9	110.9
1903	110.4	110.1	110.1	111.2	112.0	111.0	114.0	113.5	106.1	103.7	110.9	110.3

It is extremely interesting to compare the results under the two methods. In the North Atlantic States there is a difference of 0.4 in 1890, 0.3 in 1891, 0.1 in 1892, 0.1 in 1893, 0.7 in 1894, 0.5 in 1895, 0.8 in 1896, nothing in 1897, 0.5 in 1898, 0.2 in 1899, 0.1 in 1900, 0.3 in 1901, 0.5 in 1902, and 0.3 in 1903. The greatest difference in results

obtained under the two methods is found in the Western States. In the United States considered as a whole, there is a difference under the two methods of 0.3 in 1890, 0.4 in 1891, 0.1 in 1892, 0.3 in 1893, 0.6 in 1894, 0.4 in 1895, 0.3 in 1896, nothing in 1897, 0.2 in 1898, 0.1 in 1899, 0.4 in 1900, 0.3 in 1901, nothing in 1902, and 0.6 in 1903. This shows a difference of 0.6 in two years, of 0.4 in three years, of 0.3 in four years, of 0.2 in one year, of 0.1 in two years, and of nothing in two years.

The graphic table on the opposite page shows the course of retail prices of food in the United States during the fourteen years from 1890 to 1903 as represented by a simple average of the 30 articles and also weighted according to the average family consumption.

The following table shows the average price per pound, dozen, quart, etc., in 1901, of various articles of food. One column shows the average price paid by the 2,567 families investigated in the United States, as reported by the housewife or other member of the family—that is, the average amount paid per family for each article was divided by the average quantity of the article consumed. Another column shows the average price computed from the reports obtained from the retail merchants. The average price shown in the last column for fresh beef, for instance, is the simple average of the prices quoted on the 614 schedules for fresh beef; the average for salt beef is the simple average of the prices quoted on the 121 schedules for that article, etc. The table follows:

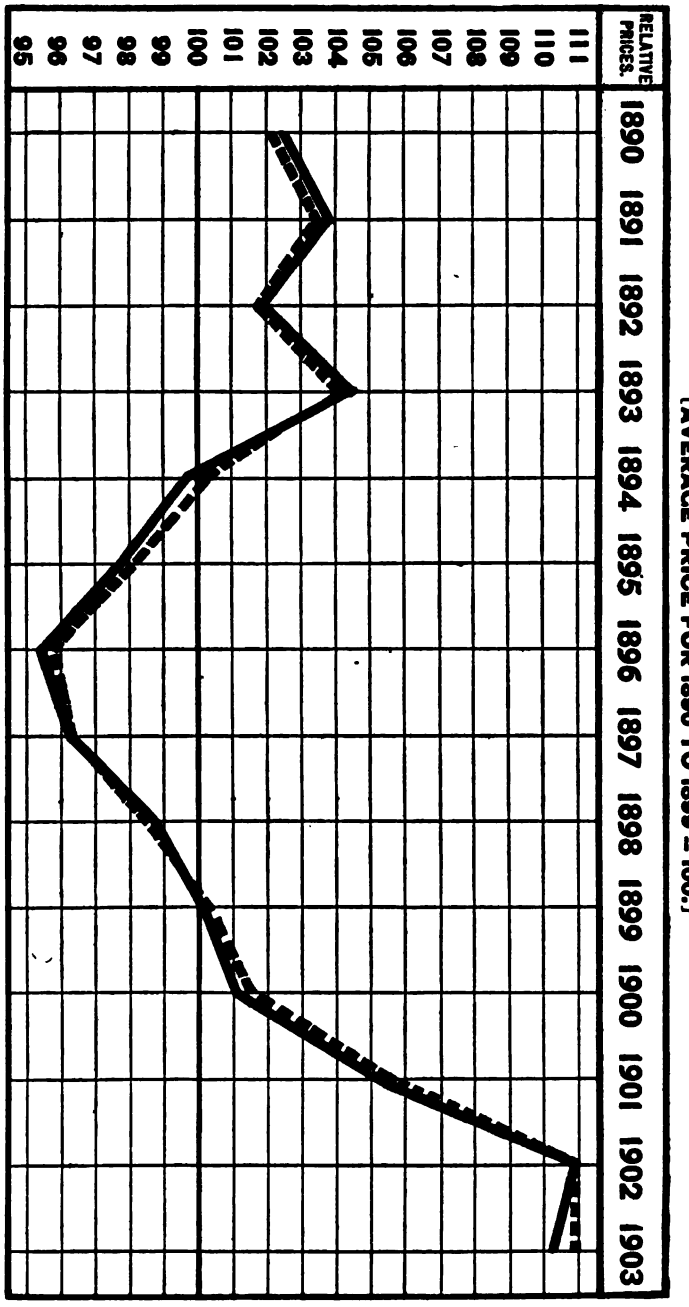

AVERAGE PRICE PER POUND, DOZEN, QUART, ETC., OF CERTAIN PRINCIPAL ARTICLES OF FOOD, 1901.

Article.	Unit.	Computed from 2,567 family budgets.	Computed from retail-price schedules.
Fresh beef	Pound	$0.1431	$0.1470
Salt beef	Pound	.1082	.0931
Fresh hog products	Pound	.1228	.1300
Salt hog products	Pound	.1257	.1457
Other meat	Pound	.1259	.1430
Poultry	Pound	.1402	.1529
Fish	Pound	.1003	.1166
Eggs	Dozen	.1971	.2194
Milk	Quart	.0601	.0617
Butter	Pound	.2456	.2644
Cheese	Pound	.1638	.1634
Lard	Pound	.1108	.1190
Tea	Pound	.5000	.5455
Coffee	Pound	.2295	.2445
Sugar	Pound	.0587	.0587
Molasses	Gallon	.4694	.5136
Flour and meal	Pound	.0246	(a)
Bread	Loaf	.0492	.0545
Rice	Pound	.0617	.0637
Potatoes	Bushel	.8796	.9908

a Flour, $0.0250; corn meal, $0.0230.

RELATIVE RETAIL PRICES OF FOOD IN THE UNITED STATES, 1890 TO 1903.

[AVERAGE PRICE FOR 1890 TO 1899 = 100.]

The average price per pound for fresh beef reported paid by the 2,567 families was $0.1431; the simple average price from the 614 schedules for fresh beef secured from the retail merchants was $0.1470. The average price per pound for salt beef reported in the family budgets was $0.1082; the average from the 121 schedules for salt beef secured from the retail merchants was $0.0931. In the family budgets salt beef included dried beef, while the prices from retail merchants are for corned beef. The prices for the other articles can be compared by referring to the table.

It will be noticed that for all articles except four—salt beef, cheese, sugar, and flour and meal—the average price computed from the family budgets is less than the reports of retail merchants. In explanation of this difference, two suggestions may be offered. The first is, that when the price of any article of food advances there is a tendency on the part of the consumers to use some substitute for that article. Therefore, if an article is low for six months of the year and high for the remaining six months the greater quantity consumed by the family may have been purchased during the months when the price was low, thus producing a lower average for the year than would the simple average of 12 monthly quotations. A second suggestion is that prices secured from retail merchants were usually for some standard grade or brand of article, while in some families investigated it is no doubt true that articles of a lower grade were purchased at times.

The table which follows shows for 20 articles of food the amount which could have been bought for one dollar in each of the years 1890 to 1903.

The table is based on the average price reported paid by the 2,567 families in 1901, the quantities for the other years being calculated from the relative retail prices for each of the articles. Flour and meal were combined on the family budgets; therefore the average price reported for these two articles by the retail merchants was used in computing the number of pounds of each which could have been bought for one dollar.

No detailed description of the various articles can be given except that they were of the grade reported used by the 2,567 families reporting expenditures in detail.

The table follows:

AMOUNT OF VARIOUS ARTICLES OF FOOD OF THE GRADE USED BY THE 2,567 FAMILIES REPORTING EXPENDITURES IN DETAIL, WHICH COULD HAVE BEEN BOUGHT FOR ONE DOLLAR IN EACH YEAR FROM 1890 TO 1903.

[Based on the average price paid by the 2,567 families in 1901, and the course of retail prices.]

Year.	Fresh beef, pounds	Salt beef, pounds	Fresh pork, pounds	Salt pork, pounds	Poultry [chickens], pounds	Fish, pounds	Eggs, dozens.	Milk, quarts.	Butter, pounds	Cheese, pounds

1903	8.42	2.01	4.43	18.26	2.08	37.31	38.58	20.17	12.19	1.16

From this table it is seen that for one dollar 7.81 pounds of fresh beef (of the grade consumed by the 2,567 families investigated) could have been bought in 1890, 7.78 pounds in 1891, 7.79 pounds in 1892, 7.81 pounds in 1893, 7.89 pounds in 1894, 7.84 pounds in 1895, 7.81 pounds in 1896, 7.73 pounds in 1897, 7.61 pounds in 1898, 7.47 pounds in 1899, 7.28 pounds in 1900, 6.99 pounds in 1901, 6.54 pounds in 1902, and 6.86 pounds in 1903.

The table which follows shows by geographical divisions the average food cost per family each year from 1890 to 1903. This table is based on the average food cost per family in 1901 as reported by the families investigated in each geographical division, and the course of retail prices of food as indicated by the relative prices weighted according to family consumption in that division.

In each of the divisions of States and in the United States as a whole it is considered in this table that the expenditure for each of the various articles bore the same relation to the total expenditure for food in each of the other years of the 14-year period covering this investigation as in 1901.

The table follows:

AVERAGE FOOD COST PER FAMILY, BY GEOGRAPHICAL DIVISIONS, FOR EACH YEAR, 1890 TO 1903.

[Based on the average cost per family in 1901 and the course of retail prices of food as indicated by the relative prices weighted according to family consumption.]

Year.	North Atlantic States, 1,415 families.	South Atlantic States, 219 families.	North Central States, 721 families.	South Central States, 122 families.	Western States, 90 families.	United States, 2,567 families.
1890	$330.35	$282.72	$310.08	$279.54	$332.61	$318.20
1891	333.26	285.23	316.75	283.64	335.72	322.55
1892	329.70	282.44	308.57	275.71	324.90	316.65
1893	337.13	288.30	319.48	283.37	317.80	324.41
1894	320.34	279.36	304.93	273.79	306.68	309.81
1895	315.50	275.73	297.05	268.59	298.65	303.91
1896	313.23	270.42	286.74	263.11	287.84	296.76
1897	312.91	271.26	289.77	266.40	286.29	299.24
1898	319.05	277.41	298.26	270.50	294.01	306.70
1899	321.31	280.76	299.78	273.51	304.21	309.19
1900	326.80	286.07	305.54	276.80	302.97	314.16
1901	338.10	298.64	321.60	292.68	308.53	326.90
1902	356.83	312.33	338.57	310.75	322.43	344.61
1903	355.54	310.65	336.45	310.75	320.27	342.75

From this table it is seen that in the North Atlantic States the average food cost per family (assuming that food was purchased in the same quantity each year, and that the expenditure for each of the various articles bore the same relation to the total expenditure for food in each of the years) was $330.35 in 1890, $333.26 in 1891, etc. The lowest cost was $312.91 in 1897, and the highest was $356.83 in 1902, a difference of $43.92.

For the United States, considered as a whole, the average cost of food per family in 1890 was $318.20. In 1896, the year of lowest prices, it fell to $296.76; in 1902 it reached the highest point of the period, being $344.61, while in 1903 it fell slightly, to $342.75. The changes in the cost of living, as shown by this table, relate to food alone, representing 42.54 per cent of all family expenditures in the 2,567 families furnishing information.

Of the remaining articles, constituting 57.46 per cent of the family expenditure, certain ones are, from their nature, affected only indirectly and in very slight degree by any rise or fall in prices. Such are payments on account of principal and interest of mortgages, taxes, property and life insurance, labor and other organization fees, religion, charity, books and newspapers, amusements and vacation, intoxicating liquors, and sickness and death. These together constituted 14.51 per cent of the family expenditure in 1901 of the 2,567 families investigated. Miscellaneous purposes, not reported, for which, from their very character, no prices were obtainable, made up 5.87 per cent, and rent, for which also no prices for the several years were available, made up 12.95 per cent.

The remaining classes of family expenditure, 24.13 per cent of all, consist of clothing 14.04 per cent, fuel and lighting 5.25 per cent, fur-

niture and utensils 3.42 per cent, and tobacco 1.42 per cent. For these no retail prices covering a series of years were available, but it is probable that the advance of the retail prices was considerably less than the advance in wholesale prices, as the advance in the wholesale prices of 25 articles of food in 1903, as compared with 1896, was 27.9 per cent, while the advance in the retail prices of 25 similar articles or groups of articles, as shown by the results of this investigation, was but 15.3 per cent. An examination of the relative wholesale prices of these classes of articles in Bulletin No. 51, giving them their proper weight according to family consumption, leads to the conclusion that the advance in the retail prices of these articles as a whole, comparing 1903 with the year of lowest prices (1896), could have been but little, if at all, greater than the advance in the retail prices of food.

If all classes of family expenditures as above be taken into consideration, it is apparently a safe and conservative conclusion, therefore, that the increase in the cost of living, as a whole, in 1903, when compared with the year of lowest prices in the 14-year period, was less than 15.5 per cent, the figure given above as the increase in the cost of food as shown by this investigation. This assumes, of course, always the purchase of the same articles and the same quantities in years of low prices, low wages, and more or less irregular employment, and in years of higher prices, higher wages, and steady employment.

GENERAL TABLES.

RETAIL PRICES OF FOOD.

TABLE I.—RETAIL PRICES OF FOOD, 1890 TO 1903.

APPLES, EVAPORATED, PER POUND.

Marginal number.	State and locality.	Description.	Average, 1890 to 1899.	1890.	1891.	1892.

per cent of, by States ... 32, 33, 250–253
Clothing, expenditure per family for—
by geographical divisions and general nativity of head of family ... 573–579
by nativity of head of family and classified income ... 560–564
by nativity of head of family and size of family ... 565–568
by size of family and classified income ... 582, 583
by States and classified income ... 550–559
for each State, by general nativity of head of family and size of family ... 516–532
for each State, by nativity of head of family ... 321–341, 452–468
summary of, by general nativity of head of family and classified income ... 592
summary of, by general nativity of head of family and States ... 570, 571
summary of, by geographical divisions and general nativity of head of family ... 71
summary of, by nativity of head of family ... 369, 510, 581
summary of, by States ... 367, 508
Clothing, expenditure per individual for, in normal families—
by nativity of head of family and size of family ... 586–588
for each State, by general nativity of head of family and size of family ... 583–549
summary of, by general nativity of head of family and States ... 589, 590
summary of, by geographical divisions and general nativity of head of family ... 99
summary of, by nativity of head of family ... 591
Clothing, families having an expenditure for—
for each State, by nativity of head of family ... 309–319, 420–434
per cent of, for each State, by nativity of head of family ... 436–450
summary of, by geographical divisions and general nativity of head of family ... 57
summary of, by nativity of head of family ... 365, 502
summary of, by States ... 364, 500
summary of per cent of, by nativity of head of family ... 506
summary of per cent of, by States ... 504
Clothing, per cent of total expenditure made for, in normal families—
by general nativity of head of family and classified income ... 593
by general nativity of head of family and size of family ... 589
by geographical divisions and general nativity of head of family ... 573–579
by nativity of head of family ... 581
by size of family and classified income ... 584, 585
by States and geographical divisions ... 580
Consumption of food. (*See* Food, consumption of, etc.)
Cost of food. (*See* Food, cost of, etc.)
Cost of living—
analysis of tables of ... 17–107
scope and plan of the investigation of ... 11, 12, 15–17

D.

Death and sickness. (*See* Sickness and death.)
Deficit, manner of meeting, and disposition of surplus—
for each State, by nativity of head of family ... 78, 79, 470–487
summary of, by nativity of head of family ... 89, 514, 515
summary of, by States ... 89, 512, 513
Deficit or surplus, average, per family, and families having. (*See* Surplus or deficit, average, per family, etc.)
Deficit or surplus, families reporting. (*See* Families reporting a surplus, a deficit, etc.)
Dependents, boarders, etc., condition of families as to—
for each State, by nativity of head of family ... 25, 26, 224–235
summary of, by nativity of head of family ... 38, 261
summary of, by States ... 37, 38, 260
Dependents included in the investigation, number of, by geographical divisions and general nativity of head of family ... 22
Domestic and personal service. (*See under* Industries, etc.; Industry, etc.)

E.

Earnings, classified—
heads of families in each group of, by industries and occupations ... 40, 264–282
per cent of heads of families in each group of, by industries ... 41, 285
per cent of heads of families in each group of, in occupations embracing 100 or more persons ... 40, 41, 283
summary of heads of families in each group of, by industries ... 41, 284
Earnings, occupation, and nonemployment. (*See* Occupation, earnings, and nonemployment.)
Economic law propounded by Doctor Engel ... 101
Expenditure and income. (*See* Income and expenditure.)
Expenditure for food—
average, and per cent of total expenditure, by geographical divisions and general nativity of head of family ... 67
average, and per cent of total expenditure, by nativity of head of family ... 66
per cent of total, made for each of the principal articles, by geographical divisions ... 82
relative, per 100 units of consumption in normal families with children as compared with expenditure per 100 units of consumption in normal families with no children ... 107
Expenditure for various items of food—
families having, for each State, by nativity of head of family ... 76, 372–387
per cent of families having, for each State, by nativity of head of family ... 77, 388–408

Families, normal, expenditure per family in—
by nativity of head of family and classified income ... 91, 92, 560–564
by size of family and classified income ... 97, 582, 583
by States and classified income ... 91, 550–559
summary of, by general nativity of head of family and classified income ... 100, 592
Families, normal, having an income of $600 or under $700—
average expenditure for various purposes in, by general nativity of head of family ... 100
average family expenditure for various purposes in, by size of family ... 97
per cent of total expenditure made for various purposes in, by size of family ... 98
Families, normal, income and expenditure per family in—
by nativity of head of family and size of family ... 92, 93, 565–568
for each State, by general nativity of head of family and size of family ... 90, 91, 516–582
summary of, by general nativity of head of family and States ... 94, 95, 570, 571
summary of, by nativity of head of family ... 96, 97, 581
Families, normal, income and expenditure per individual in—
by geographical divisions and general nativity of head of family ... 99
by nativity of head of family and size of family ... 93, 586–588
for each State, by general nativity of head of family and size of family ... 91, 583–549
summary of, by general nativity of head of family and States ... 98, 99, 589, 590
summary of, by nativity of head of family ... 180, 591
Families normal, number and average size of, in each geographical division, by general nativity of head of family ... 92
Families, normal, of each specified size, income per family and amount and per cent of total expenditure made for various purposes in, by geographical divisions and general nativity of head of family ... 95, 572–579
Families, normal, per cent of total expenditure made for various purposes and per cent of income expended in—
by general nativity of head of family and size of family ... 93, 94, 569
by nativity of head of family ... 97, 581
by States ... 95, 96, 580
Families, normal, per cent of total expenditure made for various purposes in—
by general nativity of head of family and classified income ... 100–102, 593
by size of family and classified income ... 98, 584, 585
Families, normal, quantity and cost of certain articles of food in—
for each State, by nativity of head of family ... 103, 594–621
summary of, by nativity of head of family ... 105, 106, 626–629
summary of, by States ... 103–105, 622–625
Families, normal, quantity of certain articles of food used per 100 units of consumption (or per adult male) in, by geographical divisions ... 104
Families, normal, reporting expenditures in detail in each geographical division, number and average size of, by general nativity of head of family ... 105
Families, number and size of, included in the investigation, by geographical divisions and general nativity of head of family ... 22, 23
Families, number of, investigated ... 16, 17, 22, 75
Families occupying rented and owned homes—
per cent of, by nativity of head of family ... 54
per cent of, by States ... 52
Families owning homes incumbered, paying and not paying on principal during the year—
per cent of, by nativity of head of family ... 55
per cent of, by States ... 53
Families owning homes, number and per cent of, and number and per cent of owned homes free from incumbrance, by geographical divisions and general nativity of head of family ... 56
Families renting and owning homes, size of home, and cost of rent—
for each State, by nativity of head of family ... 49, 342–361
summary of, by nativity of head of family ... 73–75, 371
summary of, by States ... 72, 73, 370
Families renting and owning houses, number of—
for each State, by nativity of head of family ... 309–319
summary of, by geographical divisions and general nativity of head of family ... 57
summary of, by nativity of head of family ... 365
summary of, by States ... 364
Families reporting a surplus, a deficit, or neither a surplus nor a deficit—
by States and by geographical divisions ... 62
per cent of, by geographical divisions and general nativity of head of family ... 69
per cent of, by nativity of head of family ... 65
Families reporting expenditures in detail, number and average size of, in each geographical division, by general nativity of head of family ... 76
Family, normal, as used in this investigation, definition of ... 18, 90
Fisheries. (*See under* Industries, etc.; Industry, etc.)
Food, amount of principal articles of, of the grade used by the 2,567 families reporting expenditures in detail, which could have been bought for one dollar in each year from 1890 to 1903 ... 658, 659
Food, average price per pound, dozen, quart, etc., of certain principal articles of, 1901 ... 656–658
Food consumed—
average cost per family of the various articles of, by general nativity of head of family ... 83
average cost per family of the various articles of, by geographical divisions ... 81
quantity per family of the various articles of, by geographical divisions ... 82
Food consumed in 1901 by 2,567 families—
average cost per family of the principal articles of, by geographical divisions ... 649, 650
average quantity per family of certain principal articles of, by geographical divisions ... 648, 649
relative importance of the principal articles of, by geographical divisions ... 650, 651
Food, consumption of, in a normal family, by units of consumption ... 19, 102
Food, consumption of, in 1,043 normal families (Table VI–Part I) ... 102–107, 594–631
Food, cost of certain articles of, and quantity, in normal families—
for each State, by nativity of head of family ... 103, 594–621
summary of, by nativity of head of family ... 105, 106, 626–629
summary of, by States ... 103–105, 622–625
Food, cost of, per 100 units of consumption in normal families—
by size of family and by nativity of head of family ... 106, 107, 631
by size of family and by States ... 106, 630

INDEX.

A.

	Page.
Agriculture. (*See under* Industries, etc.; Industry, etc.)	
Amusements and vacation, expenditure per family for—	
for each State, by nativity of head of family	453–469
summary of, by nativity of head of family	511
summary of, by States	509
Amusements and vacation, families having an expenditure for—	
for each State, by nativity of head of family	421–435
per cent of, for each State, by nativity of head of family	437–451
summary of, by nativity of head of family	503
summary of, by States	501
summary of per cent of, by nativity of head of family	507
summary of per cent of, by States	505

B.

Boarders and lodgers, families having an income from—	
number and per cent of, for each State, by nativity of head of family	298–308
number and per cent of, summary of, by nativity of head of family	363
number and per cent of, summary of, by States	362
Boarders and lodgers included in the investigation, number of, by geographical divisions and general nativity of head of family	22
Boarders and lodgers, income of families from—	
for each State, by nativity of head of family	320–340
summary of, by geographical divisions and general nativity of head of family	70
summary of, by nativity of head of family	368
summary of, by States	366
Boarders, dependents, etc. (*See* Dependents, boarders, etc.)	
Books and newspapers, expenditure per family for—	
for each State, by nativity of head of family	453–469
summary of, by nativity of head of family	511
summary of, by States	509
Books and newspapers, families having an expenditure for—	
for each State, by nativity of head of family	421–435
per cent of, for each State, by nativity of head of family	437–451
summary of, by nativity of head of family	503
summary of, by States	501
summary of per cent of, by nativity of head of family	507
summary of per cent of, by States	505

C.

Charity, expenditure per family for—	
for each State, by nativity of head of family	453–469
summary of, by nativity of head of family	511
summary of, by States	509
Charity, families having an expenditure for—	
for each State, by nativity of head of family	421–435
per cent of, for each State, by nativity of head of family	437–451
summary of, by nativity of head of family	503
summary of, by States	501
summary of per cent of, by nativity of head of family	507
summary of per cent of, by States	505
Children—	
included in the investigation, number of, by geographical divisions and general nativity of head of family	22
in each age group, per cent of, by condition and by general nativity of head of family	34
in each condition, per cent of, by age groups and by general nativity of head of family	34
Children at work, at school, at home, etc. (*See under* Children, condition of, etc.)	
Children, condition of, according to age groups—	
for each State, by nativity of head of family	25, 156–228
summary of, by nativity of head of family	33, 34, 254–257
summary of, by States	31, 32, 244–249
Children, condition of families as to—	
for each State, by nativity of head of family	24, 25, 132–155
summary of, by nativity of head of family	30, 31, 242, 243
summary of, by States	28–30, 240, 241
Children, families having an income from—	
number and per cent of, for each State, by nativity of head of family	298–308
number and per cent of, summary of, by nativity of head of family	363
number and per cent of, summary of, by States	362

Page.

Children, income of families from—
for each State, by nativity of head of family ... 320–340
summary of, by nativity of head of family ... 368
summary of, by States ... 366

per cent of, by geographical divisions and general nativity of head of family ... 36, 37
per cent of, by nativity of head of family ... 34–37, 258, 259
per cent of, by States ... 32, 33, 250–253
Clothing, expenditure per family for—
by geographical divisions and general nativity of head of family ... 573–579
by nativity of head of family and classified income ... 560–564
by nativity of head of family and size of family ... 565–568
by size of family and classified income ... 582, 583
by States and classified income ... 550–559
for each State, by general nativity of head of family and size of family ... 516–532
for each State, by nativity of head of family ... 321–341, 452–468
summary of, by general nativity of head of family and classified income ... 592
summary of, by general nativity of head of family and States ... 570, 571
summary of, by geographical divisions and general nativity of head of family ... 71
summary of, by nativity of head of family ... 369, 510, 581
summary of, by States ... 367, 508
Clothing, expenditure per individual for, in normal families—
by nativity of head of family and size of family ... 586–588
for each State, by general nativity of head of family and size of family ... 533–549
summary of, by general nativity of head of family and States ... 589, 590
summary of, by geographical divisions and general nativity of head of family ... 99
summary of, by nativity of head of family ... 591
Clothing, families having an expenditure for—
for each State, by nativity of head of family ... 309–319, 420–434
per cent of, for each State, by nativity of head of family ... 436–450
summary of, by geographical divisions and general nativity of head of family ... 57
summary of, by nativity of head of family ... 365, 502
summary of, by States ... 364, 500
summary of per cent of, by nativity of head of family ... 506
summary of per cent of, by States ... 504
Clothing, per cent of total expenditure made for, in normal families—
by general nativity of head of family and classified income ... 593
by general nativity of head of family and size of family ... 569
by geographical divisions and general nativity of head of family ... 573–579
by nativity of head of family ... 581
by size of family and classified income ... 584, 585
by States and geographical divisions ... 580
Consumption of food. (*See* Food, consumption of, etc.)
Cost of food. (*See* Food, cost of, etc.)
Cost of living—
analysis of tables of ... 17–107
scope and plan of the investigation of ... 11, 12, 15–17

D.

Death and sickness. (*See* Sickness and death.)
Deficit, manner of meeting, and disposition of surplus—
for each State, by nativity of head of family ... 78, 79, 470–487
summary of, by nativity of head of family ... 89, 514, 515
summary of, by States ... 89, 512, 513
Deficit or surplus, average, per family, and families having. (*See* Surplus or deficit, average, per family, etc.)
Deficit or surplus, families reporting. (*See* Families reporting a surplus, a deficit, etc.)
Dependents, boarders, etc., condition of families as to—
for each State, by nativity of head of family ... 25, 26, 224–235
summary of, by nativity of head of family ... 38, 261
summary of, by States ... 37, 38, 260
Dependents included in the investigation, number of, by geographical divisions and general nativity of head of family ... 22
Domestic and personal service. (*See under* Industries, etc.; Industry, etc.)

E.

Earnings, classified—
heads of families in each group of, by industries and occupations ... 40, 264–282
per cent of heads of families in each group of, by industries ... 41, 285
per cent of heads of families in each group of, in occupations embracing 100 or more persons ... 40, 41, 283
summary of heads of families in each group of, by industries ... 41, 284
Earnings, occupation, and nonemployment. (*See* Occupation, earnings, and nonemployment.)
Economic law propounded by Doctor Engel ... 101
Expenditure and income. (*See* Income and expenditure.)
Expenditure for food—
average, and per cent of total expenditure, by geographical divisions and general nativity of head of family ... 67
average, and per cent of total expenditure, by nativity of head of family ... 66
per cent of total, made for each of the principal articles, by geographical divisions ... 82
relative, per 100 units of consumption in normal families with children as compared with expenditure per 100 units of consumption in normal families with no children ... 107
Expenditure for various items of food—
families having, for each State, by nativity of head of family ... 76, 372–387
per cent of families having, for each State, by nativity of head of family ... 77, 388–408

Page.

Expenditure for various purposes—
average family, in normal families having an income of $600 or under $700, by size of family ... 97
average, in normal families having an income of $600 or under $700, by general nativity of head of family ... 100
families having, for each State, by nativity of head of family ... 46, 47, 309–319
per cent of, in 11,156 normal families, by classified income ... 101
summary of families having, by geographical divisions and general nativity of head of family ... 57
summary of families having, by nativity of head of family ... 54–57, 365
summary of families having, by States ... 52–54, 364
Expenditure of 2,567 families—
average, for each of the principal items entering into cost of living, and per cent of average total expenditure ... 648
average per family for all purposes, for the year 1901, by geographical divisions ... 647
Expenditure per family for various items of food—
for each State, by nativity of head of family ... 77, 78, 404–419
summary of, by nativity of head of family ... 82, 83, 498, 499
summary of, by States ... 80–82, 496, 497
Expenditure per family for various items other than food—
for each State, by nativity of head of family ... 78, 452–469
summary of, by nativity of head of family ... 87–89, 510, 511
summary of, by States ... 85–87, 508, 509
Expenditure per family in normal families—
by nativity of head of family and classified income ... 91, 92, 560–564
by size of family and classified income ... 97, 582, 583
by States and classified income ... 91, 550–559
summary of, by general nativity of head of family and classified income ... 100, 592
Expenditure, total, made for various purposes—
amount and per cent of, in normal families of each specified size, and income per family, by geographical divisions and general nativity of head of family ... 95, 572–579
per cent of, and per cent of income expended in normal families, by general nativity of head of family and size of family ... 93, 94, 569
per cent of, and per cent of income expended in normal families, by nativity of head of family ... 97, 581
per cent of, and per cent of income expended in normal families, by States ... 95, 96, 580
per cent of, in normal families, by general nativity of head of family and classified income ... 100–102, 593
per cent of, in normal families by size of family and classified income ... 98, 584, 585
per cent of, in normal families having an income of $600 or under $700, by size of family ... 98
Expenditures, detailed, in 2,567 families (Table IV–Part I) ... 75–89, 372–515

F.

Families, average size of ... 20, 22, 75, 105
Families, condition of—
as to children, for each State, by nativity of head of family ... 24, 25, 132–155
as to dependents, boarders, etc., for each State, by nativity of head of family ... 25, 26, 224–235
as to husband and wife, for each State, by nativity of head of family ... 23, 24, 110–131
summary of, as to children, by nativity of head of family ... 30, 31, 242, 243
summary of, as to children, by States ... 28–30, 240, 241
summary of, as to dependents, boarders, etc., by nativity of head of family ... 38, 261
summary of, as to dependents, boarders, etc., by States ... 37, 38, 260
summary of, as to husband and wife, by nativity of head of family ... 27, 28, 238, 239
summary of, as to husband and wife, by States ... 26, 27, 236, 237
Families having an expenditure for various items of food—
for each State, by nativity of head of family ... 76, 372–387
per cent of, for each State, by nativity of head of family ... 77, 388–403
summary of, by nativity of head of family ... 79, 490, 491
summary of, by States ... 79, 488, 489
summary of per cent of, by nativity of head of family ... 80, 494, 495
summary of per cent of, by States ... 79, 80, 492, 493
Families having an expenditure for various items other than food—
for each State, by nativity of head of family ... 78, 420–435
per cent of, for each State, by nativity of head of family ... 78, 436–451
summary of, by nativity of head of family ... 84, 502, 503
summary of, by States ... 83, 84, 500, 501
summary of per cent of, by nativity of head of family ... 84, 85, 506, 507
summary of per cent of, by States ... 84, 504, 505
Families having an expenditure for various purposes—
for each State, by nativity of head of family ... 46, 47, 309–319
summary of, by geographical divisions and general nativity of head of family ... 57
summary of, by nativity of head of family ... 54–57, 365
summary of, by States ... 52–54, 364
Families having an income from various sources—
for each State, by nativity of head of family ... 46, 298–308
summary of, by geographical divisions and general nativity of head of family ... 51
summary of, by nativity of head of family ... 50, 51, 363
summary of, by States ... 49, 50, 362
Families investigated, number and average size of all, and of families reporting expenditures in detail, and average per family of income, expenditure for food, and total expenditure, by geographical divisions ... 75, 76
Families, membership of. (*See* Membership of family.)
Families, normal, cost of food per 100 units of consumption in—
by size of family and by nativity of head of family ... 106, 107, 631
by size of family and by States ... 106, 630

Page.
Families, normal, expenditure per family in—
by nativity of head of family and classified income ... 91, 92, 560–564
by size of family and classified income ... 97, 582, 583
by States and classified income ... 91, 560–559
summary of, by general nativity of head of family and classified income ... 100, 592
Families, normal, having an income of $600 or under $700—
average expenditure for various purposes in, by general nativity of head of family ... 100
average family expenditure for various purposes in, by size of family ... 97
per cent of total expenditure made for various purposes in, by size of family ... 98
Families, normal, income and expenditure per family in—
by nativity of head of family and size of family ... 92, 93, 565–568
for each State, by general nativity of head of family and size of family ... 90, 91, 516–562
summary of, by general nativity of head of family and States ... 94, 95, 570, 571
summary of, by nativity of head of family ... 96, 97, 581
Families, normal, income and expenditure per individual in—
by geographical divisions and general nativity of head of family ... 99
by nativity of head of family and size of family ... 98, 586–588
for each State, by general nativity of head of family and size of family ... 91, 563–549
summary of, by general nativity of head of family and States ... 98, 99, 569, 590
summary of, by nativity of head of family ... 100, 591
Families normal, number and average size of, in each geographical division, by general nativity of head of family ... 92
Families, normal, of each specified size, income per family and amount and per cent of total expenditure made for various purposes in, by geographical divisions and general nativity of head of family ... 95, 572–579
Families, normal, per cent of total expenditure made for various purposes and per cent of income expended in—
by general nativity of head of family and size of family ... 93, 94, 569
by nativity of head of family ... 97, 581
by States ... 95, 96, 580
Families, normal, per cent of total expenditure made for various purposes in—
by general nativity of head of family and classified income ... 100–102, 593
by size of family and classified income ... 98, 584, 585
Families, normal, quantity and cost of certain articles of food in—
for each State, by nativity of head of family ... 103, 594–621
summary of, by nativity of head of family ... 105, 106, 626–629
summary of, by States ... 103–105, 622–625
Families, normal, quantity of certain articles of food used per 100 units of consumption (or per adult male) in, by geographical divisions ... 104
Families, normal, reporting expenditures in detail in each geographical division, number and average size of, by general nativity of head of family ... 285
Families, number and size of, included in the investigation, by geographical divisions and general nativity of head of family ... 22, 23
Families, number of, investigated ... 16, 17, 22, 75
Families occupying rented and owned homes—
per cent of, by nativity of head of family ... 54
per cent of, by States ... 52
Families owning homes incumbered, paying and not paying on principal during the year—
per cent of, by nativity of head of family ... 55
per cent of, by States ... 53
Families owning homes, number and per cent of, and number and per cent of owned homes free from incumbrance, by geographical divisions and general nativity of head of family ... 56
Families renting and owning homes, size of home, and cost of rent—
for each State, by nativity of head of family ... 42, 342–361
summary of, by nativity of head of family ... 73–75, 371
summary of, by States ... 72, 73, 370
Families renting and owning houses, number of—
for each State, by nativity of head of family ... 309–319
summary of, by geographical divisions and general nativity of head of family ... 57
summary of, by nativity of head of family ... 365
summary of, by States ... 364
Families reporting a surplus, a deficit, or neither a surplus nor a deficit—
by States and by geographical divisions ... 62
per cent of, by geographical divisions and general nativity of head of family ... 69
per cent of, by nativity of head of family ... 68
Families reporting expenditures in detail, number and average size of, in each geographical division, by general nativity of head of family ... 78
Family, normal, as used in this investigation, definition of ... 18, 90
Fisheries. (*See under* Industries, etc.; Industry, etc.)
Food, amount of principal articles of, of the grade used by the 2,567 families reporting expenditures in detail, which could have been bought for one dollar in each year from 1890 to 1903 ... 658, 659
Food, average price per pound, dozen, quart, etc., of certain principal articles of, 1901 ... 656–658
Food consumed—
average cost per family of the various articles of, by general nativity of head of family ... 83
average cost per family of the various articles of, by geographical divisions ... 81
quantity per family of the various articles of, by geographical divisions ... 82
Food consumed in 1901 by 2,567 families—
average cost per family of the principal articles of, by geographical divisions ... 649, 650
average quantity per family of certain principal articles of, by geographical divisions ... 648, 649
relative importance of the principal articles of, by geographical divisions ... 650, 651
Food, consumption of, in a normal family, by units of consumption ... 19, 102
Food, consumption of, in 1,043 normal families (Table VI–Part I) ... 102–107, 594–631
Food, cost of certain articles of, and quantity, in normal families—
for each State, by nativity of head of family ... 103, 594–621
summary of, by nativity of head of family ... 105, 106, 626–629
summary of, by States ... 103–105, 622–625
